Search For Sam Where Are They:

Murder on the Florida Frontier: The True Story behind Sanford's Headless Miser Legend Andrew Fink, 2018
Archie Newton stepped off the river steamer in 1880 with a letter of introduction and a secret. Seeking refuge, the young Newton hoped for a new life on the Florida frontier. Samuel McMillan was a miserly Sanford bachelor who carried large sums of greenbacks and trusted no one. The ambitious Newton had his eye on purchasing McMillan's profitable orange grove. But on his way back from Newton's home one evening, McMillan disappeared and he wasn't seen again until his headless, mutilated corpse was pulled from a nearby lake. Newton's trial was sensational and the evidence gruesome, and local legends grew of a headless ghost rising from the lake. Author Andrew Fink chronicles the twists and turns of this shocking story.

Science and Magic - The Search Begins Aditya Upadhyaya, 2020-11-25
In a world where science is everything, humans rule the universe and people no longer believe in magic. An earthling Sam who grew up believing that he is an orphan dreams of finding true magic and the answer to life. His admission into Volgarth, a mysterious institution in the far away planet of Tiron, brought hope into his life. He will meet new friends there; new territories and magical lore will be explored. But magic brings with it many mysteries and dangerous secrets. Strange secrets are associated with Sam and his past, and it makes him special, but only if he can figure out what they are.

Real Ghost Stories of Borneo 2 Aamton Alias, 2018-12-31
Real Ghost Stories of Borneo 2 is the second book following the success of the book Real Ghost Stories of Borneo. This book is a collection of 30 short ghost stories written by a family physician working in Borneo. These supernatural tales are true accounts with a unique insight into the local population and what ails them. Be warned: very few of these stories have a happily ever after ending. A number of these stories may appear to have been left open-ended with no explanation as had been shared with the author in that manner.

Waiting to Forget Margaret Moorman, 1998-07
An extraordinary memoir of the author's giving up for adoption the baby she bore at 16. Beautifully written, psychologically nuanced, and sociologically informed. *Nation*

Agents and Peer-to-Peer Computing Gianluca Moro, Claudio Sartori, 2004-12-03
Peer-to-peer (P2P) computing is currently attracting enormous public attention, spurred by the popularity of file sharing systems such as Napster, Gnutella, Morpheus, Kazaa, and several others. In P2P systems, a very large number of autonomous computing nodes (the peers) rely on each other for services. P2P networks are emerging as a new distributed computing paradigm because of their potential to harness the computing power and the storage capacity of the hosts composing the network and because they realize a completely open, decentralized environment where everybody can join in autonomously. Although researchers working on distributed computing, multiagent systems, databases, and networks have been using similar concepts for a long time, it is only recently that papers motivated by the current P2P paradigm have started appearing in high quality conferences and workshops. In particular, research on agent systems appears to be most relevant because multiagent systems have always been thought of as networks of autonomous peers since their inception. Agents, which can be superimposed on

the P2P architecture embody the description of task environments decision support capabilities social behaviors trust and reputation and interaction protocols among peers The emphasis on decentralization autonomy ease and speed of growth that gives P2P its advantages also leads to significant potential problems Most prominent among these are coordination the ability of an agent to make decisions on its own actions in the context of activities of other agents and scalability the value of the P2P systems in how well they self organize so as to scale along several dimensions including complexity heterogeneity of peers robustness traffic redistribution etc This book brings together an introduction three invited articles and revised versions of the papers presented at the Second International Workshop on Agents and Peer to Peer Computing AP2PC 2003 held in Melbourne Australia July 2003
