Practical Theology In Action 2nd Edition:

Practical Theology and Qualitative Research - second edition John Swinton, Harriet Mowat, 2016-10-30 Practical Theology is a growing discipline in its own right and the latest thinking in practical theology of how to use theological learning in practical situations is fully explored in this new edition of an established textbook. The authors examine methodologies of the social sciences and questions how they can enable the task of theological reflection. They examine the relationship between qualitative and quantitative methods and highlight the significance of both for the task of practical theology. They also take the reader through the actual process of developing and carrying out a research project using the author's own research as case study examples. Previous case studies include the rise in spirituality, the decline in church attendance, evidence-based medicine compared to needs-led assessments, the growth in chaplaincy and how it is understood as separate from parish ministry. In this second edition, case studies and all bibliographies have been updated, plus a new chapter has been added.

Using the Bible in Practical Theology Zoë Bennett, 2016-02-11 Exploring how the Bible may be appropriately used in practical and public theology, this book looks at types of modern practical theology with specific emphasis on the use of the Bible. Bennett juxtaposes the diversity of modern practical theology with the work of leading nineteenth-century public theologian John Ruskin and then assesses the contribution of this analysis to some modern issues of public importance in which the Bible is used. The final chapter offers a framework for a biblically informed critical practical theology which draws on the writer's experience and invites the readers to engage their own.

Chaplaincy and Practical Theology Stephen B. Roberts, Sarah Dunlop, 2022-02-23 Chaplaincy has emerged as a highly significant form of ministry in the twenty-first century and chaplaincy studies is growing as a field of study that learns from the experience and work of chaplains in their diverse sectors. Chaplains from a range of different faith traditions pioneer ministry within the secular yet religiously plural contexts of contemporary life with often considerable creativity and skill, generating a wealth of insight to be gleaned for understanding the place of faith in the modern world. One of the disciplines that has been most concerned with gleaning those insights and developing the field of chaplaincy studies is practical theology. The journal *Practical Theology* (formerly *Contact*) is a key repository for much of the wisdom gained through such study and this book draws on the archive of the journal to trace the development of chaplaincy research and provide a resource for those seeking to join the conversation about the nature and significance of chaplaincy as a form of ministry and mission today. Drawing on different sectors of chaplaincy and different methodological approaches, this book is invaluable for those engaged in chaplaincy work, those seeking to research that work, and for anyone interested in contemporary pioneering forms of ministry.

Evangelicals Engaging in Practical Theology Helen Morris, Helen Cameron, 2022-03-30 This book aims to introduce a distinctively evangelical voice to the discipline of practical theology Evangelicals have sometimes seen practical theology as primarily a liberal project This collection however actively engages with practical theology from an evangelical perspective both through discussion of the substantive issues and by providing examples of practical theology done by evangelicals in the classroom the church and beyond This volume brings together established and emerging voices to debate the growing role which practical theology is playing in evangelical and Pentecostal circles Chapters begin by addressing methodological concerns before moving into areas of practice Additionally there are four short papers from students who make use of practical theology to reflect upon their own practice Issues of authority and normativity are tackled head on in a way that will inform the debate both within and beyond evangelicalism This book will therefore be of keen interest to scholars of practical evangelical and Pentecostal theology

Qualitative Research, Second Edition Tim Sensing, 2022-07-05 The second edition of Qualitative Research responds to the growing need in Doctor of Ministry programs for a textbook that guides students in Participatory Action Research prospectus and dissertation that reflect the recent trends in the discipline of practical theology. The Standards of Accreditation for the Commission on Accrediting of the Association of Theological Schools states: The Doctor of Ministry is an advanced professionally oriented degree that prepares people more deeply for religious leadership in congregations and other settings. Standard 5.3 states: The Doctor of Ministry degree has clearly articulated student learning outcomes that are consistent with the school's mission and resources and address the following four areas: a) advanced theological integration that helps graduates effectively engage their cultural context with theological acumen and critical thinking; b) in-depth contextual competency that gives graduates the ability to identify, frame, and respond to crucial ministry issues; c) leadership capacity that equips graduates to enhance their effectiveness as ministry leaders in their chosen settings; and d) personal and spiritual maturity that enables graduates to reinvigorate and deepen their vocational calling. In accordance with the standards, Qualitative Research guides students through appropriate research methods to satisfy the objectives of the degree in order to enhance ministerial leadership for the transformation of communities of practice.

Faithful Science Alistair J. McKitterick, 2022-03-17 This thesis studies the impact of teaching intelligent design to evangelical students. Science is often presented as a reason why some find sharing their faith difficult in a secular culture; teaching the science of intelligent design enables Christians to initiate conversations and overcome obstacles with those whose worldview is more Darwinian and materialist. The professional doctoral research employs both action research and practical theology. Lin Norton's pedagogical action research provides the structure for the qualitative research and thematic analysis, showing that students find learning about intelligent design empowering for evangelism. Richard Osmer's model of practical theology enables an interdisciplinary reflection on how intelligent design

challenges Western secular culture Intelligent design is seen as the most integrative of all the different ways of relating science and theology Theologically teaching intelligent design is like teaching a modern parable to contemporary society and just like the Gospel parables some respond with faith and some reject it Evangelical students find learning about it both liberating and empowering in their ability to share their faith more confidently with others especially in schools and youth groups

The Adolescent Journey Amy E. Jacober, 2011-04-07 Adolescence is a time of individuation children are slowly finding their identity as adults separate from their parents and other adult influences Such a critical time of psychological development is complicated by cultural influences that shape their expectations of adulthood and color how they relate to other people and even God The task of the youth pastor becomes to help adolescents navigate this often treacherous journey helping young people reconcile their experience of childhood to the reality of their impending adulthood and rooting and establishing them in a faith that can sustain them through their adult journey as well Drawing on the insights of sociology and psychology Jacober reveals youth ministry to be an act of practical theology and helps youth pastors find their footing as they guide young people through adolescence

Disclosing Church Clare Watkins, 2020-03-05 From 2006 to 2011 researchers at Heythrop College and the Oxford Centre for ecclesiology and Practical Theology OxCEPT Ripon College Cuddesdon worked on a theological and action research project Action Research Church and Society ARCS 2010 saw the publication of Talking About God in Practice Theological Action research and Practical Theology SCM which presented in an accessible way the work of ARCS and its developing methodology This turned out to be a landmark study in the praxis of Anglican and Catholic ecclesiology in the UK showing how theology in these differing contexts interacted with the way in which clergy and congregations lived out their religious convictions This book is a direct follow up to that significant work authored by one of the original researchers providing a systematic analysis of the impact of the theological action research methodology and its implications for a contemporary ecclesiology The book presents an ecclesiology generated from church practice drawing on scholarship in the field as well as the results of the theological action research undertaken It achieves this by including real scenarios alongside the academic discourse This combination allows the author to tease out the complex relationship between the theory and the reality of church Addressing the need for a more developed theological and methodological account of the ARCS project this is a book that will be of interest to scholars interested not only Western lived religion but ecclesiology and theology more generally too
