

3.2 BASIC PRINCIPLES OF RADIATION PROTECTION

3.2.1 The ICRP system of radiological protection

Types of Exposure Situations

- **Planned exposure situations**
- **Emergency exposure situations**
- **Existing exposure situations**

The use of radiation in Nuclear Medicine is a **planned exposure situation**.

Misadministration, spills or other incidents/accidents can give rise to potential exposure, which however falls under the planned exposure situation as their occurrence is considered in the granting of the exposure authorization.

Principles For Intervention For Protection Of The Public In A Radiological Emergency:

ICRP Publication 63 ICRP,1993-05-31 The International Commission on Radiological Protection first set out general principles for planning intervention after an accident over short times and generally near to accidents in ICRP Publication 40 1984 This document updates and extends the earlier publication and includes quantitative guidance on intervention levels This guidance covers the introduction of such protective actions over very short times their introduction and continuation following periodic review over protracted timescales lasting perhaps years and intervention over larger areas All accidents are different as are the approaches of national organizations having responsibility for response to an accident It is intended that these general guidelines should be translated into appropriate emergency response plans by competent national authorities

Principles for Intervention for Protection of the Public in a Radiological Emergency International Committee on Radiological Protection,1993 *Emergency Planning for Nuclear Power Plants* Paul Elkmann,2017-01-06 This book provides a history of emergency planning with respect to nuclear power plant accidents from the 1950 s to the 2000 s It gives an overview of essential concepts that a working emergency planner should know including brief overviews of the health physics and plant engineering that applies to emergency planning Each chapter covers topics unique to radiological planning that distinguish it from planning for natural disasters Some of the topics include processes that damage fuel reactor source terms basic dispersion theory protective measures for the public and emergency worker environmental surveys and the essential elements of a drill and exercise program *Emergency Planning for Nuclear Power Plants* is not intended as a guide to meeting regulatory requirements but provides an understanding of the essential concepts and language of radiological planning so the planner can apply those concepts to their particular situation

Guidelines for the Management of Thyroid Cancer Royal College of Physicians of London,2007 *Handbook of Nuclear Chemistry* Attila Vértes,Sándor Nagy,Zoltán Klencsár,Rezso György Lovas, Frank Rösch,2010-12-10 This revised and extended 6 volume handbook set is the most comprehensive and voluminous reference work of its kind in the field of nuclear chemistry The Handbook set covers all of the chemical aspects of nuclear science starting from the physical basics and including such diverse areas as the chemistry of transactinides and exotic atoms as well as radioactive waste management and radiopharmaceutical chemistry relevant to nuclear medicine The nuclear methods of the investigation of chemical structure also receive ample space and attention The international team of authors consists of scores of world renowned experts nuclear chemists radiopharmaceutical chemists and physicists from Europe USA and Asia The Handbook set is an invaluable reference for nuclear scientists biologists chemists physicists physicians practicing nuclear medicine graduate students and teachers virtually all who are involved in the chemical and radiopharmaceutical aspects of nuclear science The Handbook set also provides further reading via the rich selection of references

Principles of International Environmental Law Philippe Sands,Jacqueline Peel,Adriana Fabra,Ruth MacKenzie,2018-03 The new edition of this essential text offers a

comprehensive critical and future thinking commentary on international environmental law Chernobyl - What Have We Learned? Yasuo Onishi, Oleg V. Voitsekhovich, Mark J. Zheleznyak, 2007-06-03 Twenty years ago on April 26 1986 Unit 4 of the Chernobyl Nuclear Power Plant experienced a nuclear reactor accident and released six times more radionuclides into the atmosphere than the Hiroshima atomic bomb The accident significantly damaged the environment and is expected to result in as many as 4000 deaths due to leukemia and other cancers The cause of the accident was specific to a particular Soviet built reactor but the environmental and human consequences are applicable to Western nuclear plant accidents Contrary to public perception the former Soviet Union did what they could to protect the public from the Chernobyl accident within funding restrictions They involved the highest level of political and scientific leaders and even conducted public surveys to identify concerns and fears However the secrecy with which the information was treated caused mistrust of the Chernobyl assessment and contributed to the widespread mental health problems associated with the accident Some Chernobyl countermeasures were successful but many were ineffective or made things worse We hope that the details presented in this book may be useful for Western countries in preparing for possible accidents or potential terrorist attacks with nuclear or chemical agents The assessment of the Chernobyl accident its impacts and its control measures and remediation has been published widely in many Western nations but much of the research is still known only in Ukraine and Russia **Nuclear Law** Stephen Tromans, 2010-03-12 This book is a practical guide to the international EC and UK law applying to the various uses of nuclear energy and radioactive substances The first edition was produced in 1997 and given the renaissance of interest in nuclear power in the UK and worldwide this new updated and much expanded edition is timely It will cover the law relating to the permitting and operation of nuclear power stations the decommissioning and clean up of former nuclear facilities radiological protection the management of radioactive waste and spent fuel liability and insurance and the security and transport of radioactive materials Readers will find a clear framework explaining the development and application of nuclear law and how domestic law is based on and influenced by international and European requirements and by its historical context In the commercial context the chapters dealing specifically with new build and with decommissioning will be vital reading **Radiological Risk Assessment and Environmental Analysis** John E. Till, Helen A. Grogan, 2008-07-10 A comprehensive book that explains methods used for estimating risk to people exposed to radioactive materials released to the environment by nuclear facilities or in an emergency such as a nuclear terrorist event **Radiation Risk Estimates in Normal and Emergency Situations** Arrigo A. Cigna, Marco Durante, 2007-05-22 This book follows up a 2005 International Conference in Yerevan Armenia dedicated to the 70th anniversary of the 1935 publication of the green paper by N W Timofeeff Ressonovsky K Zimmer and M Delbruck entitled On the origin of gene mutations and gene structure This was the starting point of the NATO Advanced Research Workshop whose proceedings are published in this book with papers dealing directly with Timofeeff Ressonovsky's life and the green pamphlet **Food Toxicology** Ashish Sachan, Suzanne

Hendrich,2017-12-01 This volume covers a selection of important research in the multifaceted field of food toxicology With more than seven billion people in the world today and counting advances in food toxicology have a direct bearing on food safety issues that are of concern to all humanity for the foreseeable future Massive globalization industrialization and commercialization have affected every aspect of food production the food supply chain and food consumption This informative volume offers the global perspectives of scientists in important areas related to biomarkers and nanosensors in food toxicology toxicology of nanomaterials chemicals in sanitation and packaging additives mycotoxins endocrine disruptors radionuclides toxic metals and waste burning residues in food The book also emphasizes regulatory toxicology and includes an interesting example case study The challenge of sustainable and safe food for everyone needs a multidisciplinary and multi sectorial approach from related industries and governments alike Food chemical safety is an underappreciated aspect of consumer safety and this volume seeks to help fill that gap by providing informative research for food scientists and researchers and many others

Potential Radiation Exposure in Military Operations Institute of Medicine,Committee on Battlefield Radiation Exposure Criteria,1999-06-24 In 1996 NATO issued guidance for the exposure of military personnel to radiation doses different from occupational dose levels but not high enough to cause acute health effects and in doing so set policy in a new arena Scientific and technological developments now permit small groups or individuals to use or threaten to use destructive devices nuclear biological chemical and cyber based weaponry among others targeted anywhere in the world Political developments such as the loss of political balance once afforded by competing superpowers have increased the focus on regional and subregional disputes What doctrine should guide decisionmaking regarding the potential exposure of troops to radiation in this changed theater of military operations In 1995 the Office of the U S Army Surgeon General asked the Medical Follow up Agency of the Institute of Medicine to provide advice This report is the final product of the Committee on Battlefield Radiation Exposure Criteria convened for that purpose In its 1997 interim report Evaluation of Radiation Exposure Guidance for Military Operations the committee addressed the technical aspects of the NATO directive In this final report the committee reiterates that discussion and places it in an ethical context

Health Effects of Low Radiation 2003 ,2002-10 This CD rom contains 28 papers presented to the BNES international conference on the health effects of low level radiation This conference is the fourth in the highly successful series and its aim is to present the fundamental radiobiological and dosimetric information relevant to understanding the current debate on the health effects of exposure to ionizing radiations at low doses and dose rates It is also intended to provide a forum for discussion of the latest developments in this area and their relevance to the radiological protection of human health and the environment

Integrated Risk and Vulnerability Management Assisted by Decision Support Systems A.V. Gheorghe,2008-09-30 Introduction This book includes terms of reference and offers an augmented volume of relevant work initiated within the comprehensive concept of Knowledge Management and Risk Governance The latter stood for the initial title of an ad hoc meeting held in Ascona Switzerland

organized by the Technological Risk Management Unit of the Joint Research Centre of the European Commission JRC and the KOVERS Centre of Excellence in Risk and Safety Sciences of the Swiss Federal Institute of Technology ETH Zurich

Background Risk governance in addition to the continuous interest of researchers has recently attracted the attention of policy makers and the media and the concern of the public New and emerging risks in various fields and a number of risk related issues increased the public interest and prompted for a new framework in dealing with risks The Conference on Science and Governance organized by the European Commission in October 2000 is one of the international forums addressing this issue Other recent events such as the establishment of the International Risk Governance Council outline the importance of the governance concept in relation to that of risk management see www.irgc.org At the same time noticeable progress has been made in Information Technologies and Decision Support passing from the process of information

PREFACE xvi to the process of knowledge In this context new tools and methods became available whose application in risk management may be beneficial
