This latest edition includes new discussions of food quality and new presentations of information around biotechnology and genetically modified foods. Also new in this edition is a discussion of the Food Safety Modernization Act (FSMA), a comparison chart for Halal and Kosher foods, and introductions to newly popular products like pea starch and the various plant-based meat analogues that are now available commercially and for household use. Each chapter ends with a glossary of terms, references, and a bibliography. The popular *Culinary Alert* features are scattered throughout the text and provide suggestions for the reader to easily apply the information in the text to his or her cooking application.
