**Novels as Pedagogy in Social Studies** Angelo J. Letizia,2020-04-27 This book examines the study of citizenship by means of reading and creating graphic novels and comics in the social studies classroom The author argues that utilizing graphic novels in the classroom not only helps to teach important concepts skills and dispositions of the social studies but can also empower students with the means to grapple with the complexities of our current times From the primary school classroom through high school and beyond graphic novels provide a rich platform to explore a diverse array of issues such as history critical geography gender race and ethnicity disability leadership feminism sexual identity philosophy and social justice issues as well as provide a multidisciplinary lens for discourse on citizenship Cultivating multimodal literacy skills through graphic novels allows students and instructors to conceive of and practice citizenship in new unforeseen ways in an era where truth is in question To drive this point forward the author includes examples of both his own and his students work along with exercises to be used in social studies classrooms **The Electronic Republic?** Phillip J. *A Study of the Secondary School History Curriculum in Chile from Colonial Times to the Present* Carmen Gloria Zúñiga, Tom O'Donoghue, Simon Clarke, 2015-02-03

The focus of this book is on the secondary school history curriculum in Chile from colonial times to the present. By way of background, attention is paid to the development of the history curriculum in the three countries which have most influenced educational developments in Chile: namely England, the United States of America, and Spain. The academic literature on the history curriculum throughout the English speaking and Latin speaking world, especially on the purposes attached to history as a school subject and the variety of pedagogical approaches prescribed, is also considered. The results of a project that addressed the following interrelated research questions are then outlined: What is the historical background to the current secondary school history curriculum in Chile? What are the current developments of the secondary school history curriculum in Chile? What are the issues of concern for secondary school history teachers in Chile? At various times, the teaching of the subject ranged from being in the great tradition approach, emphasizing teacher-centred activities and repetition of content knowledge, to being in the new history tradition, emphasizing the promotion of active learning, student-centred activities, and the encouragement of the historical method of enquiry. The analysis also details current issues of concern for teachers regarding the implementation of the current curriculum framework for secondary school history. The book concludes with a consideration of implications for practice in areas pertaining to curriculum development, teaching and learning, management and administration, teacher preparation, and professional development practices in Chile.
