 Computer Content Analysis* Mark D. West, 2001-04-30 In recent years computer content analysis has undergone something of
 a renaissance Inexpensive and powerful desktop computers mean that computer analysis of texts is available to most
 researchers The availability of software to do analyses however is not always linked to clear theoretical and methodological
 understandings This volume seeks to deal with this concern by providing from scholars in a variety of disciplines perspectives
 upon the theoretical and methodological issues which arise when conducting content analysis via computer Although it is not
 always obvious computer content analysis is a method which inevitably calls for theoretical assumptions Those theoretical
 assumptions in turn drive methodological considerations and method in turn determines the form of the practice of computer
 content analysis This volume includes ten articles by well known scholars utilizing computer content analysis A variety of
 methodological theoretical and practical issues are here addressed presenting unique methods and perspectives for the

consideration of computer content analysis Intended for an audience of graduate students scholars and in field practitioners Theory Method and Practice of Computer Content Analysis will serve as an invaluable resource of ideas and practices for those interested in using computers to analyze textual material *Research Methods for Everyday Life* Scott W.
