My Philosophy of Industry Henry Ford, Fay Leone Faurote, 2013-10 This is a new release of the original 1929 edition

Taylored Lives Martha Banta, 1993 Scientific management Technology spawned it Frederick Winslow Taylor championed it Thorstein Veblen dissected it Henry Ford implemented it By the turn of the century practical visionaries prided themselves on having arrived at the one best way both to increase industrial productivity and to regulate the vagaries of human behavior Nothing escaped the efficiency craze and in this vivid wide ranging book Martha Banta explores its effect on the culture at large To the Taylorists everything needed tidying up government business warfare households and most of all the workplace with its unruly influx of strangers into the native scenes Taylored Lives gives us a striking sense of what it was like to live work love and die when time motion and emotions were checked off on worksheets and management charts Canvassing the culture Banta shows how the cause of efficiency was taken up in narratives of every sort in mail order catalogs popular romances newspaper stories and personal testimonials from below as well as in the canonical works of writers from Henry Adams and William James to Sinclair Lewis Nathanael West and William Faulkner The strategies of impassioned theorists and hands on practitioners affected the kinds of narratives produced in the controversy over the pros and cons of the management culture they bear an eerie resemblance to the means by which we today storytellers all keep trying to make sense of our own chaotic times This interdisciplinary work charts the development of a managerial culture from its start in the steel mills of Pennsylvania through its spread across the American experience in an interlocking series of social systems and everyday practices Banta scrutinizes narrative strategies employed by inscribers as diverse as Josephine Goldmark Theodore Roosevelt Charlotte Perkins Gilman Anzia Yezierska Richard Harding Davis Booker T Washington and Theodore Dreiser by Taylor himself as well as Veblen and Ford by women who toiled on the factory floor by writers of dream copy for ready made houses and by Buster Keaton in his silent treatment of the dysfunctional honeymoon home With its historical scope and its provocative readings of assorted narratives this richly illustrated book offers a complex and disturbing picture of a period as well as invaluable insights into the way theory making continually makes and breaks cultures A remarkable work Taylored Lives confirms Martha Banta's place as one of our leading cultural and literary critics *Henry Ford's Plan for the American Suburb* Heather Barrow, 2018-10-29 Around Detroit suburbanization was led by Henry Ford who not only located a massive factory over the city's border in Dearborn but also was the first industrialist to make the automobile a mass consumer item So suburbanization in the 1920s was spurred simultaneously by the migration of the automobile industry and the mobility of automobile users A welfare capitalist Ford was a leader on many fronts he raised wages increased leisure time and transformed workers into consumers and he was the most effective at making suburbs an intrinsic part of American life The decade was dominated by this new political economy also known as Fordism linking mass production and consumption

The rise of Dearborn demonstrated that Fordism was connected to mass suburbanization as well. Ultimately Dearborn proved to be a model that was repeated throughout the nation as people of all classes relocated to suburbs shifting away from central cities. Mass suburbanization was a national phenomenon. Yet the example of Detroit is an important baseline since the trend was more discernable there than elsewhere. Suburbanization however was never a simple matter of outlying communities growing in parallel with cities. Instead resources were diverted from central cities as they were transferred to the suburbs. The example of the Detroit metropolis asks whether the mass suburbanization which originated there represented the American dream and if so by whom and at what cost. This book will appeal to those interested in cities and suburbs, American studies, technology and society, political economy, working class culture, welfare state systems, transportation, race relations, and business management.

Industrial Change and Employment Opportunity National Research Project on Reemployment Opportunities and Recent Changes in Industrial Techniques (U.S.), 1939
Irresistible Empire Victoria De Grazia, 2009-07 The most significant conquest of the twentieth century may well have been the triumph of American consumer society over Europe's bourgeois civilization. It is this little understood but world shaking campaign that unfolds in de Grazia's account of how the American standard of living defeated the European way of life and achieved the global cultural hegemony that is both its great strength and its key weakness today. Tracing the peculiar alliance that arrayed New World salesmanship, statecraft, and standardized goods against the Old World's values of status, craft, and good taste, de Grazia describes how all alternative strategies fell before America's consumer oriented capitalism: first the bourgeois lifestyle, then the Third Reich's command consumption, and finally the grand experiment of Soviet style socialist planning. From publisher description
