historical *A History of Ancient Coinage, 700-300 B.C.* Percy Gardner, 1918 *Impact of the Environment on Human Migration in Eurasia* E. M. Scott, Andrey Yu. Alekseev, Ganna Zaitseva, 2006-02-25 This book is a collection of the articles presented at the NATO Advanced Research Workshop ARW 979859 held in St Petersburg from the 15-18 November 2003 in the Hermitage Museum. The title of the workshop was 'The impact of the environment on Human Migration in Eurasia'. More than 40 scientists from Russia, Ukraine, Kazakhstan, Poland, Germany, Switzerland, The Netherlands, United Kingdom, Belgium, Finland, Lithuania and Latvia took part. The themes of the workshop focused on the origin, development, interactions and migrations of prehistoric and ancient populations, specifically the Scythians in Eurasia and their relationships with the environment of the time. The discussion of these questions necessitated the participation of specialists from a wide range of academic fields. Beyond any doubt, the environment played an important role in the life of ancient nomadic populations, forming the basis of their economies and influencing various aspects of their mode of life. In this respect, the collaboration of specialists in the Humanities and Science is essential for the solution of scientific questions concerning these peoples. Over the past few years, a large amount of new proxy data related to environmental changes during the Pleistocene and the Holocene and their impact on human life has become available. Our discussion was predominantly limited to environmental changes related to the Holocene. In this period of about 10,000 years, the main focus was on the 1st millennium BC. *The Cambridge Ancient History* John Boardman, I. E. S. Edwards, E. Sollberger, N. G. L. Hammond, 1992-01-16 Volume III Part II carries on the history of the Near East from the close of Volume III Part I and covers roughly the same chronological period as Volume III Part III. During this period, the dominant powers in the East were Assyria and then Babylonia. Each established an extensive empire which was based on Mesopotamia and each in turn fell largely through internal strife. Assyrian might was reflected in the imposing palaces, libraries and sculptures of the Assyrian kings. Babylonian culture was outstanding in literature, mathematics and astronomy and the great buildings of Nebuchadnezzar II surpassed even those of the Assyrian kings. Israel and Judah suffered at the hands of both imperial powers, Jerusalem being destroyed and part of the population deported to Babylon and Egypt was weakened by an Assyrian invasion. The Phoenicians found a new outlet in colonising and founded Carthage. A number of small, vigorous kingdoms developed in Asia Minor while from the north and north-east the Scythian nomadic tribes pressed down upon Turkey and the Danube valley but found their match in the Thracian tribes which held south-eastern Europe and parts of western Turkey. The burials of the chieftains of both peoples were remarkable for the great wealth of offerings. *History of the Caucasus* Christoph Baumer, 2021-08-26 Magnificent and wondrous. The Spectator. Rich and illuminating. Literary Review. Phenomenally accurate. History Today. Stunning. The Morning Star. Sweeping. The New European. A wonderful book. Current World Archaeology. In a class of its own. The Caspian Post. A landscape of high mountains and narrow valleys stretching from the Black to the Caspian Seas. The Caucasus region has been home to human populations for nearly 2 million years. In this richly illustrated 2-volume series, historian and explorer Christoph Baumer tells

the story of the region's history through to the present day. It is a story of encounters between many different peoples from Scythians, Turkic and Mongol peoples of the East to Greeks and Romans from the West, from Indo-European tribes from the West as well as the East and to Arabs and Iranians from the South. It is a story of rival claims by Empires and nations and of how the region has become home to more than 50 languages that can be heard within its borders to this very day. This first volume charts the period from the emergence of the earliest human populations in the region, the first known human populations outside Africa, to the Seljuk conquests of 1050CE. Along the way, the book charts the development of Neolithic, Iron and Bronze Age cultures, the first recognizable Caucasian state and the arrival of a succession of the great transnational Empires from the Greeks, the Romans and the Armenians to competing Christian and Muslim conquerors. **The History of the Caucasus Volume 1** also includes more than 200 full-colour images and maps bringing the changing cultures of these lands vividly to life.

**Journal of Medieval Military History** Beñat Elortza Larrea, 2020-06-19. The *Journal of Medieval Military History* continues to consolidate its now assured position as the leading academic vehicle for scholarly publication in the field of medieval warfare. *Medieval Warfare: The Tao of Deception* Ralph D. Sawyer, 2007-02-13. The history of China is a history of warfare. Wars have caused dynasties to collapse, fractured the thin facade of national unity and brought decades of alien occupation. But throughout Chinese history its warfare has been guided by principles different from those that governed Europe. Chinese strategists followed the concept first articulated by Sun Tzu in *The Art of War*, of *qi ch'i* or unorthodox warfare. The concept of *qi* involves creating tactical imbalances in order to achieve victory against even vastly superior forces. Ralph D. Sawyer, translator of *The Art of War* and one of America's preeminent experts on Chinese military tactics, here offers a comprehensive guide to the ancient practice of unorthodox warfare. He describes among many other tactics how Chinese generals have used false rumors to exploit opposing generals' distrust of their subordinates, dressed thousands of women as soldiers to create the illusion of an elite attack force and sent word of a false surrender to lure enemy troops away from a vital escape route. *The Tao of Deception* is the book that military tacticians and military historians will turn to as the definitive guide to a new yet ancient way of thinking about strategy.

**Community in Urban-Rural Systems** Gregory M. Fulkerson, 2022-09-14. Gregory M. Fulkerson offers a complete portrait of what communities are, how they work and how they are embedded in urban-rural systems at regional, national and global scales. environmental demography political economy culture social interaction the built environment and community connections His focus on urban rural systems ensures that communities are understood as nodes within a network overcoming the tendency to view them as self contained Each chapter in *Community in Urban Rural Systems Theory Planning and Development* offers a blend of classical and contemporary theories and concludes with relevant planning considerations An additional chapter on community development provides strategies for translating planning considerations into action The conclusion offers insights into long term principles of community sustainability and justice
