Prairie Fire:

Prairie Fire Julie Courtwright, 2023-01-13 Prairie fires have always been a spectacular and dangerous part of the Great Plains. Nineteenth century settlers sometimes lost their lives to uncontrolled blazes and today ranchers such as those in the Flint Hills of Kansas manage the grasslands through controlled burning. Even small fires overlooked by history changed lives: destroyed someone's property, threatened someone's safety, or simply made someone's breath catch because of their astounding beauty. Julie Courtwright, who was born and raised in the tallgrass prairie of Butler County, Kansas, knows prairie fires well. In this first comprehensive environmental history of her subject, Courtwright vividly recounts how fire setting, fighting it, watching it, fearing it, has bound Plains people to each other and to the prairies themselves for centuries. She traces the history of both natural and intentional fires from Native American practices to the current use of controlled burns as an effective land management tool, along the way sharing the personal accounts of people whose lives have been touched by fire. The book ranges from Texas to the Dakotas and from the 1500s to modern times. It tells how Native Americans learned how to replicate the effects of natural lightning fires, thus maintaining the prairie ecosystem. Native peoples fired the prairie to aid in the hunt and also as a weapon in war. White settlers learned from them that burns renewed the grasslands for grazing but, as more towns developed, settlers began to suppress fires, now viewed as a threat to their property and safety. Fire suppression had as dramatic an environmental impact as fire application. Suppression allowed the growth of water-wasting trees and caused a thick growth of old grass to build up over time, creating a dangerous environment for accidental fires. Courtwright calls on a wide range of sources: diary entries and oral histories from survivors, colorful newspaper accounts, military weather records, and artifacts of popular culture from Gene Autry stories to country song lyrics to *Little House on the Prairie*. Through this multiplicity of voices, she shows us how prairie fires have always been a significant part of the Great Plains experience and how each fire that burned across the prairies over hundreds of years is part of someone's life story. By unfolding these personal narratives while looking at the bigger environmental picture, Courtwright blends poetic prose with careful scholarship to fashion a thoughtful paean to prairie fire. It will enlighten environmental and Western historians and renew a sense of wonder in the people of the Plains.

The Birds of Nebraska Paul Johnsgard, 2018-07-06 This annotated list of the birds of Nebraska grew gradually out of research associated with my writing of *The Birds of the Great Plains: Breeding Species and Their Distribution* (Johnsgard 1979a). It expands and updates an earlier version that was published in 2013 by the University of Nebraska-Lincoln Libraries Digital Commons. Zea Books (Johnsgard 2013a) has been updated and modified in its current revision to conform with the most recent 2017 major revision of the American Ornithologists Society's Checklist of North American Birds (Chesser et al. 2017). It has also been modified in its current revision to conform very closely to the most recent Official List of the Birds of Nebraska by the Nebraska Ornithologists Union (Gubanyi 1997) and later supplements in the Nebraska Bird Review to 84:138-150. The NOU's official state list of birds (461 species as of 2017) is based

on actual specimen evidence or some other convincing basis of each species proven occurrence in the state That list includes 337 regular species 29 casual species 90 accidental species and 5 extinct or extirpated species In this edition I have classified 368 of the 461 species of Nebraska birds as ranging in relative frequency of occurrence as abundant to rare There are also 61 species considered to be of accidental occurrence having been reliably reported in Nebraska no more than five times 20 that are considered extremely rare or very rare if reported from six to 25 times There are also three extinct four extirpated and five unsuccessfully introduced species Thirteen hypothetical species of dubious origin or identification are mentioned parenthetically The text includes more than 123 000 words nearly 200 literature references and 19 pages of drawings and maps **History of Tama County, Iowa** Samuel D.
