Seapower A Guide For The Twenty First Century:

Seapower Geoffrey Till, 2013 This revised updated and expanded edition of Geoffrey Till's acclaimed textbook provides an invaluable guide for anyone interested in the changing and crucial role of seapower in the 21st century *Seapower*

Geoffrey Till, 2004 At the beginning of the 21st century much has remained the same in naval terms but much has changed Geoffrey Till's study is an exploration of how change will impact upon the world's navies **Twenty-First Century**

Seapower Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general *Asian Maritime Power in the 21st Century* Vijay Sakhuja, 2011 Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates exponential expansion of science technology and industrial growth **Indian Naval Strategy in the Twenty-first Century** James R.

Holmes, Andrew C. Winner, Toshi Yoshihara, 2009-04-02 This is the first academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions By a quirk of historical fate Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea ushering in centuries of Western dominance In the 21st century however Asian states are once again resuming a naval focus with both China and India dedicating some of their new found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces The United States like the British Empire before it is attempting to manage these rising sea powers while preserving its maritime primacy This book probes how India looks at the sea what kind of strategy and seagoing forces New Delhi may craft in the coming years and how Indian leaders may use these forces It examines the material dimension but its major premise is that navies represent a physical expression of a society's history philosophical traditions and culture This book then ventures a comprehensive appraisal of Indian maritime strategy This book will be of interest to students of sea power strategic studies Indian politics and Asian Studies in general James R Holmes is an Associate Professor of Strategy at the U S Naval War College and a former U S Navy surface warfare officer Toshi

Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College Andrew C Winner is Professor in the Strategic Research Department at the U S Naval War College

China, the United States, and 21st-Century Sea Power Andrew S. Erickson, Lyle J Goldstein, Nan Li, 2010-12-01 China's reaction to the United States new maritime strategy will significantly impact its success according to three Naval War College professors Based on the premise that preventing wars is as important as winning wars this new U S strategy they explain embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with other nations The authors contend that despite recent turbulence in U S China military relations substantial shared interests could enable extensive U S China maritime security cooperation as they attempt to reach an understanding of competitive coexistence But for professionals to structure cooperation they warn Washington and Beijing must create sufficient political and institutional space

China as a Twenty-First Century Naval Power Michael A McDevitt, 2020-10-15 Xi Jinping has made his ambitions for the People's Liberation Army PLA perfectly clear there is no mystery what he wants first that China should become a great maritime power and secondly that the PLA become a world class armed force by 2050 He wants this latter objective to be largely completed by 2035 China as a Twenty First Century Naval Power focuses on China's navy and how it is being transformed to satisfy the world class goal Beginning with an exploration of why China is seeking to become such a major maritime power author Michael McDevitt first explores the strategic rationale behind Xi's two objectives China's reliance on foreign trade and overseas interests such as China's Belt and Road strategy In turn this has created concerns within the senior levels of China's military about the vulnerability of its overseas interests and maritime life lines is a major theme McDevitt dubs this China's sea lane anxiety and traces how this has required the PLA Navy to evolve from a near seas focused navy to one that has global reach a blue water navy He details how quickly this transformation has taken place thanks to a patient step by step approach and abundant funding The more than 10 years of anti piracy patrols in the far reaches of the Indian Ocean has acted as a learning curve accelerator to blue water status McDevitt then explores the PLA Navy's role in the South China Sea and the Indian Ocean He provides a detailed assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan potentially triggering combat with America's first responders in East Asia especially the U S Seventh Fleet and U S Fifth Air Force He conducts a close exploration of how the PLA Navy fits into China's campaign plan aimed at keeping reinforcing U S forces at arm's length what the Pentagon calls anti access and area denial A2 AD if war has broken out over Taiwan or because of attacks on U S allies and friends that live in the shadow of China McDevitt does not know how Xi defines world class but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world This book concludes with a forecast of what Xi's vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached

Maritime Diplomacy in the 21st Century Christian Le Mière, 2014-04-24 This book aims to redefine maritime diplomacy for the

modern era Maritime diplomacy encompasses a spectrum of activities from co operative measures such as port visits exercises and humanitarian assistance to persuasive deployment and coercion It is an activity no longer confined to just navies but in the modern era is pursued by coast guards civilian vessels and non state groups As states such as China and India develop they are increasingly using this most flexible form of soft and hard power Maritime Diplomacy in the 21st Century describes and analyses the concept of maritime diplomacy which has been largely neglected in academic literature The use of such diplomacy can be interesting not just for the parochial effects of any activity but because any event can reflect changes in the international order while acting as an excellent gauge for the existence and severity of international tension Further maritime diplomacy can act as a valve through which any tension can be released without resort to conflict Written in an accessible but authoritative style this book describes the continued use of coercion outside of war by navies while also situating it more clearly within the various roles and effects that maritime forces have in peacetime This book will be of much interest to students of seapower naval history strategic studies diplomacy and international relations

Power in the 21st Century Enrico Fels, Jan-Frederik Kremer, Katharina Kronenberg, 2012-04-10 The study of power is the nucleus of political science and international relations As a shift of power from traditional industrial countries to emerging powers has been perceived since the turn of the century this book aims to present innovative theoretical and empirical approaches that can increase our understanding of this transition Scholars from the fields of international relations international political economy economics and security studies not only explore current theoretical debates on power and power shifts among entities but also provide fresh insights into relevant aspects of international power in the 21st century With a particular focus on aspects of international security trade and production new methods of identifying power and its sources are presented and their potential implications and challenges are discussed

The UK as a Medium Maritime Power in the 21st Century Christopher Martin, 2016-11-30 This book argues that the UK as a post modern globalised state will require means to have influence over events and opponents that threaten the UK's interests in the 21st century and that its means is the Royal Navy However unlike other studies this research emphasizes the role of logistics especially afloat support logistics and the Royal Fleet Auxiliary In doing so the author rejects the current theory underpinning military operations at distance that distance degrades capability and posits an alternative theory that time is the key factor for maritime based forces The UK must reengage with its maritime status and maintain a maritime based capability to protect its interests in the new maritime century as a leader within the international community The book will be of use to scholars and researchers interested in naval history and defence policy

Maritime Strategy and Sea Control Milan Vego, 2016-04-14 This book focuses on the key naval strategic objectives of obtaining and maintaining sea control During times of war sea control or the ability of

combatants to enjoy naval dominance plays a crucial role in that side's ability to attain overall victory. This book explains and analyzes in much greater detail sea control in all its complexities and describes the main methods of obtaining and maintaining it. Building on the views of naval classical thinkers, this book utilizes historical examples to illustrate the main methods of sea control. Each chapter focuses on a particular method including destroying the enemy forces by a decisive action, destroying enemy forces over time, attrition, containing enemy fleet, choke point control, and capturing important enemy positions, basing area. The aim is to provide a comprehensive theory and practice of the struggle for sea control at the operational level. It should therefore provide a guide to practitioners on how to plan and conduct operational warfare at sea. The book will be of much interest to students of naval strategy, defence studies and security studies.

Understanding Naval Warfare Ian Speller, 2023-09-11. This updated new edition of *Understanding Naval Warfare* offers the reader an accessible introduction to the study of modern naval warfare, providing a thorough grounding in the vocabulary, concepts, issues and debates set within the context of relevant history. The third edition explains traditional concepts and explores current and emerging ideas concerning the theory and practice of naval warfare, relating these to recent events including Sino-American naval competition and the Russian-Ukraine War. Navies operate in an environment that most people do not understand and that many avoid. They are equipped with a bewildering range of ships, craft and other vessels and types of equipment, the purpose of which is often unclear. Writings on naval warfare are usually replete with references to esoteric concepts explained in specialist language that can serve as a barrier to understanding. This book cuts through the obscure and the arcane to offer a clear, coherent and accessible guide to the key features of naval warfare, which will equip the reader with the knowledge and understanding necessary for a sophisticated engagement with the subject. The new edition is divided into two key parts. The first focuses on concepts of naval warfare and introduces readers to the ideas associated with the theory and practice of naval operations and includes a chapter where the history of the last century of naval warfare is explored in order to illustrate the key concepts. The second part focuses on the conduct of war at sea and on peacetime roles for contemporary navies and now includes new material on hybrid warfare and grey zone operations and on joint warfare, multi-domain operations and integrated deterrence within the context of evolving great power rivalry at sea. This textbook will be essential reading for students of naval warfare, sea power and maritime security and is highly recommended for those studying military history, strategic studies and security studies in general.

Chinese Maritime Power in the 21st Century Hu Bo, 2019-08-23. This book analyses China's maritime strategy for the 21st century, integrating strategic planning, policy thinking and strategic prediction. This book explains the construction and application of China's military, political, economic and diplomatic means for building maritime power and predicts the future of China's maritime power by 2049, as well as development trends in global maritime politics. It explores both the strengths and the limitations of President Xi's Maritime Dream and provides a candid assessment of the likely future balance at sea between China and the United States.

This volume explains and discusses China's claims and intentions in the East and South China Seas and makes some recommendations for China's future policy that will lessen the chance of conflict with the United States and its closer neighbors. This book will be of much interest to students of maritime strategy, naval studies, Chinese politics, and International Relations in general.
