Ferlinghetti** Ronald K. L. Collins, David M. Skover, 2019-03-24 Lawrence Ferlinghetti's name does not appear in any First Amendment treatise or casebook And yet when the best selling poet and proprietor of City Lights Books was indicted under California law for publishing and selling Allen Ginsberg's poem Howl Ferlinghetti buttressed the tradition of dissident expression and ended an era when minds were still closed candid literature still taboo and when selling banned books was considered a crime The People v Ferlinghetti is the story of a rebellious poet a revolutionary poem an intrepid book publisher and a bookseller unintimidated by federal or local officials There is much color in that story the bizarre twists of the trial the swagger of the lead lawyer the savvy of the young ACLU lawyer and the surprise verdict of the Sunday school teacher who presided as judge With a novelist's flair noted free speech authorities Ronald K L Collins and David Skover tell the true story of an American maverick who refused to play it safe and who in the process gave staying power to freedom of the press in America The People v Ferlinghetti will be of interest to anyone interested the history of free speech in America and the history of the Beat poets Photographer's Market, 1994 Michael Willins, 1993-09 The most comprehensive book of its kind this edition features 2 500 up to date listings of US and international buyers of freelance photos Each listing contains the contact name and address submission requirements photo specifications pay rates and tips on how to break in Each Wild Idea Geoffrey Batchen, 2002-02-22 Essays on photography and the medium's history and evolving identity In Each Wild Idea Geoffrey Batchen explores a wide range of photographic subjects from the timing of the medium's invention to the various implications of cyberculture Along the way he reflects on contemporary art photography the role of the vernacular in photography's history and the Australianness of Australian photography The essays all focus on a consideration of specific photographs from a humble combination of baby photos and bronzed booties to a masterwork by Alfred Stieglitz Although Batchen views each photograph within the context of broader social and political forces he also engages its own distinctive formal attributes In short he sees photography as something that is simultaneously material and cultural In an effort to evoke the lived experience of history he frequently relies on sheer description as the mode of analysis insisting that we look right at

rather than beyond the photograph being discussed A constant theme throughout the book is the question of photography's past present and future identity **New York Magazine**, 1995-03-27 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea Negative/Positive Geoffrey Batchen, 2020-12-21 As its title suggests Negative Positive begins with the negative a foundational element of analog photography that is nonetheless usually ignored and uses this to tell a representative rather than comprehensive history of the medium The fact that a photograph is split between negative and positive manifestations means that its identity is always simultaneously divided and multiplied The interaction of these two components was often spread out over time and space and could involve more than one person giving photography the capacity to produce multiple copies of a given image and for that image to have many different looks sizes and makers This book traces these complications for canonical images by such figures as William Henry Fox Talbot Kusakabe Kimbei Dorothea Lange Man Ray Seydou Keita Richard Avedon and Andreas Gursky But it also considers a number of related issues crucial to any understanding of photography from the business practices of professional photographers to the repetition of pose and setting that is so central to certain familiar photographic genres Ranging from the daguerreotype to the digital image the end result is a kind of little history of photography partial and episodic but no less significant a rendition of the photographic experience for being so This book represents a summation of Batchen's work to date making it be essential reading for students and scholars of photography and for all those interested in the history of the medium

Deaccessioning and Its Discontents Martin Gammon, 2018-07-24 The first history of the deaccession of objects from museum collections that defends deaccession as an essential component of museum practice Museums often stir controversy when they deaccession works formally remove objects from permanent collections with some critics accusing them of betraying civic virtue and the public trust In fact Martin Gammon argues in *Deaccessioning and Its Discontents* deaccession has been an essential component of the museum experiment for centuries Gammon offers the first critical history of deaccessioning by museums from the seventeenth to the twenty first century and exposes the hyperbolic extremes of deaccession denial the assumption that

deaccession is always wrong and deaccession apology when museums justify deaccession by finding some fault in the object as symptoms of the same misunderstanding of the role of deaccessions in proper museum practice He chronicles a series of deaccession events in Britain and the United States that range from the disastrous to the beneficial and proposes a typology of principles to guide future deaccessions Gammon describes the liquidation of the British Royal Collections after Charles I's execution when masterworks were used as barter to pay the king's unpaid bills as establishing a precedent for future deaccessions He recounts among other episodes U S Civil War veterans who tried to reclaim their severed limbs from museum displays the 1972 Hoving affair when the Metropolitan Museum of Art sold a number of works to pay for a Velázquez portrait and Brandeis University's decision later reversed to close its Rose Art Museum and sell its entire collection of contemporary art An appendix provides the first extensive listing of notable deaccessions since the seventeenth century Gammon ultimately argues that vibrant museums must evolve embracing change loss and reinvention
