Pragmatic Bioethics Basic Bioethics:

Pragmatic Bioethics Glenn McGee, 2016 **Pragmatist Ethics for a Technological Culture** F.W. Jozef Keulartz, Michiel Korthals, M. Schermer, T.E. Swierstra, 2012-12-06 Our technological culture has an extremely dynamic character old ways of reproducing ourselves managing nature and keeping animals are continually replaced by new ones norms and values with respect to our bodies food production health care and environmental protection are regularly being put up for discussion This constantly confronts us with new moral problems and dilemmas In discussion with other approaches this book argues that pragmatism with its strong emphasis on the interaction between technology and values gives us both procedural help and stresses the importance of living and cooperating together in tackling these problems and dilemmas The issues in this book include the interaction of technology and ethics the status of pragmatism the concept of practice and discourse ethics and deliberative democracy It has an interactive design with original contributions alternating with critical comments The book is of interest for students scholars and policymakers in the fields of bioethics animal ethics environmental ethics pragmatist philosophy and science and technology studies *Contemporary Issues in Clinical Bioethics - Medical, Ethical and Legal Perspectives* Kamil Hakan Dogan, Peter Clark, 2024-05-15 This book examines challenges in bioethics from medical ethical legal and industrial perspectives A critical exchange of ideas from professionals in interdisciplinary fields allows all people to learn and benefit from their far reaching insights gained through personal and professional experiences in medicine and research Examining these complex issues ranging from brain computer interfaces to disabilities in health care to the determination of death to safe injection sites presents viable paradigms for all healthcare professionals who are being confronted with these issues today and in the future The more we face these challenges directly examine them critically analyze them thoroughly and debate them enthusiastically the more knowledge will be gained and hopefully more lives will be saved *Basic Bioethics* Eric Racine, 2010 **Contemporary Debates in Bioethics** Arthur L. Caplan, Robert Arp, 2013-09-10 *Contemporary Debates in Bioethics* features a timely collection of highly readable debate style arguments contributed by many of today's top bioethics scholars focusing on core bioethical concerns of the twenty first century Written in an engaging debate style format for accessibility to non specialists Features general introductions to each topic that precede scholarly debates Presents the latest cutting edge thoughts on relevant bioethics ideas arguments and debates The Blackwell Guide to Medical Ethics Rosamond Rhodes, Leslie P. Francis, Anita Silvers, 2008-04-15 The Blackwell Guide to Medical Ethics is a guide to the complex literature written on the increasingly dense topic of ethics in relation to the new technologies of medicine Examines the key ethical issues and debates which have resulted from the rapid advances in biomedical technology Brings together the leading scholars from a wide range of disciplines including philosophy medicine theology and law to discuss these issues Tackles such topics as ending life patient choice selling body parts resourcing and confidentiality Organized with a coherent structure that differentiates between the decisions of individuals

and those of social policy **The Philosophy and Practice of Medicine and Bioethics** Barbara Maier, Warren A. Shibles, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one's thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc **Making Modern Medical Ethics** Robert Baker, 2024-02-20 The little known stories of the people responsible for what we know today as modern medical ethics In Making Modern Medical Ethics Robert Baker tells the counter history of the birth of bioethics bringing to the fore the stories of the dissenters and whistleblowers who challenged the establishment Drawing on his earlier work on moral revolutions and the history of medical ethics Robert Baker traces the history of modern medical ethics and its bioethical turn to the moral insurrections incited by the many unsung dissenters and whistleblowers African American civil rights leaders Jewish Americans harboring Holocaust memories feminists women and Anglo American physicians and healthcare professionals who were veterans of the World Wars the Cold War and the Vietnam War The standard narrative for bioethics typically emphasizes the morally disruptive medical technologies of the latter part of the twentieth century such as the dialysis machine the electroencephalograph and the ventilator as they created the need to reconsider traditional notions of medical ethics Baker however tells a fresh narrative one that has historically been neglected e g the story of the medical veterans who founded an international medical organization to rescue medicine and biomedical research from the scandal of Nazi medicine and also reveals the penalties that moral change agents paid e g the stubborn bureaucrat who was demoted for her insistence on requiring and enforcing research subjects informed consent Analyzing major statements of modern medical ethics from the 1946 1947 Nuremberg Doctors Trials and Nuremberg Code to A Patient's Bill of Rights Making Modern Medical Ethics is a winning history of just how respect and autonomy for patients and research subjects came to be codified **The Perfect Baby** Glenn McGee, 2000 The Perfect Baby is the most popular

introduction to ethical issues in genetics This new edition has been updated to discuss and debate advances in high tech reproduction genetic testing gene therapy human cloning and stem cell research It includes a new epilogue by cloning pioneer Ian Wilmut and Glenn McGee **The New Testament and Bioethics** R. Dennis Macaleer,2014-01-01 Beauchamp and Childress's Principles of Biomedical Ethics is a well accepted approach to contemporary bioethics Those principles are based on what Beauchamp and Childress call the common morality This book employs New Testament theological themes to enhance the meaning of those principles of bioethics The primary New Testament text for this study is the twin commands from Jesus to love God and love one's neighbor The three theological themes developed from this study the image of God the covenant and the pursuit of healing are deeply embedded in the New Testament and in the ministry of Jesus Three contemporary bioethics principles are used for this dissertation based on The Belmont Report They are the principles of respect for persons justice and beneficence In each case the theological themes are shown to enhance the meaning of these bioethics principles Each of the three principles as understood through the three theological themes is applied to a current bioethics issue to demonstrate the efficacy of this approach The three current issues addressed are the withdrawal or withholding of life sustaining treatment the distribution of health care in the United States and the use of palliative care

Mental Patient Abigail Gosselin,2022-12-13 A philosopher who has experienced psychosis argues that recovery requires regaining agency and autonomy within a therapeutic relationship based on mutual trust In *Mental Patient* philosopher Abigail Gosselin uses her personal experiences with psychosis and the process of recovery to explore often overlooked psychiatric ethics For many people who struggle with psychosis she argues psychosis impairs agency and autonomy She shows how clinicians can help psychiatric patients regain agency and autonomy through a positive therapeutic relationship characterized by mutual trust Patients she says need to take an active role in regaining their agency and autonomy specifically by giving testimony constructing a narrative of their experience to instill meaning making choices about treatment and deciding to show up and participate in life activities Gosselin examines how psychotic experience is medicalized and describes what it is like to be a patient receiving mental health care treatment In addition to mutual trust she says a productive therapeutic relationship requires the clinician's empathetic understanding of the patient's experiences and perspective She also explains why psychotic patients sometimes feel ambivalent about recovery and struggle to stay committed to it The psychiatric ethics issues she examines include the development of epistemic agency and credibility epistemic justice the use of coercion therapeutic alliance the significance of choice and the taking of responsibility *Mental Patient* differs from straightforward memoirs of psychiatric illness in that it analyses philosophic issues related to psychosis and recovery and it differs from other books on psychiatric ethics in that its analyses are drawn from the author's first person experiences as a mental patient The Theory of Deliberative Wisdom Eric Racine,2025-05-13 From a leading ethicist a workable and inspiring model of ethics showing not only why ethics matters but also how it can be used to improve human

welfare Humanity faces a multitude of profound challenges at present technological advances environmental changes rising inequality and deep social and political pluralism These transformations raise moral questions questions about how we view ourselves and how we ought to engage with the world in the pursuit of human flourishing In *The Theory of Deliberative Wisdom* Eric Racine puts forward an original interdisciplinary ethics theory that offers both an explanation of the workings of human morality and a model for deliberation based imaginative processes to tackle moral problems Drawing from a wide array of disciplines such as philosophy psychology sociology political science neuroscience and economics this book offers an engaging account of situated moral agency and of ethical life as the pursuit of human flourishing Moral experience Racine explains is accounted for in the form of situational units morally problematic situations These units are in turn theorized as actionable and participatory building blocks of moral existence mapping to mechanisms of episodic memory and to the construction of personal identity Such explanations pave the way for an understanding of the social and psychological mechanisms of the awareness and neglect of morally problematic situations as well as of the imaginative ethical deliberation needed to respond to these situations Deliberative wisdom is explained as an engaged and ongoing learning process about human flourishing

Ebola's Message Nicholas G. Evans, Tara C. Smith, Maimuna S. Majumder, 2024-11-26 Interdisciplinary perspectives on the science politics and ethics of the 2013 2015 Ebola virus disease outbreak The 2013 2015 outbreak of the Ebola virus disease EVD was a public health disaster 28 575 infections and 11 313 deaths as of October 2015 devastating the countries of Guinea Liberia and Sierra Leone a slow and mismanaged international response and sensationalistic media coverage seized upon by politicians to justify wrongheaded policy And yet there were also promising developments that may improve future responses to infectious disease epidemics the UN Security Council's first involvement in a public health event a series of promising clinical treatments and vaccines for EVD and recognition of the need for a global public health system to deal with epidemics that cross national borders This volume offers a range of perspectives on these and other lessons learned with essays on the science politics and ethics of the Ebola outbreak The contributors discuss topics including the virology and management of EVD in both rich and poor nations the spread of the disease with an essay by a leader of Médecins Sans Frontières racist perceptions of West Africa mainstream and social media responses to Ebola and the ethical issue of whether to run clinical trials of experimental treatments during an outbreak Contributors Christian L. Caplan, Hila Rimon-Greenspan, 2013-09-20 This volume discusses some of the most critical ethical issues in mental health care today including the moral dimensions of addiction patient autonomy and compulsory treatment privacy and confidentiality and the

definition of mental illness itself **Reframing Rights** Sheila Jasanoff, 2011-07-22 Investigations into the interplay of biological and legal conceptions of life from government policies on cloning to DNA profiling by law enforcement Legal texts have been with us since the dawn of human history Beginning in 1953 life too became textual The discovery of the structure of DNA made it possible to represent the basic matter of life with permutations and combinations of four letters of the alphabet A T C and G Since then the biological and legal conceptions of life have been in constant mutually constitutive interplay the former focusing on life s definition the latter on life s entitlements Reframing Rights argues that this period of transformative change in law and the life sciences should be considered bioconstitutional Reframing Rights explores the evolving relationship of biology biotechnology and law through a series of national and cross national case studies Sheila Jasanoff maps out the conceptual territory in a substantive editorial introduction after which the contributors offer snapshots of developments at the frontiers of biotechnology and the law Chapters examine such topics as national cloning and xenotransplant policies the politics of stem cell research in Britain Germany and Italy DNA profiling and DNA databases in criminal law clinical trials in India and the United States the GM crop controversy in Britain and precautionary policymaking in the European Union These cases demonstrate changes of constitutional significance in the relations among human bodies selves science and the state **Ethics in Everyday Places** Tom Koch, 2022-11-01 An exploration of moral stress distress and injuries inherent in modern society through the maps that pervade academic and public communications worlds In Ethics in Everyday Places ethicist and geographer Tom Koch considers what happens when as he puts it you do everything right but know you ve done something wrong The resulting moral stress and injury he argues are pervasive in modern Western society Koch makes his argument from the ground up from the perspective of average persons and through a revealing series of maps in which issues of ethics and morality are embedded The book begins with a general grounding in both moral stress and mapping as a means of investigation The author then examines the ethical dilemmas of mapmakers and others in the popular media and the sciences including graphic artists journalists researchers and social scientists Koch expands from the particular to the general from mapmaker and journalist to the readers of maps and news He explores the moral stress and injury in educational funding poverty and income inequality Why aren t we angry that one in eight fellow citizens lives in federally certified poverty transportation modeling seen in the iconic map of the London transit system and the hidden realities of exclusion and U S graft organ transplantation This uniquely interdisciplinary work rewrites our understanding of the nature of moral stress distress and injury and ethics in modern life Written accessibly and engagingly it transforms how we think of ethics personal and professional amid the often conflicting moral injunctions across modern society Copublished with Esri Press **Vaccination Ethics and Policy** Jason L. Schwartz, Arthur L. Caplan, 2021-08-24 A comprehensive overview of important and contested issues in vaccination ethics and policy by experts from history science policy law and ethics Vaccination has long been a familiar highly effective form of medicine and a triumph of public health Because

vaccination is both an individual medical intervention and a central component of public health efforts it raises a distinct set of legal and ethical issues from debates over their risks and benefits to the use of government vaccination requirements and makes vaccine policymaking uniquely challenging This volume examines the full range of ethical and policy issues related to the development and use of vaccines in the United States and around the world Forty essays articles and reports by experts in the field look at all aspects of the vaccine life cycle After an overview of vaccine history they consider research and development regulation and safety vaccination promotion and requirements pandemics and bioterrorism and the frontier of vaccination The texts cover such topics as vaccine safety controversies the ethics of vaccine trials vaccine injury compensation vaccine refusal and the risks of vaccine preventable diseases equitable access to vaccines in emergencies lessons from the eradication of smallpox and possible future vaccines against cancer malaria and Ebola The volume intentionally includes texts that take opposing viewpoints offering readers a range of arguments The book will be an essential reference for professionals scholars and students Contributors Jeffrey P Baker Seth Berkley Luciana Borio Arthur L Caplan R Alta Charo Dave A Chokshi James Colgrove Katherine M Cook Louis Z Cooper Edward Cox Douglas S Diekema Ezekiel J Emanuel Claudia I Emerson Geoffrey Evans Ruth R Faden Chris Feudtner David P Fidler Fiona Godlee D A Henderson Alan R Hinman Peter Hotez Robert M Jacobson Aaron S Kesselheim Heidi J Larson Robert J Levine Donald W Light Adel Mahmoud Edgar K Marcuse Howard Markel Michelle M Mello Paul A Offit Saad B Omer Walter A Orenstein Gregory A Poland Lance E Rodewald Daniel A Salmon Anne Schuchat Jason L Schwartz Peter A Singer Michael Specter Alexandra Minna Stern Jeremy Sugarman Thomas R Talbot Robert Temple Stephen P Teret Alan Wertheimer Tadataka Yamada **Truly Human**

Enhancement Nicholas Agar, 2023-09-19 A nuanced discussion of human enhancement that argues for enhancement that does not significantly exceed what is currently possible for human beings The transformative potential of genetic and cybernetic technologies to enhance human capabilities is most often either rejected on moral and prudential grounds or hailed as the future salvation of humanity In this book Nicholas Agar offers a more nuanced view making a case for moderate human enhancement improvements to attributes and abilities that do not significantly exceed what is currently possible for human beings He argues against radical human enhancement or improvements that greatly exceed current human capabilities Agar explores notions of transformative change and motives for human enhancement distinguishes between the instrumental and intrinsic value of enhancements argues that too much enhancement undermines human identity considers the possibility of cognitively enhanced scientists and argues against radical life extension Making the case for moderate enhancement Agar argues that many objections to enhancement are better understood as directed at the degree of enhancement rather than enhancement itself Moderate human enhancement meets the requirement of truly human enhancement By radically enhancing human cognitive capabilities by contrast we may inadvertently create beings post persons with moral status higher than that of persons If we create beings more entitled to benefits and protections against

harms than persons Agar writes this will be bad news for the unenhanced Moderate human enhancement offers a more appealing vision of the future and of our relationship to technology **New Methuselahs** John K. Davis, 2024-03-19 An examination of the ethical issues raised by the possibility of human life extension including its desirability unequal access and the threat of overpopulation Life extension slowing or halting human aging is now being taken seriously by many scientists Although no techniques to slow human aging yet exist researchers have successfully slowed aging in yeast mice and fruit flies and have determined that humans share aging related genes with these species In New Methuselahs John Davis offers a philosophical discussion of the ethical issues raised by the possibility of human life extension Why consider these issues now before human life extension is a reality Davis points out that even today we are making policy and funding decisions about human life extension research that have ethical implications With New Methuselahs he provides a comprehensive guide to these issues offering policy recommendations and a qualified defense of life extension After an overview of the ethics and science of life extension Davis considers such issues as the desirability of extended life whether refusing extended life is a form of suicide the Malthusian threat of overpopulation equal access to life extension and life extension and the right against harm In the end Davis sides neither with those who argue that there are no moral objections to life enhancement nor with those who argue that the moral objections are so strong that we should never develop it Davis argues that life extension is on balance a good thing and that we should fund life extension research aggressively and he proposes a feasible and just policy for preventing an overpopulation crisis
