Figuerola,2014-06-28 Linguistics is a discipline with ever expanding boundaries and interests Despite the narrow definition of linguistics which dominates academia sub fields continue to flourish and ways of doing linguistics continue to expand As ways to do linguistics increase and as approaches to linguistics accumulate over time it becomes increasingly necessary for students of linguistics to have ways of understanding and comparing developments in linguistics Sociolinguistic Metatheory is a book which explains foundational developments in linguistics by taking the past three decades of developments in sociolinguistics and relating them to contemporaneous developments in received linguistics Sociolinguistic Metatheory takes the reader through the basic philosophical questions which drive linguistic research It looks in detail at three models of sociolinguistics Dell Hymes and the Ethnography of Communication William Labov and Sociolinguistic Realism and John Gumperz and Interactional Sociolinguistics and focuses on such questions as Where is language located How is an utterance based approach to linguistics different from a sentence based approach How do metatheoretical paradigm assumptions such as realism or relativism affect the development of linguistic theory What interesting developments in linguistic theory and analysis have sociolinguistics provided

*Indeterminacy of International Law?* Severin Meier,2021-11-30 The most important in determinacy theses in international law since the 1920s are scrutinised in this book As Severin Meier demonstrates the extent of legal determinacy depends neither on some linguistic essence found in the text nor on theories that allegedly stand above practice Instead the indeterminacy of law is shown to arise purely from practice This reconceptualisation of a key discussion in legal philosophy provides a new perspective on the frame of meaning of legal norms

*The Semiotic Sphere* Thomas A. Sebeok,Jean Umiker-Sebeok,2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse

academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the advent ure of the search itself
