Next Generation Search Engines: Advanced Models for Information Retrieval Jouis, Christophe, Biskri, Ismail, Ganascia, Jean-Gabriel, Roux, Magali, 2012-03-31 Recent technological progress in computer science Web technologies and the constantly evolving information available on the Internet has drastically changed the landscape of search and access to information Current search engines employ advanced techniques involving machine learning social networks and semantic analysis Next Generation Search Engines Advanced Models for Information Retrieval is intended for scientists and decision makers who wish to gain working knowledge about search in order to evaluate available solutions and to dialogue with software and data providers The book aims to provide readers with a better idea of the new trends in applied research

Large-Scale Distributed Computing and Applications: Models and Trends Cristea, Valentin, Dobre, Ciprian, Stratan, Corina, Pop, Florin, Costan, Alexandru, 2010-05-31 Many applications follow the distributed computing paradigm in which parts of the application are executed on different network interconnected computers The extension of these applications in terms of number of users or size has led to an unprecedented increase in the scale of the infrastructure that supports them Large Scale Distributed Computing and Applications Models and Trends offers a coherent and realistic image of today's research results in large scale distributed systems explains state of the art technological solutions for the main issues regarding large scale distributed systems and presents the benefits of using large scale distributed systems and the development process of scientific and commercial distributed applications

High Confidence Software Reuse in Large Systems Hong Mei, 2008-07-29 Software reuse depicts a great vision for the software industry It has been widely viewed as a promising way to improve both the productivity and quality of software development However despite of the successes we have achieved there are still many issues that have limited the promotion of software reuse in the real world Therefore software reuse has remained an important hotspot of research ICSR is the premier international conference in the field of software reuse It has been an important venue for presenting advances and improvements within the software reuse domain and a powerful driving force in promoting the interaction between researchers and practitioners The theme of ICSR 10 was High Confidence Software Reuse in Large Systems A high confidence system is one that behaves in a well understood and predictable fashion Today's trends towards widespread use of commercial off the shelf COTS technology increased integration continuous evolution and larger scale are yielding more complex software systems So the problem of how to build high confidence complex systems and how to reuse software with a high level of confidence has become a new attractive topic for research Furthermore high level software asset reuse has been a goal for the last 20-30 years and it can still be considered an unsolved question Components based development MDA MDE MDD extreme programming and other techniques or methods are promising approaches to software reuse that still need more research These proceedings report on the current state of the art in software reuse

Advanced Embeddings: LLMs in Action for Industry Leaders

Debabrata Das,2024-12-13 Large Language Models LLMs and advanced embeddings are transforming industries by enabling tailored context aware AI solutions Advanced Embeddings LLMs in Action for Industry Leaders is the ultimate guide for ML engineers data scientists and business leaders seeking to leverage embeddings for innovative applications across domains such as healthcare finance and retail This comprehensive book delves into domain specific embedding techniques exploring how they enhance tasks like semantic search recommendation systems and knowledge management Readers will gain insights into fine tuning LLMs for industry specific needs leveraging graph based embeddings and integrating multimodal data for comprehensive solutions With detailed explanations and real world case studies the book demonstrates how embeddings improve fraud detection in finance predictive diagnostics in healthcare and customer engagement in retail Additionally the book addresses the challenges of deploying embeddings including data sparsity computational efficiency and mitigating biases Emerging trends like multimodal embeddings and reinforcement learning are explored to prepare readers for future advancements in the field Whether optimizing decision making building scalable systems or pioneering AI driven solutions Advanced Embeddings equips professionals with the tools and knowledge to innovate in their industries This book is your roadmap to mastering domain specific embeddings and unleashing the transformative potential of LLMs **The**

Search Engine Society Alexander Halavais, 2013-04-25 Search engines have become a key part of our everyday lives Yet while much has been written about how to use search engines and how they can be improved there has been comparatively little exploration of what the social and cultural effects might be Like all technologies search engines exist within a larger political cultural and economic environment This volume aims to redress this balance and to address crucial questions such as How have search engines changed the way we organize our thoughts about the world and how we work What are the search engine wars what do they portend for the future of search and who wins or loses To what extent does political control of search engines or the political influence of search engines affect how they are used misused and regulated Does the search engine help shape our identities and interactions with others and what implications does this have for privacy Informed members of the information society must understand the social contexts in which search engines have been developed what that development says about us as a society and the role of the search engine in the global information environment This book provides the perfect starting point Knowledge and Information Visualization Sigmar-Olaf Tergan, Tanja Keller, 2005-06-28 formation The basic ideas underlying knowledge visualization and information visualization are outlined In a short preview of the contributions of this volume the idea behind each approach and its contribution to the goals of the book are outlined 2 The Basic Concepts of the Book Three basic concepts are the focus of this book data information and knowledge There have been numerous attempts to define the terms data information and knowledge among them the OTEC Homepage Data Information Knowledge and Wisdom Bellinger Castro Mills see <http://www.systems-thinking.org/dikw/dikw.htm> Data are raw They are symbols or isolated and non interpreted facts Data represent a fact or statement of event without any relation to other data Data simply exists and has no significance beyond its existence in and of itself It can exist in any form usable or not It does not have meaning of itself Freedom of Expression in the Platform Society Alexander Pirang, 2024-12-17 Can legislators launder state action through private companies by requiring online platforms to moderate content Alexander Pirang asserts that platform users right to freedom of expression imposes effective constraints on public authorities power to regulate platform companies Web Search Engine Research Dirk Lewandowski, 2012-04-19 Provides an understanding of Web search engines from the unique perspective of Library and Information Science This book explores a range of topics including retrieval effectiveness user satisfaction the evaluation of search interfaces the impact of search on society and the influence of search engine optimization SEO on results quality Beyond the Search Engine Liese Zahabi, 2024-12-24 Focusing on the user experience of online search this book explores the complex design at play and the ways social media platforms websites and other online interfaces have been created to provide information Author Liese Zahabi addresses three key questions How do users perceive search engines and what is their understanding of how they work What are the various user interface designs contemporary and historical that have created access points to search and

how do these interfaces affect each other and a user's search process What do these designs and products say about our priorities and our relationships with information and other people This book weaves archival and contemporary examples of interface designs together with the results of user research conducted by the author These user studies focus on how people utilize various platforms apps and interfaces in their quest for information answers and meaning Current research from the fields of user experience design interaction design and information design is integrated throughout to expand on these ideas and provide larger takeaways This book is crucial reading for advanced students scholars and professionals in the fields of design specifically user experience and interaction design media and cultural studies information science and design studies

Advances in Information Retrieval Cathal Gurrin, Yulan He, Gabriella Kazai, Udo Kruschwitz, Suzanne Little, Thomas Roelleke, Stefan Rüger, Keith van Rijsbergen, 2010-04-03 These proceedings contain the papers presented at ECIR 2010 the 32nd European Conference on Information Retrieval. The conference was organized by the Knowledge Media Institute KMi the Open University in co-operation with Dublin City University and the University of Essex and was supported by the Information Retrieval Specialist Group of the British Computer Society BCS IRSG and the Special Interest Group on Information Retrieval ACM SIGIR. It was held during March 28-31, 2010 in Milton Keynes, UK. ECIR 2010 received a total of 202 full paper submissions from Continental Europe 40% UK 14% North and South America 15% Asia and Australia 28% Middle East and Africa 3%. All submitted papers were reviewed by at least three members of the international Program Committee. Out of the 202 papers 44 were selected as full research papers. ECIR has always been a conference with a strong student focus. To allow as much interaction between delegates as possible and to keep in the spirit of the conference we decided to run ECIR 2010 as a single track event. As a result we decided to have two presentation formats for full papers. Some of them were presented orally the others in poster format. The presentation format does not represent any difference in quality. Instead the presentation format was decided after the full papers had been accepted at the Program Committee meeting held at the University of Essex. The views of the reviewers were then taken into consideration to select the most appropriate presentation format for each paper
