The Search for the Tassili Frescoes Henri Lhote, 1959 Story of the prehistoric rock paintings of the Sahara **The Search for the Tassili Frescoes** Henri Lhote, 1959 *The Search for the Tassili Frescoes*, 1973 **Before the Flood** Ian Wilson, 2014-04-01 In the six hundredth year of Noah's life in the second month the seventeenth day of the month the same day were all the fountains of the great deep broken up and the windows of heaven were opened And the rain was upon the earth forty days and forty nights The great Biblical flood so described in Genesis has long been a subject of fascination and speculation In the 19th century the English archbishop James Ussher established it as having happened in the year 2348 B C calculating what was then taken as the age of the earth and working backward through the entire series of Biblical begats Proof of the flood which is an element of so many creation myths began in earnest when archaeology started connecting physical evidence with Biblical story The dream of proving the Bible as literal truth has proven irresistible producing both spurious claims and serious scholarship As best selling historian Ian Wilson reveals in this fascinating new book evidence of a catastrophic event has been building steadily culminating in the work of William Ryan and Walter Pitman Several years ago Ryan and Pitman had posited that around 5600 BC there had an inundation in the Black Sea of such proportions that it turned the freshwater lake into a saltwater lake by connecting it to the Mediterranean Were that true they estimated that there would be signs of civilization 300 feet below the surface of the Black Sea In September 2000 using his famous underwater equipment Robert Ballard of SS Titanic fame explored parts of the Black Sea near the Turkish shore and found the remains of wood houses There had been a flood and whether God's wrath or not it had destroyed everything around it for hundreds of miles killing tens of thousands of people Exploring all the archeological evidence Wilson explains how the Black Sea flood and the Biblical flood have to be connected In particular Wilson argues learnedly and persuasively that the center of the civilized world was further to the West than previously thought not in Egypt or Mesopotamia but in what is today Northern Turkey The earliest antediluvian civilizations may have migrated east into those places we have come to call the cradles of civilization forced by the Black Sea flood to create new settlements Scrupulous in its details and compelling in its sweep *Before the Flood* is narrative detective history at its most provocative contributing a vital new chapter to the debate about the Bible and origins of the modern world **Building Construction Before Mechanization** John

Fitchen, 1989-04-03 How were huge stones moved from quarries to the sites of Egyptian pyramids How did the cathedral builders of the Middle Ages lift blocks to great heights by muscle power alone In this intriguing book John Fitchen explains and illustrates the solutions to these and many other puzzles in preindustrial building construction This is the first general survey of the practices and role of the builder as opposed to the designer in constructing an array of structures Fitchen's approach gives a valuable hands on feel for what it's like to work with ropes and ladders wedges and slings with crews engaged in well digging bridge building and the transporting of obelisks hundreds of miles by water and over land The

buildings discussed range from the tents tepees and igloos of nomadic tribes to the monumental pyramids of Egypt the temples of Greece the aqueducts of Rome and the cathedrals of medieval Europe

Black Athena: The Afroasiatic Roots of Classical Civilization Volume II Martin Bernal, 2020-02-14 Winner of the 1990 American Book Award What is classical about Classical civilization In one of the most audacious works of scholarship ever written Martin Bernal challenges the foundation of our thinking about this question Classical civilization he argues has deep roots in Afroasiatic cultures But these Afroasiatic influences have been systematically ignored denied or suppressed since the eighteenth century chiefly for racist reasons The popular view is that Greek civilization was the result of the conquest of a sophisticated but weak native population by vigorous Indo European speakers Aryans from the North But the Classical Greeks Bernal argues knew nothing of this Aryan model They did not see their institutions as original but as derived from the East and from Egypt in particular In an unprecedented tour de force Bernal links a wide range of areas and disciplines drama poetry myth theological controversy esoteric religion philosophy biography language historical narrative and the emergence of modern scholarship This volume is the second in a three part series concerned with the competition between two historical models for the origins of Greek civilization Volume II is concerned with the archaeological and documentary evidence for contacts between Egypt and the Levant on the one hand and the Aegean on the other during the Bronze Age from c 34000 BC to c 1100 BC These approaches are supplemented by information from later Greek myths legends religious cults and language The author concludes that contact between the two regions was far more extensive and influential than is generally believed In the introduction to this volume Bernal also responds to some reviews and criticism of Volume I of Black Athena

When the Sahara Was Green Martin Williams, 2021-10-05 The little known history of how the Sahara was transformed from a green and fertile land into the largest hot desert in the world The Sahara is the largest hot desert in the world equal in size to China or the United States Yet this arid expanse was once a verdant pleasant land fed by rivers and

lakes The Sahara sustained abundant plant and animal life such as Nile perch turtles crocodiles and hippos and attracted prehistoric hunters and herders What transformed this land of lakes into a sea of sands When the Sahara Was Green describes the remarkable history of Earth s greatest desert including why its climate changed the impact this had on human populations and how scientists uncovered the evidence for these extraordinary events From the Sahara s origins as savanna woodland and grassland to its current arid incarnation Martin Williams takes us on a vivid journey through time He describes how the desert s ancient rocks were first fashioned how dinosaurs roamed freely across the land and how it was later covered in tall trees Along the way Williams addresses many questions Why was the Sahara previously much wetter and will it be so again Did humans contribute to its desertification What was the impact of extreme climatic episodes such as prolonged droughts upon the Sahara s geology ecology and inhabitants Williams also shows how plants animals and humans have adapted to the Sahara and what lessons we might learn for living in harmony with the harshest driest conditions in an ever changing global environment A valuable look at how an iconic region has changed over millions of years When the Sahara Was Green reveals the desert s surprising past to reflect on its present as well as its possible future
