College Learning Strategies Carolyn H. Hopper, 2006-05-30 Practicing College Learning Strategies presents practical applications of study skills in a clear and concise workbook style format. The text is known for providing ample exercises throughout each chapter reflecting the author's belief that students can be taught how to learn more effectively through hands-on reinforcement. Now produced in 2 color, the Fourth Edition has a sleek design and is organized around a new learning strategies framework. This framework includes chapter opening objectives that preview the materials students are about to learn. The author presents the latest research on the brain helping students to understand how they learn how to capitalize on their strengths and how to adjust for their weaknesses. Structured activities and exercises guide students in the reflection process to make the information personal and useful and to provide practice opportunities. The straightforward explanations and structured activities that model the learning process make this text especially useful for first-time college students or returning adults. Survival Kit in the first pages of the text provides a quick overview of the most basic skills that students need to be productive from day one. New to the Fourth Edition is a Checklist for Evaluating your Classroom Savvy. Two new critical thinking features Making it Concrete and Making Connections help students analyze and synthesize what they've learned and apply new concepts or skills to other courses or situations. Measurable Learning Outcomes have been added to the opening of each chapter and can act as the basis for selecting content, classroom activities and assessments such as chapter or unit tests and final projects or exams. Case Study: What's Your Advice asks students to synthesize and evaluate what they learn in the form of advice to others. Virtual Field Trips are integrated technology boxes; these point to online assignments that explore college social skills such as managing finances, campus safety and health and well-being issues. Brain Bytes show students how memory strategies work and provide tools to maximize retention for improved performance, school achievement and personal success.

Practicing College Learning Strategies Carolyn H. Hopper, 2004 **Practicing College Learning Strategies Fourth Edition Plus Houghton Mifflin Assessment and Portfolio Builder Two Point 0 Passkey Plus Master Student Two Thousand Six Two Thousand Seven Success Planner** Carolyn H.

Plus Portfolio Assessment Cd Carolyn H. Hopper, 2005-06-01 **Teach Students How to Learn** Sandra Yancy

McGuire, 2023-07-03 Co-published with NISOD. Miriam, a freshman Calculus student at Louisiana State University, made 37% on her first exam but 83% and 93% on the next two. Matt, a first-year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third. These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade, Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student

learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success This book encapsulates the model and ideas she has developed in the past fifteen years ideas that are being adopted by an increasing number of faculty with considerable effect The methods she proposes do not require restructuring courses or an inordinate amount of time to teach They can often be accomplished in a single session transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement First she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth Next she presents a specific study system that can quickly empower students to maximize their learning Then she addresses the importance of dealing with emotion attitudes and motivation by suggesting ways to change students mindsets about ability and by providing a range of strategies to boost motivation and learning finally she offers guidance to faculty on partnering with campus learning centers She pays particular attention to academically unprepared students noting that the strategies she offers for this particular population are equally beneficial for all students While stressing that there are many ways to teach effectively and that readers can be flexible in picking and choosing among the strategies she presents Sandra McGuire offers the reader a step by step process for delivering the key messages of the book to students in as little as 50 minutes Free online supplements provide three slide sets and a sample video lecture This book is written primarily for faculty but will be equally useful for TAs tutors and learning center professionals For readers with no background in education or cognitive psychology the book avoids jargon and esoteric theory

Motivation and Learning Strategies for College Success Myron H. Dembo, 2013-01-11 This popular text combines theory research and applications to teach college students how to become more self directed learners The focus is on relevant information and features designed to help students to identify the components of academic learning that contribute to high achievement to master and practice effective learning and study strategies and then to complete self management studies whereby they are taught a process for improving their academic behavior A framework organized around six components related to academic success motivation methods of learning time management control of the physical and social environment and monitoring performance makes it easy for students to understand what they need to do to become more successful in the classroom
