Pragmatic Perspectives on Language and

Linguistics Volume I Iwona Witczak-Plisiecka, 2009-12-14 Speech Actions in Theory and Applied Studies the first of the two volumes of Pragmatic Perspectives on Language and Linguistics brings together twenty essays which critically examine linguistic action and explore ways in which it can be accounted for The articles presented in this collection are all focused on doing things with words but in most cases do not subscribe to speech act theory in the tradition of John L Austin and John R Searle The linking thread through the volume is not a theoretical commitment to one of the speech act theoretical models but the authors perspective on language as a means of action how linguistic expressions become effective in context and how this effectiveness can be explicated The papers represent different pragmatic approaches and varied levels of expertise in the research area among the authors there are eminent linguists and philosophers well established researchers and young beginners The texts include purely theoretical discussions case studies reports on research in experimental pragmatics contrastive and corpus studies and considerations of the pedagogical implications of pragmatic reflection on the nature of language Without purporting to cover all relevant topics this variety reflects the complex character of linguistic pragmatics and integrates studies which cross cut other research fields The book is divided in three parts The seven papers gathered in the first part of the volume Speech Action in Theory are concentrated on theoretical issues pertaining to speech as a type of action with emphasis both on linguistic forms e g fragments and theoretical commitments and particular theories explanatory power Part two Case Studies Experimental Pragmatics includes reports on research into irony processing in Polish and in English as a second language intercultural differences in interactions broadcast in the media power relations in doctor patient interaction and metaphors in media discourse at the time of crisis Part three Pragmatics Grammar and Language Pedagogy contains five essays which explore both more formal pragmatics through analyses of grammatical forms and the interface which the analysis of these forms share with context grounded research and the practical implications of pragmatic knowledge in language didactics This collection is supplemented by the essays gathered in volume two entitled Pragmatics of Semantically Restricted Domains

Cognitive Pragmatics Hans-Jörg Schmid, 2012-08-31 Speakers tend to compose their utterances in such a way that the message they want to get across is hardly ever fully encoded by the meanings of the words and the grammar they use Instead speakers rely

on hearers adding conceptual and emotive content while interpreting the contextually appropriate meanings and intentions behind utterances This insight which is of course particularly relevant in all kinds of indirect figurative or humorous talk lies at the heart of the linguistic discipline of pragmatics If pragmatics is the study of meaning in context then cognitive pragmatics can be broadly defined as encompassing the study of the cognitive principles and processes involved in the construal of meaning in context While it would seem only natural that pragmatics as such should have addressed such cognitive issues anyway it has mainly been due to the historical rooting of this discipline in the philosophy of language that psychological aspects have not been in the pragmatic limelight to date Being part of the 9 volume series Handbooks of Pragmatics this volume is the first to systematically survey this terrain from a wide range of perspectives It collects state of the art contributions by leading experts from the fields of pragmatics psycholinguistics cognitive linguistics clinical linguistics and historical linguistics The volume is divided into four parts which tackle the following questions Part I The cognitive principles of pragmatic competence What are the general cognitive principles underlying pragmatic competence i e the skill to arrive at context dependent meanings of utterances What are the cognitive underpinnings of language users ability to compute or infer intended meanings in the role of hearers and to give hints as to how to decode intended meanings in the role of speakers Part II The psychology of pragmatics What are the actual cognitive processes taking place during online construal of meaning in context on the basis of encoded messages How is pragmatic competence acquired in childhood What are the types sources and effects of pragmatic disorders i e impairments of pragmatic competence Part III The construal of non explicit and non literal meaning in context What are the cognitive principles and processes involved in the construal of meanings of non explicit and indirect utterances How do we process figurative meanings humour and gestures Part IV The emergence of linguistic structures from meaning in context What are the repercussions of the repeated construal of context dependent meanings on linguistic structures and the linguistic system How does the system change under the influence of the construal of meanings in social situations Reduced series price print available degruyter de rhenus com
