Phonologie Der Moresneter Mundart:

Phonologie der Moresneter Mundart René Jongen, 1972 *Velar fronting in German dialects: A study in synchronic and diachronic phonology* Tracy Alan Hall, 2022-11-30 Velar Fronting VF is the name for any synchronic or diachronic phonological process shifting the velar place of articulation to the palatal region of the vocal tract A well known case of VF in Standard German is the rule specifying that the fricative x assimilates to after front segments VF also refers to the change from velar sounds like k g to palatals c The book provides a thorough investigation of VF in German dialects Data are drawn from over 300 original sources for varieties that are or were spoken in Germany Austria Switzerland and other countries VF differs geographically along three parameters A triggers B targets and C outputs VF triggers A are typically defined according to vowel height In some systems VF is induced only by high front vowels in others by high and mid front vowels and in yet others by high mid and low front vowels Some varieties treat consonants r l n as triggers while others do not VF can be nonassimilatory in which case the rule applies even in the context of back segments In many varieties of German VF targets B consist of the two fricatives x but in other dialects the targets comprise x but not In some places VF affects not only x but also velar stops and the velar nasal The output of VF C is typically palatal given the input x but in many other places it is the alveolopalatal A major theme is the way in which VF interacts with synchronic and diachronic changes creating or eliminating structures which can potentially undergo it or trigger it In many dialects the relationship between velars x and palatals is transparent because velars only occur in the back vowel context and palatals only when adjacent to front sounds In that type of system independent processes can either feed VF by creating additional structures which the latter can undergo or they can bleed it by eliminating potential structures to which VF could apply In other dialects VF is opaque In one opaque system both velars x and palatals surface in the context of front segments Thus in addition to expected front vowel plus palatal sequences i there are also unexpected ones consisting of front vowel plus velar ix In a second type of opaque system velars and palatals are found in the context of back segments hence expected sequences such as i occur in addition to unexpected ones like **The Cambridge Handbook of Germanic Linguistics** Michael T. Putnam, B. Richard

Page, 2020-04-16 The Germanic language family ranges from national languages with standardized varieties including German Dutch and Danish to minority languages with relatively few speakers such as Frisian Yiddish and Pennsylvania German Written by internationally renowned experts of Germanic linguistics this Handbook provides a detailed overview and analysis of the structure of modern Germanic languages and dialects Organized thematically it addresses key topics in the phonology morphology syntax and semantics of standard and nonstandard varieties of Germanic languages from a comparative perspective It also includes chapters on second language acquisition heritage and minority languages pidgins and urban vernaculars The first comprehensive survey of this vast topic the Handbook is a vital resource for students and researchers investigating the Germanic family of languages and dialects **The Dialects of Modern German** Charles

Russ,2013-09-13 This unique reference volume covers the 18 dialects of Germany Austria Switzerland Alsace and Luxembourg Each section discusses the status of dialect in the region concerned together with the historical and geographical background Then follows a description of the dialect structure of the region copiously illustrated with phonological grammatical and lexical examples in IPA transcription The phonology grammar and vocabulary of one typical dialect are presented together with a commentary All examples are given with English glosses The volume will be of most interest to Germanists with some knowledge of the linguistics and history of German wishing to deepen their knowledge of German dialects General linguists and sociolinguists who wish to know about German dialects will also find it useful It can serve as an intermediate level textbook for any course on German dialects which builds on a linguistics or history of German course

Gemination, Lenition, and Vowel Lengthening: Volume 157 Kurt Goblirsch,2018-05-24 The processes of gemination lenition and vowel lengthening are central to the study of phonology as they reveal much about the treatment of quantity in a given language Using data from older language stages modern dialects and standard languages this study examines the interdependence of vowel and consonant quantity in the history of the Germanic branch of Indo European Kurt Goblirsch focusses on the various geminations in Old Germanic languages West Germanic gemination glide strengthening and expressive gemination open syllable lengthening in German Dutch Frisian English and Scandinavian languages and the major lenitions in High German Low German and Danish as well as minor lenitions in Bavarian Franconian and Frisian dialects All of these changes are related to the development of the Germanic languages from distinctive segmental length to complementary length to syllable cut The discussion challenges traditional theoretical assumptions about quantity change in Germanic languages to argue for a new account whereby gemination lenition and vowel lengthening are interrelated

Germanic and its Dialects ,1977-12-31 Germanists have long lamented the lack of comprehensive bibliographies of past and present literature particularly in the areas of Frisian Old English Old High German and most notably Old Saxon The

compilers of this bibliography deem it crucial to fill this lacuna before embarking on two further volumes project to complete this series I Texts and II Maps and Commentaries NOTE FROM THE PUBLISHER The publication of the two further volumes I Texts II Maps and Commentaries has been canceled *Dutch* Frans Hinskens, Johan Taeldeman, 2013-11-27 This handbook aims at a state of the art overview of both earlier and recent research into older newer and emerging non standard varieties dialects regiolects sociolects ethnolects substandard varieties transplanted varieties and daughter languages mixed languages creoles of Dutch The discussion concerns the theoretical embedding potential interdisciplinary connections and the methodology of the studies at issue keeping in mind comparability and generalizability of the findings It presents general concepts and approaches in the broad domain of Dutch variation linguistics and the main developments in different varieties of Dutch and their offspring abroad The book counts 47 chapters written by over 40 scholars from the Netherlands Flanders Germany England South Africa Australia the USA and Jamaica

Segmental Structure and Tone Wolfgang Kehrein, Björn Köhnlein, Paul Boersma, Marc Oostendorp, 2017-12-18 This volume seeks to reevaluate the nature of tone segment interactions in phonology The contributions address among other things the following basic questions what tone segment interactions exist and how can the facts be incorporated into phonological theory Are interactions between tones and vowel quality really universally absent What types of tone consonant interactions do we find across languages What is the relation between diachrony and synchrony in relevant processes The contributions discuss data from various types of languages where tonal information plays a lexically distinctive role from pure tone languages to so called tone accent systems where the occurrence of contrastive tonal melodies is restricted to stressed syllables The volume has an empirical emphasis on Franconian dialects in the Netherlands Belgium and Germany but also discusses languages as diverse as Slovenian Livonian Fuzhou Chinese and Xhosa

Word Prosodic Systems in the Languages of Europe Harry van der Hulst, 2008-08-22 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics

Dutch Contributions to the Ninth International Congress of Slavists, 2023-12-21 Studies in Slavic and General Linguistics is mainly devoted to the field of descriptive linguistics Although the series is primarily intended to be a means of publication for linguists from the Low Countries the editors are pleased to accept contributions by linguists from abroad

Tonal Change and Neutralization Haruo Kubozono, Mikio Giriko, 2018-03-05 No book has ever been published on tonal change and neutralization two closely related topics in tonal phonology This will be the first book to be devoted to both The articles collected in this volume analyze a wide range of data concerning tonal change and neutralization including post lexical neutralization which represents a new topic in prosodic research The volume as a whole covers a wide range of tone and pitch accent languages in Asia Africa and Europe with a

main focus on Asian languages dialects many of which are endangered now In addition to presenting novel data and analyses about individual languages it provides typological perspectives on tonal change and neutralization This volume will serve as an indispensable source of data and analyses for a wide range of linguists interested in phonetics phonology prosody historical linguistics language typology endangered languages Japanese linguistics and Chinese linguistics **Early Germanic Languages in Contact** John Ole Askedal,Hans Frede Nielsen,2015-06-15 This volume contains revised and in some cases extended versions of twelve of the fourteen lectures read at the conference on Early Germanic Languages in Contact held at the University of Southern Denmark in Odense on 22 23 August 2013 with a paper and a review article added at the end on themes pertaining to the aim and scope of the symposium All papers cover central aspects of the early contact between Germanic and some of its Indo European and non Indo European linguistic neighbours and in certain cases aspects involving internal Germanic language contact *Sandhi Phenomena in the Languages of Europe* Henning Andersen,2011-06-24 No detailed description available for Sandhi Phenomena in the Languages of Europe **Leuven contributions in linguistics and philology**,1975 *The Year's Work in Modern Language Studies* ,1931 **Akten Des XIV.
