Practice Of Economic Growth:

The Practice of Economic Growth Keng Swee Goh, 2004 The importance of fast economic growth in developing countries has been an undeniable fact since the early 1970s Today its significance is even greater as these emerging centres are eagerly sought as bases for economic expansion by developed nations Singapore in its rise from a struggling colony to its present status as an economic success offers a glimpse of the factors that contribute to the growth of a thriving economy Widely acknowledged as the architect of Singapore's economic growth Dr Goh Keng Swee describes Singapore's experience which confirms some of the conventional wisdom of growth theory but refutes much of the rest Examining the social and economic lessons learnt by Singapore Dr Goh notes that the role of the government and non economic factors are pivotal to the development of a secure confident nation Speaking not as a theoretician but as a practitioner Dr Goh assesses how far theories conform with practice in the real world This book is a collection of Dr Goh's essays during his years as Singapore's Minister of Defence Besides his speeches on defence Dr Goh explores sociological and economic issues extensively These essays illustrate how the experienced practitioner by venturing beyond the well trodden paths and overcoming seemingly intractable problems had helped Singapore achieve the benefits of economic growth and thereby a true national unity This re issue is part of the Singapore Economics History Collection and features a new Foreword by Professor Chua Beng Huat of National University of Singapore
