between performance art and experimental theatre and providing an ecological paradigm for performance art experimental theatre and live art

*What Is Contemporary Art?* Terry Smith, 2012-08-10 Who gets to say what counts as contemporary art Artists critics curators gallerists auctioneers collectors or the public Revealing how all of these groups have shaped today's multifaceted definition Terry Smith brilliantly shows that an historical approach offers the best answer to the question What is Contemporary Art Smith argues that the most recognizable kind is characterized by a return to mainstream modernism in the work of such artists as Richard Serra and Gerhard Richter as well as the retro sensationalism of figures like Damien Hirst and Takashi Murakami At the same time Smith reveals postcolonial artists are engaged in a different kind of practice one that builds on local concerns and tackles questions of identity history and globalization A younger generation embodies yet a third approach to contemporaneity by investigating time place mediation and ethics through small scale closely connective art making Inviting readers into these diverse yet overlapping art worlds Smith offers a behind the scenes introduction to the institutions the personalities the biennials and of course the works that together are defining the contemporary The resulting map of where art is now illuminates not only where it has been but also where it is going

*Latin American Art at The Museum of Modern Art* Miriam M. Basilio Gaztambide, 2025-06-13 This book sheds light on an as yet unstudied aspect of The Museum of Modern Art's MoMA preeminent role in establishing the definition of the problematic term Latin American art in the United States from the 1930s to the present through its collection displays In examining the shifting categorization of Latin American works according to stylistic and geographic taxonomies we gain a greater understanding of the organization of the Museum's collections as a whole during the 1940s and 1950s This book is

the first to document these institutional precedents crucial for the understanding of the articulation of a Modernist canon and its contested legacy today The MoMA is widely recognized as the preeminent institution that defined 20th century art through its collection shaping our understandings of the history of art with its hierarchies and exclusions as they sediment over time MoMA's holdings of art from Latin America shed light on a key period when the stylistic categories that have since come to be accepted by many today as the Modernist canon developed MoMA's collection displays suggest ways in which artists from areas of the world formerly excluded can be incorporated within today's increasingly global museums MoMA's approach may be compared to initiatives adopted by several museums since the 2000s creating geographically defined curatorial positions as a way to redress gaps in collecting art from Latin America and other areas of the world In this book author Miriam M Basilio Gaztambide offers a closer study of the history of collection displays as a means to understand canon formation in modern art museums This work will be of interest to those researching Latin American American modern and contemporary art and curatorial and museum studies
