Nominalization And Complementation In Modern German North Holland Linguistic Series:

Nominalization and Complementation in Modern German Helmut Esau, 1973 *Current Research in Applied Linguistics* Teresa Fanego, Evelyn Gandón-Chapela, Paula Rodríguez-Puente, 2014-06-26 This volume offers a representative selection of the papers presented at the Third ELC International Postgraduate Conference on Language and Cognition ELC3 held in Santiago de Compostela 21-22 September 2012. The book is structured into four parts. Part I comprises syntactic studies on the auxiliary verb *get* in Indian English, the grammar of verbs capable of occurring with or without an object in Contemporary English, and isolated *if* clauses. Part II includes two papers dealing with word formation patterns and with crosslinguistic influences on motion expression in English and Spanish. The studies in Part III discuss topics related to second language acquisition, such as the difficulties encountered by Spanish speakers in learning English pronunciation, verbal morphology production by Japanese learners of English, and the effects of elicitation on students' production of English past tense forms. The papers in Part IV revolve around discourse analysis and psycholinguistics, addressing topics such as automatic sentiment detection, perspectival construal patterns in language and cognition, and the effect of emotional valence on disambiguation processes. **Bibliography of Morphology, 1960-1985**, 1988-01-01 Rather than an attempt at an exhaustive bibliography of morphology, this is a collection of major and selected minor works of theoretical interest in the broadest sense. The area of morphology represented here exhaustively is contemporary generative theoretical morphology interpreted broadly enough to include theoretically interesting structuralist works, works aimed at explaining deep motivations of morphology, or pertinent to contemporary theoretical morphology. Selected descriptive works have been included as well; it is not at all simple to draw a line between descriptive works of theoretical interest and fundamentally theoretical works, and in addition we hope to provide entry points into a variety of languages for morphologists seeking language-specific evidence for general hypotheses. **Nominalizations** Maria Koptjevskaja-Tamm, 2002-09-11 Based on extensive and diverse material from 70 languages and covering a range of previously undiscussed problems, this book provides a thorough analysis of how nominalization types interact with other structural features. It focuses on action nominal constructions and, in particular, the comparison of their syntactic structure with that of finite clauses and of other noun phrases, a problem which has claimed much attention in current syntactic theories. Supported by rich empirical material and clearly illustrated with examples from all the sample languages, the book provides a detailed and consistent basis for constructing a typology of derived constructions and for presenting cross-linguistic comparisons. **Foundations of Language**, 1974 **Linksverschachtelung im Deutschen und Norwegischen** Sigmund Kvam, 2012-01-02 *Linksverschachtelung im Deutschen und Norwegischen: Eine kontrastive Untersuchung zur Satzverschachtelung und Infinitivverschachtelung in der deutschen Gegenwartssprache* *Linguistische Arbeiten* Library of Congress Catalog Library of Congress, 1970 □□□□, 2002 **The Structure of Phonological Representations. FoL ,1980 **The Noun Phrase in Romance and Germanic** Petra Sleeman,Harry Perridon,2011-02-16 One of the recurrent questions in historical linguistics is to what extent languages can borrow grammar from other languages It seems for instance hardly likely that each average European language developed a definite article all by itself without any influence from neighbouring languages It is on the other hand by no means clear what exactly was borrowed since the way in which definiteness is expressed differs greatly among the various Germanic and Romance languages and dialects One of the main aims of this volume is to shed some light on the question of what is similar and what is different in the structure of the noun phrase of the various Romance and Germanic languages and dialects and what causes this similarity or difference **Books in Series** ,1985 Vols for 1980 issued in three parts Series Authors and Titles Morphology: Morphology: its relation to phonology Francis Katamba,2004 This six volume collection draws together the most significant contributions to morphological theory and analysis which all serious students of morphology should be aware of By comparing the stances taken by the different schools about the important issues the reader will be able to judge the merits of each with the benefit of evidence rather than prejudice
