Practice Of Cultural Analysis Exposing Interdisciplinary Interpretation:

The Practice of Cultural Analysis Mieke Bal, 2022 This volume presents an interdisciplinary approach to humanistic scholarship one that can be situated somewhere between cultural studies and cultural history while being more specific than either Cultural analysis as a critical practice is based on a keen awareness of the critic's situatedness in the present the social and cultural present from which we look and look back at objects that are already of the past objects that we take to define our present culture Thus it can be summarized by the phrase cultural memory in the present Far from being indifferent to history cultural analysis is devoted to understanding the past as part of the present as what we have around us The essays gathered here represent the current state of an emerging field of inquiry At the same time they suggest to the larger academic world what cultural analysis can and should do or be as an interdisciplinary practice The challenge for this volume is to counter the common assumption that interdisciplinarity makes the object of inquiry vague and the methodology muddled In meeting that challenge it offers close textual and visual readings of subjects ranging from Vermeer to abstract expressionism from the Book of Ruth to Djuna Barnes's *Nightwood* from the history of cinema to popular culture in Zaire The essays in Part I Don't Look Now Visual Memory in the Present explore in detailed case studies centered on the theme of visibility or looking the tricky consequences of the uncertainties regarding history that the presentness of the past entails Part II Close ups and Mirrors The Return of Close Reading with a Difference demonstrates and advocates listening to the object without the New Critical caveat that claims the text speaks for itself Instead the essays create the kind of dialogical situation that is a major characteristic of cultural analysis the text does not speak for itself but it does speak back The essays in Part III Method Matters Reflections on the Identity of Cultural Analysis do not propose any directions for use or authoritative statements on how to do cultural analysis Arranged in pairs of opposites the essays represent the kind of fruitful tension that stimulates debate Though no definite answers are proposed and conflicting views are left in conflict the essays stimulate a self reflection on cultural analysis its practices and its understandings

The Practice of Cultural Analysis

Mieke Bal, Bryan Gonzales, 1999 Cultural analysis is devoted to understanding the past as part of the present as what we have around us The essays gathered here represent the current state of an emerging field of enquiry

Concentric Pedagogy Mary Kelly, 2024-01-25 Selected and introduced by Juli Carson this book presents a collection of essential essays interviews and never before published archival materials that trace the development of the teaching of major artist and thinker Mary Kelly from 1980 2017 As an artist and a theorist Kelly is known for her foundational contributions to Feminism and Conceptual Art she is also revered for her innovative pedagogy which has influenced countless artists writers and teachers within the international art community Her description of a feminist practice of concentric pedagogy centred on the artwork rather than the mastery of the teacher radically changed teaching practice in art studios Detailing Kelly's innovative pedagogical program the essays are split into three sections The Method which focuses on Kelly's renowned method of

elements Afterword theses on the use of narratology for cultural analysis **Sublime Historical Experience** F. R. Ankersmit, 2005 Why are we interested in history at all Why do we feel the need to distinguish between past and present This book investigates how the notion of sublime historical experience complicates and challenges existing conceptions of language truth and knowledge **The Replaceability Paradigm** Niall Martin, Ilios Willemars, 2024-06-04 The trope of humans being replaced by AI is one of the most familiar examples of the rhetoric of replaceability Not only have questions about what is unique and what is replaceable gained momentum in digital culture but notions of fungibility have emerged in many other contexts as well such as ecology management theory and more sinisterly in racist and conspiracist thinking This volume argues that there is a replaceability paradigm at work throughout the culture of modernity from the European Renaissance through Freudian psychoanalysis Chinese science fiction and postcolonial theory all the way to neural network programs such as Google's DeepDream This collection will be of interest to anybody engaged with the conceptual architecture of contemporary culture whether through film literature or new digital media **Worlds in Words** Mateusz Borowski, Malgorzata Sugiera, 2010-04-16 The collection of essays Worlds in Words Storytelling in Contemporary Theatre takes up the currently widely debated issue of the revival of various techniques of storytelling in contemporary theatre practice and playwriting This topic is set in a larger context of the crisis of traditional theatrical and dramatic representation in the 20th century and sets the discussion of new storytelling techniques within the framework of cultural and post colonial studies as well as the recent theories of performativity These new performative modes of theatre practice in the recent decades have exerted a strong impact on the mainstream staging techniques as well as on the form and use of texts written for the theatre today By focusing on the basic relationship between the text the stage and the audience the papers collected in this volume trace these fundamental changes taking place nowadays which testify to the major shifts in the understanding of the very concept of theatre its place among other arts and media as well as in culture especially in the marginalized cultures and diasporas The authors of the papers collected here undertake a comprehensive analysis of the phenomenon of storytelling and adopt an interdisciplinary approach which will make it possible to give account of the diverse cultural and socio political grounding of the contemporary theatrical and dramatic techniques **The Far Reaches** Michael D Gubser, 2023-05-25 By restoring morality to phenomenology and phenomenology to East European politics Gubser has rewritten the intellectual history of the twentieth century Samuel Moyn author of Liberalism Against Itself When future historians chronicle the twentieth century they will see phenomenology as one of the preeminent social and ethical philosophies of its age The phenomenological movement not only produced systematic reflection on common moral concerns such as distinguishing right from wrong and explaining the status of values it also called on philosophy to renew European societies facing crisis an aim that inspired thinkers in interwar Europe as well as later communist bloc dissidents Despite this legacy phenomenology continues to be largely discounted as esoteric and solipsistic the last gasp of a Cartesian dream to

base knowledge on the isolated rational mind Intellectual histories tend to cite Husserl's epistemological influence on philosophies like existentialism and deconstruction without considering his social or ethical imprint And while a few recent scholars have begun to note phenomenology's wider ethical resonance especially in French social thought its image as stubbornly academic continues to hold sway The Far Reaches challenges that image by tracing the first history of phenomenological ethics and social thought in Central Europe from its founders Franz Brentano and Edmund Husserl through its reception in East Central Europe by dissident thinkers such as Jan Patočka Karol Wojtyła Pope John Paul II and Václav Havel In his fascinating and elegantly written book Michael Gubser leads us away from intellectual history's traditional stomping grounds in France Germany and the United States and focuses on the understudied Eastern bloc Edward Baring Modern Intellectual History The Specter of Capital Joseph Vogl, 2014-10-22 In his brilliant interdisciplinary analysis of the global financial crisis Joseph Vogl aims to demystify finance capitalism with its bewildering array of new instruments by tracing the historical stages through which the financial market achieved its current autonomy Classical and neoclassical economic theorists have played a decisive role here Ignoring early warnings about the instability of speculative finance markets they have persisted in their belief in the inherent equilibrium of the market describing even major crises as mere aberrations or adjustments and rationalizing dubious financial practices that escalate risk while seeking to manage it The market knows best this is a secular version of Adam Smith's faith in the market's invisible hand his economic interpretation of eighteenth century providentialist theodicy which subsequently hardened into an oikodicy an unquestioning belief in the self-regulating beneficence of market forces Vogl shows that financial theory assisted by mathematical modeling and digital technology itself operates as a hidden hand pushing economic reality into unknown territory He challenges economic theorists to move beyond the neoclassical paradigm to discern the true contours of the current epoch of financial convulsions

Faith as an Option Hans Joas, 2014-09-03 Many people these days regard religion as outdated and are unable to understand how believers can intellectually justify their faith Nonbelievers have long assumed that progress in technology and the sciences renders religion irrelevant Believers in contrast see religion as vital to society's spiritual and moral well-being But does modernization lead to secularization Does secularization lead to moral decay Sociologist Hans Joas argues that these two supposed certainties have kept scholars from serious contemporary debate and that people must put these old arguments aside in order for debate to move forward The emergence of a secular option does not mean that religion must decline but that even believers must now define their faith as one option among many In this book Joas spells out some of the consequences of the abandonment of conventional assumptions for contemporary religion and develops an alternative to the cliché of an inevitable conflict between Christianity and modernity Arguing that secularization comes in waves and stressing the increasing contingency of our worlds he calls upon faith to articulate contemporary experiences Churches and religious communities must take into account religious diversity but the modern world is not a threat to Christianity or to faith in

general On the contrary Joas says modernity and faith can be mutually enriching Lessons from a Materialist Thinker
Samantha Frost,2008 Carefully elaborating Hobbes materialist ontology Samantha Frost challenges both our implicit
Cartesian assumptions about the self the commonplace Hobbes that so readily figures in our political imagination *Image,*
Icon, Economy Marie-José Mondzain,2005 This book argues that the extraordinary force of the image in contemporary life
the contemporary imaginary can be traced back to the Byzantine iconoclastic controversy of the eighth and ninth centuries
