Na Dalekom Vostoke:

The Northern Region of Korea Sun Joo Kim, 2011-06-01 The residents of the three northern provinces of Korea have long had cultural and linguistic characteristics that have marked them as distinct from their brethren in the central area near the capital and in the southern provinces The making and legitimating of centralized Korean nation states over the centuries however have marginalized the northern region and its distinct subjectivities Contributors to this book address the problem of amnesia regarding this distinct subjectivity of the northern region of Korea in contemporary historical and cultural discourses which have largely been dominated by grand paradigms such as modernization theory the positivist perspective and Marxism Through the use of storytelling linguistic analysis and journal entries from turn of the century missionaries and traveling Russians in addition to many varieties of unconventional primary sources the authors creatively explore unfamiliar terrain while examining the culture identity and regional distinctiveness of the northern region and its people They investigate how the northern part of the Korean peninsula developed and changed historically from the early Choson to the colonial period and come to a consensus regarding the importance of regionalism as a vital factor in historical transformation especially in regard to Korea's tumultuous modern era

Red Leviathan Ryan Tucker Jones, 2022-05-30 A revealing and authoritative history that shows how Soviet whalers secretly helped nearly destroy endangered whale populations while also contributing to the scientific understanding necessary for these creatures' salvation The Soviet Union killed over six hundred thousand whales in the twentieth century many of them illegally and secretly That catch helped bring many whale species to near extinction by the 1970s and the impacts of this loss of life still ripple through today's oceans In this new account based on formerly secret Soviet archives and interviews with ex-whalers environmental historian Ryan Tucker Jones offers a complete history of the role the Soviet Union played in the whales' destruction As other countries especially the United States Great Britain Japan and Norway expanded their pursuit of whales to all corners of the globe Stalin determined that the Soviet Union needed to join the hunt What followed was a spectacularly prodigious and often wasteful destruction of humpback fin sei right and sperm whales in the Antarctic and the North Pacific done in knowing violation of the International Whaling Commission's rules Cold War intrigue encouraged this destruction but as Jones shows there is a more complex history behind this tragic Soviet experiment Jones compellingly describes the ultimate scientific irony today's cetacean studies benefited from Soviet whaling as Russian scientists on whaling vessels made key breakthroughs in understanding whale natural history and behavior And in a final twist Red Leviathan reveals how the Soviet public began turning against their own country's whaling industry working in parallel with Western environmental organizations like Greenpeace to help end industrial whaling not long before the world's whales might have disappeared altogether
