

Anthropological Perspective

- A broad perspective that helps us understand the diversity of the human experience within the context of biological and behavioral continuity with other species.
- By learning about cultures other than our own, we can avoid an **ethnocentric** view of other cultures.
- By recognizing that we have similarities with other animals, we may recognize that they have a place in nature just as we do.

Boldsen, Jes S. Gaard, Holle Greil, Sally Horrocks, David Smith, Philip T. Hoffman, Joerg Baten, John Komlos Conclusion Die mit umfangreichen Literaturverweisen bereicherten Beiträge bieten überraschend konkrete Einblicke in die Sozialstruktur der verschiedensten Bevölkerungsgruppen und ihre Lebensbedingungen Das Historisch Politische Buch The Concept of Race in Natural and Social Science E. Nathaniel Gates, 2014-05-01 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student

will have an excellent grasp of the basics of the subject **Centralizing Fieldwork** Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology

Anthropological Perspectives on Aging Britteny M. Howell, Ryan P. Harrod, 2023-02-21 Taking a holistic approach to the study of aging this volume uses biological archaeological medical and cultural perspectives to explore how older adults have functioned in societies around the globe and throughout human history *Cultural Anthropology* Emily A. Schultz, Margaret Rauch, Robert H. Lavenda, 1995 This introduction to the major subfields of anthropology explores the interplay of biological and cultural forces shaping human nature human society and human history Cultural creativity and human agency are seen as part of the human biological evolutionary heritage This biocultural approach is evident throughout the text in the authors consistent examination of both interpretive and materialist factors **Human Adaptability: Future Trends And Lessons From The Past, Perspective In Human Biology, Vol 3** Charles Oxnard, Leonard

Freedman, 1998-01-22 This volume takes its subtitle from the theme of the ASHB meeting for 1996 Human Adaptability Future Trends and Lessons from the Past The first paper is the annual conference lecture Human Evolution Today Which Way Next delivered by Professor Maciej Hennenberg the newly appointed Wood Jones Professor at the University of Adelaide This is followed by the transcripts of two papers resulting from a debate on Species and Human Evolution also from the meeting The first is Species Concept in Palaeoanthropology by Colin Groves and the second The Problem of Species in Hominid Evolution by Maciej Hennenberg There are also a series of individual papers Two of these are shorter integrative pieces Philosophical Problems in Palaeoanthropology by Darren Curnoe and A Biological Basis for Generative Learning in Science by Lynette Schavieren and Mark Cosgrove These are followed in turn by two proffered papers on specific problems Patterns of Morphological Discrimination in the Human Talus a Consideration of the Case for Negative Function by Robert Kidd and Charles Oxnard and The Specific Status of a new Siwalik Sivapithecine Specimen by David Cameron Rajeev Patnaik and Michelle Stevens The final contribution is one of the longer integrative papers which has characterised each of the prior volumes The Interface of Function Genes Development and Evolution Insights from Primate Morphometrics by Charles

Oxnard *Bioarchaeology* Clark Spencer Larsen, 2015-03-30 Now including numerous full colour figures this updated and revised edition of Larsen's classic text provides a comprehensive overview of the fundamentals of bioarchaeology. Reflecting the enormous advances made in the field over the past twenty years, the author examines how this discipline has matured and evolved in fundamental ways. Jargon free and richly illustrated, the text is accompanied by copious case studies and references to underscore the central role that human remains play in the interpretation of life events and conditions of past and modern cultures. From the origins and spread of infectious disease to the consequences of decisions made by humans with regard to the kinds of foods produced and their nutritional health and behavioral outcomes. With local, regional and global perspectives, this up-to-date text provides a solid foundation for all those working in the field.
