Nobility Count Of Millstone:

M. Tyler Mathis, 2003-11-01 Fantasy collides with alternate history when an American nobility emerges from the ruin of the Civil War Aristocratic Century John Cannon, 1984 Since the work of Butterfield and Namier in the 1930s it has commonly been said that eighteenth century England appears atomised left with no overall interpretation Subsequent work on religious differences and on party strife served to reinforce the image of a divided society and in the last ten years historians of the poor and unprivileged have suggested that beneath the surface lurked substantial popular discontent Professor Cannon uses his 1982 Wiles Lecture to offer a different interpretation that the widespread acceptance of aristocratic values and aristocratic leadership gave a remarkable intellectual political and social coherence to the century He traces the recovery made by the aristocracy from its decade in 1649 when the House of Lords was abolished as useless and dangerous After the Glorious Revolution of 1688 the peerage re established its hold on government and society Professor Cannon is forced to challenge some of the most cherished beliefs of English historiography that Hanoverian society at its top level was an open elite continually replenished by vigorous recruits from other groups and classes He suggests that on the contrary in some respects the English peerage was more exclusive than many of its continental counterparts and that the openness was a myth which itself served a potent political purpose Of the prospering bourgeoisie he argues that the remarkable thing was not their assertiveness but their long acquiescence in patrician rule and he poses the paradox of a country increasingly dominated by a landed aristocracy giving birth to the first industrial revolution His final chapter discusses the ideological underpinning which made aristocratic supremacy acceptable for so long and the emergence of those forces and ideals which were ultimately to replace it **No Man's Land** Pete Ayrton, 2014-09-15 The Great War gave birth to some of the twentieth century's most celebrated writing from D H Lawrence to Siegfried Sassoon the literature generated by the war is etched into collective memory But it is in fiction that we find some of the most profound insights into the war's individual and communal tragedies the horror of life in the trenches and the grand farce of the first industrial war Featuring forty seven writers from twenty different nations representing all the main participants in the conflict No Man's Land is a truly international anthology of World War I fiction Work by Siegfried Sassoon Erich Maria Remarque Willa Cather William Faulkner and Rose Macaulay sits alongside forgotten masterpieces such as Stratis Myrivilis's Life in the Tomb Raymond Escholier's Mahmadou Fofana and Mary Borden's The Forbidden Zone No Man's Land is a brilliant memorial to the twentieth century's most cataclysmic event Ideology of Adventure Michael Nerlich, 1987 **The Complete Works of Rosa Luxemburg, Volume III** Rosa Luxemburg, 2013 The third volume is devoted to the central theme of Rosa Luxemburg's life and work revolution Spanning the years 1897 to the end of 1905 it contains speeches articles and essays on the strikes protests and political debates that culminated in the 1905 Russian Revolution one of the most important social upheavals of modern times Back cover **The Transactions of the Royal Institute of British Architects Town Planning**

Conference, London, 10-15 October 1910 Riba, 2012-08-21 In October 1910 the Royal Institute of British Architects hosted the first ever international conference on Town Planning The Transactions of this critical event in the development of planning as a profession and as a discipline were published a year later in 1911 Long out of print and very difficult to obtain this new facsimile edition of the Transactions of the 1910 Conference now makes available for planners and historians alike this valuable primary resource

The Work of France James R. Farr, 2008-12-16 This clearly written and deeply informed book explores the nature and meaning of work in early modern France Distinguished historian James R Farr considers the relationship between material life specifically the work activities of both men and women and the culture in which these activities were embedded This culture he argues helped shape the nature of work invested it with meaning and fashioned the identities of people across the social spectrum Farr vividly traces the daily lives of peasants common laborers domestic servants prostitutes street vendors craftsmen and women merchants men of the law medical practitioners and government officials Work was recognized and valued as a means to earn a living but it held a greater significance as a cultural marker of honor identity and status Constants and continuities in work activities and their cultural aspects shared space with changes that were so profound and sweeping that France would be forever transformed The author focuses on three salient interconnected and at times conflicting developments the extension and integration of the market economy the growth of the state's functions and governing apparatus and the intensification of social hierarchy Presenting a unified and compelling argument about the role of labor in society Farr addresses a complex set of questions and succeeds masterfully at answering them With its stylish writing and clear themes this book will find a broad audience among students and scholars of early modern Europe French history economics gender studies anthropology and labor studies
