 whatever is written without effort is in general read without pleasure and the unexamined word is not worth reading
 However even the most thoughtfully written text is unlikely to be described as a good read This book is not an exhaustive
 review Rather it is an uneven selection of examples whose interplay across disciplines hopefully illuminates what drives the
 practice of forest production wood processing and consumer preferences The choice of material is arbitrary reflecting
 personal biases It is a summary of material presented to students at the NZ School of Forestry at the University of
 Canterbury This book takes liberties with other peoples ideas weaving them into fresh themes that are at best a work in
 progress The philosopher Francis Bacon argued that science is a debate in progress not a body of knowledge and also truth
 emerges more readily from error than confusion We have taken the position that it is preferable to venture a reasoned
 opinion and be proved wrong than to waffle so don't swallow every sentence doubt everything The reader's task is to unravel
 the conceits of generalizing and the risks of particularizing Metal Finishing ,1914 *The Metal Industry* ,1909 Includes
