Physics, 1901-1921 Stig Lundqvist, 1998 **Physiology Or Medicine** Jan Lindsten, 1992 The quality of life for millions

of people all over the globe has been improved by the work of diligent biologists and doctors working in the many branches of life science. An improved knowledge of how the body functions at the genetic, cellular, physiological and behavioural levels and a greater understanding of disease and pharmacology have resulted in a reduction in human suffering. The way is being paved for the effective treatment of some of the greatest health problems of the late twentieth century: cancer, AIDS and diseases caused by parasites. These two volumes are collections of the Nobel Lectures delivered by the laureates together with their biographies, portraits and the presentation speeches for the periods 1971-1980 and 1981-1990 respectively. Each Nobel Lecture is based on the work for which the laureate was awarded the prize. New biographical data of the laureate are also included. These volumes of inspiring lectures by outstanding scientists should be on the bookshelf of every keen student, teacher and professor of biological and medical sciences as well as of those in related fields.

During the period 1971-1980, important areas of research being recognized were as diverse as hormone action and radioimmunoassays, infectious diseases, molecular genetics, immunology, computerized tomography and social behaviour. The laureates according to the specific year are: 1971 E. W. SUTHERLAND JR for his discoveries concerning the mechanisms of the action of hormones; 1972 G. M. EDELMAN; 1973 K. VON FRISCH, K. LORENZ; 1974 A. CLAUDE, C. DE DUVE; 1975 D. BALTIMORE, R. DULBECCO; 1976 B. S. BLUMBERG; 1977 R. GUILLEMIN and R. S. YALOW for the development of radioimmunoassays of peptide hormones; 1978 W. ARBER, D. NATHANS; 1979 A. M. CORMACK; 1980 B. BENACERRAF, J. DAUSSET, G. D. SNELL for their discoveries concerning genetically determined structures on the cell surface that regulate immunological reactions.

Physics 1922 - 1941 Sam Stuart, 2013-09-17. Physics presents Nobel Lectures on physics from the period of 1922 to 1941. This book is organized into 18 parts encompassing 36 chapters that cover various Nobel physics subjects. The first parts explore the advances in understanding the atom, structure, experimental studies of electrons, X-ray spectra of the atomic structure, kinetic energy of free electrons and discontinuous structure of matter. These topics are followed by discussions on the laws governing the thermionic phenomena, wave nature of electron, light, molecular scattering, the development of quantum mechanics, properties of neutrons and the properties and production of positrons. The remaining parts are devoted to electronic waves, neutron, artificial radioactivity and the evolution of cyclotron. Physicists will find this book invaluable.

Physics 1942 - 1962 Sam Stuart, 2013-09-24. Physics 1942-1962 presents Nobel Lectures on physics from 1942 to 1962. This book is 20 chapters that cover various Nobel physics subjects. The opening chapters deal with the topics of molecular ray methods, exclusion principle, quantum mechanics, the ionosphere, development of the Meson theory, interaction between high speed nucleons and atomic nuclei and the artificial production of fast particles. Other chapters discuss the principle of nuclear induction, research in nuclear magnetism, the discovery of phase contrast, statistical interpretation of quantum mechanics, the hydrogen atom, structure and the magnetic moment of the electron. The final chapters explore the semiconductor and transistor technology, laws of parity conservation, particle radiation, optics of light sources, the early antiproton studies, elementary particles, bubble

chamber nucleus structure evaluation using the electron scattering method and the gamma radiation This book is directed toward physicists *Explorations in Specialized Genres* Vijay Kumar Bhatia, Maurizio Gotti, 2006 Genre analysis has become firmly established as one of the most popular frameworks for the study of specialized genres in academic professional and institutional as well as other workplace contexts In recent years genre theory has also developed in the direction of a more comprehensive and powerful multi dimensional and multi perspectived framework to examine not only the text but also the context in a much more meaningful manner than had ever been done earlier The theoretical perspectives and the individual case studies of this volume testify to the wide range of methodological tools made available by genre theory enabling researchers to handle problems relating to the description of variations in language use Moreover the following relevant issues are addressed how are specialized genres constructed interpreted and exploited in the achievement of specific goals in highly specialized contexts **The Conceptual Completion and Extensions of Quantum Mechanics 1932-1941.**

Epilogue: Aspects of the Further Development of Quantum Theory 1942-1999 Jagdish Mehra, Helmut Reichenberg, 2001-04-20 Quantum Theory together with the principles of special and general relativity constitute a scientific revolution that has profoundly influenced the way in which we think about the universe and the fundamental forces that govern it The Historical Development of Quantum Theory is a definitive historical study of that scientific work and the human struggles that accompanied it from the beginning Drawing upon such materials as the resources of the Archives for the History of Quantum Physics the Niels Bohr Archives and the archives and scientific correspondence of the principal quantum physicists as well as Jagdish Mehra's personal discussions over many years with most of the architects of quantum theory the authors have written a rigorous scientific history of quantum theory in a deeply human context This multivolume work presents a rich account of an intellectual triumph a unique analysis of the creative scientific process The Historical Development of Quantum Theory is science history and biography all wrapped in the story of a great human enterprise Its lessons will be an aid to those working in the sciences and humanities alike Comments by distinguished physicists on The Historical Development of Quantum Theory the most definitive work undertaken by anyone on this vast and most important development in the history of physics Jagdish Mehra trained in theoretical physics under Pauli Heisenberg and Dirac pursued the vision of his youth to write about the historical and conceptual development of quantum theory in the 20th century This series of books on the HDQT has thus become the most authentic and permanent source of our knowledge of how quantum theory its extensions and applications developed My heartfelt congratulations Hans A Bethe Nobel Laureate A thrilling and magnificent achievement Subrahmanyam Chandrasekhar FRS Nobel Laureate captures precisely accurately and thoroughly the very essence and all the fundamental details of the theory and that is a remarkable achievement I have greatly enjoyed reading these books and learned so many new things from them This series of books will remain a permanent source of knowledge about the creation and development of quantum theory Congratulations Paul A Dirac FRS Nobel Laureate The

The Nobel Prize and the Formation of Contemporary World Literature Paul Tenngart, 2023-10-05 An exploration of the history ambitions and impact of the Nobel Prize in literature as it gained a central position in 20th century global literary culture Few scholars would deny that the Nobel Prize is the most prestigious literary award in the world But what mechanisms made it possible for 18 Swedish intellectuals to become the world s most influential literary critics Paul Tenngart argues that the Nobel Prize in literature has become a special kind of international canonization exerted from a non central semi peripheral position the award sometimes confirms and reinforces hierarchical relations between literary languages and cultures and sometimes disturbs established patterns of dominance and dependence Drawing from a wide range of contemporary theories and methods this multifaceted history of the Nobel Prize questions how the Swedish Academy has managed to keep the prize s global status through all the violent international crises of the last 120 years how the selection of laureates shaped the idea of universal literary values and defined literary quality across languages and cultures and what impact the prize has had on the distribution and significance of particular works literatures and languages The Nobel Prize and the Formation of Contemporary World Literature explores the history and impact of the Nobel Prize in literature from the first award in 1901 through recent controversies involving Bob Dylan and MeToo arguing that the prize is a unique performative act that has been and still is central in our continual and collective construction of world literature

Literature, 1996-2000 Horace Engdahl, 2002 In addition to the presentation speeches and the Nobel lectures these volumes also provide brief biographies and the Nobel laureates own accounts of their many years of preparation and effort that led to their achievements Equally important to our understanding of history and humanity are the great works of literature The Nobel Prize for literature recognizes modern classics and the efforts of authors to bridge gaps between different cultures time periods and styles Below is a list of the prizewinners during the period 1996 2000 1996 WISLAWA SZYMBORSKA for poetry that with ironic precision allows the historical and biological context to come to light in fragments of human reality 1997 DARIO FO who emulates the jesters of the Middle Ages in scourging authority and upholding the dignity of the down trodden 1998 JOS SARAMAGO who with parables sustained by imagination compassion and irony continually enables us once again to apprehend an elusory reality 1999 G NTER GRASS whose frolicsome black fables portray the forgotten face of history 2000 GAO XINGJIAN for an oeuvre of universal validity bitter insights and linguistic
