the Sea Mike Brown, Barbara Humberstone, 2016-04-01 Despite the fact that the sea covers 70 per cent of the Earth's surface and is integral to the workings of the world it has been largely neglected or perceived as marginal in modern consciousness This edited collection disrupts notions of the sea as other as foreign and featureless through specific situated accounts which highlight the centrality of the sea for the individuals concerned Bringing together academics who combine scholarly expertise with lived experiences on in and with the sea it examines humans relationships with the sea Through the use of auto ethnographic accounting the contributors reflect on how the sea has shaped their sense of identity belonging and connection They examine what it is to be engaged with the sea and narrate their lived sentient corporeal experiences The sea is a cultural seascape just as it is physical reality The sea shapes us and we in turn attempt to shape it as we construct various versions of it that reflect our on going and mutable relationship with it The use of embodied accounts as a way of conveying lived experiences and the integration of relevant theoretical frames for understanding the broader cultural implications provide new opportunities to understand seascapes

Scylla Marianne Govers Hopman, 2013-01-03 What's in a name Using the example of a famous monster from Greek myth this book challenges the dominant view that a mythical symbol denotes a single clear cut

figure and proposes instead to define the name Scylla as a combination of three concepts sea dog and woman whose articulation changes over time While archaic and classical Greek versions usually emphasize the metaphorical coherence of Scylla s components the name is increasingly treated as a well defined but also paradoxical construct from the late fourth century BCE onward Proceeding through detailed analyses of Greek and Roman texts and images Professor Hopman shows how the same name can variously express anxieties about the sea dogs aggressive women and shy maidens thus offering an empirical response to the semiotic puzzle raised by non referential proper names Indigenous Bodies Jacqueline

Fear-Segal, Rebecca Tillett, 2013-09-30 This interdisciplinary collection of essays by both Natives and non Natives explores presentations and representations of indigenous bodies in historical and contemporary contexts Recent decades have seen a wealth of scholarship on the body in a wide range of disciplines Indigenous Bodies extends this scholarship in exciting new ways bringing together the disciplinary expertise of Native studies scholars from around the world The book is particularly concerned with the Native body as a site of persistent fascination colonial oppression and indigenous agency along with the endurance of these legacies within Native communities At the core of this collection lies a dual commitment to exposing numerous and diverse disempowerments of indigenous peoples and to recognizing the many ways in which these same people retained and or reclaimed agency Issues of reviewing relocating and reclaiming bodies are examined in the chapters which are paired to bring to light juxtapositions and connections and further the transnational development of indigenous studies **American Sea Literature: Seascapes, Beach Narratives, and Underwater Explorations S.**

Moral Seascapes
Jonathan Stafford, Henning Trüper, Burkhardt Wolf, 2024-11-20 We are no strangers today to visual representations of human suffering at sea the refugee crisis that continues to play out in the seascope between Europe and Africa and not only there yields an ever growing archive of humanitarian tragedy As both a visual backdrop and a lethal medium of unequal mobility maritime space and landscape play a significant role in mediating the ethical demands of this crisis Yet there has been little exploration of the longer history of morality s role in our understanding of aesthetic representations of the sea The diverse contributions in Moral Seascapes explore the various symbolic forms through which these shifting moral norms and values have been manifested contributing to debates concerning the place of the sea in visual and literary cultures and the history of morality and emotion as well as the emergence of modern subjectivity Drawing on a range of interdisciplinary perspectives such as visual culture experimental art history literary studies history and philosophy Moral Seascapes develops distinctive new insights into the relationship between the moral cultures of modernity and the image of the sea

Extreme Landscapes of Leisure Patrick Laviolette, 2016-04-15 In recent years there has been an increased engagement throughout the social sciences with the study of extreme places and practices Dangerous games and adventure tours have shifted from being marginal exotic or mad to being more than merely acceptable They are now exemplary mainstream even there are a variety of new types increasing numbers of people are doing them and they are being appropriated and have infiltrated more and more contexts This book argues that hazardous sports and adventure tourism have become rather paradoxical As a set of activities where players and holidaymakers are closer to death or danger than they would otherwise be they are the complete opposite of normal games or vacations Adventure sports and tours reverse the general definition of a holiday as being an escape from the seriousness of everyday life as in most cases they are innately serious requiring as they do life or death decision making Beginning with the rise in colonial explorations and moving on to consider the Dangerous Sports Club of Oxford this book examines the increasing phenomena of adventure sports such as bungy jumping cliff jumping or tomb stoning surfing and parkour within a framework of positive risk It explores how certain assumptions about knowledge agency the body and nature are beginning to coalesce around newly developing spheres of social relations Additionally extreme games have become activities that are germane to the dawning of green social thought and so the book also addresses issues that deal with the intimate connections that exist between pleasure and the moral responsibility towards the environment

the God within This is a woman s story with a difference Although unlike so many she did not have to struggle through a life of disadvantage and deprivation she did have to wrestle with a powerful self that sometimes wandered up blind alleys into ego But she learned to accept mistakes and incorporate them into what Einstein called a calm and modest life Images of the sea symbols of the unconscious run through the book The seascapes at the head of each chapter function in the story as a leitmotif for the modes and moods of the spirit **At Home on the Waves** Tanya J.
