Search For A Scientist

Victor M. Corman

Search For A Scientist:

Science Education and Citizenship S. Terzian, 2012-12-28 Science fairs clubs and talent searches are familiar fixtures in American education yet little is known about why they began and grew in popularity In *Science Education and Citizenship* Sevan G Terzian traces the civic purposes of these extracurricular programs for youth over four decades in the early to mid twentieth century He argues that Americans mobilization for World War Two reoriented these educational activities from scientific literacy to national defense a shift that persisted in the ensuing atomic age and has left a lasting legacy in American science education

Webinator Search of the Scientist (1990-present). , Features the search engine for The Scientist a news journal for life scientists Provides examples of possible searches Allows users to search the archive of the journal from 1990 to the present

Innocent Experiments Rebecca Onion, 2016-10-04 From the 1950s to the digital age Americans have pushed their children to live science minded lives cementing scientific discovery and youthful curiosity as inseparable ideals In this multifaceted work historian Rebecca Onion examines the rise of informal children s science education in the twentieth century from the proliferation of home chemistry sets after World War I to the century long boom in child centered science museums Onion looks at how the United States has increasingly focused its energies over the last century into producing young scientists outside of the classroom She shows that although Americans profess to believe that success in the sciences is synonymous with good citizenship this idea is deeply complicated in an era when scientific data is hotly contested and many Americans have a conflicted view of science itself These contradictions Onion explains can be understood by examining the histories of popular science and the development of ideas about American childhood She shows how the idealized concept of science has moved through the public consciousness and how the drive to make child scientists has deeply influenced American culture

Applying an Implementation Science Approach to Genomic Medicine National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Roundtable on Translating Genomic-Based Research for Health, 2016-08-06 Although it is becoming increasingly more

common for clinicians to use genomic data in their practices for disease prevention diagnosis and treatment the process of integrating genomic data into the practice of medicine has been a slow and challenging one Some of the major barriers impeding the incorporation of new genomic technology into clinical practice are the difficulty of changing routine medical practices to account for the use of genetic testing the limited knowledge of patients and providers about genomic medicine assessing sufficient evidence to support the use of genetic tests privacy and data security issues and uncertainty about reimbursement The field of implementation science may be able to provide insights concerning efficient ways to incorporate genomic applications into routine clinical practice The focus of implementation science studies is to identify integration bottlenecks and optimal approaches for a given setting and ultimately to promote the up take of research findings To explore the potential of implementation science to improve the integration of genomics into medicine the National Academies of Sciences Engineering and Medicine held a workshop in Washington DC in November 2015 Participants explored the challenges and opportunities of integrating genomic advances into the clinic through the lens of implementation science This report summarizes the presentations and discussions from the workshop
