Non-accelerator Particle Physics Y. Totsuka, 1988 Particle Physics Maurice Levy, 2012-12-06 The 1987 Cargese Summer Institute on Particle Physics was organized by the Université Pierre et Marie Curie Paris M LEVY and J L BASDEVANT CERN M JACOB the Université Catholique de Louvain D SPEISER and J WEYERS and the Katholieke Universiteit te Leuven R GASTHANS which since 1975 have joined their efforts and worked in common It was the 25th summer institute held at Cargese and the ninth one organized by the two institutes of theoretical physics at Leuven and Louvain la Neuve The 1987 school was centered around two main themes the recent developments in string theory and the physics of high energy colliders As the standard model of the fundamental interactions has repeatedly proved to be successful in explaining the experimental findings in particle physics more attention was given in this school to possible new features arising from string inspired models This led us to include in the program a series of lectures devoted to string theory per se They covered the more mathematical aspects of the theory as well as the phenomenological implications The second theme concerns high energy collider physics and was meant to prepare young physicists for the future experimental results to be expected from the pp and e e colliders It brought theorists and experimentalists actively together in their search for a better understanding of the high energy phenomena **EPS - High Energy Physics '89** R. Fernandez Alvarez-Estrada, C. Lopez, F. Barreiro, 2016-06-03 EPS High Energy Physics 89 presents the proceedings of the International Europhysics Conference on High Energy physics held in Madrid Spain on September 6-13 1989 This book outlines several topics on the interface between cosmology astrophysics and particle physics Organized into two parts encompassing 181 chapters this compilation of papers begins with an overview of the implications of the cosmic light element abundances This text then examines the various aspects of lattice field theory Other chapters consider the theoretical evidence of a fundamental length in string theory and outline the main features of the higher order corrections to the heavy quark inclusive cross section This book discusses as well the theory of heavy quark production in hadron collision The final chapter deals with the idea of low energy supersymmetry which relates the scale of supersymmetry breaking to the origin and stability of the electroweak scale

This book is a valuable resource for astrophysicists, physicists and scientists

**Non-accelerator Particle Astrophysics** School on Non-Accelerator Particle Astrophysics 1995, Trieste, Italy, Giacomelli Giorgio, 1996 The volume presents a broad coverage of this timely subject. The work is up to date and detailed enough to constitute a fine reference for experimental as well as for theoretical physicists but also maintains an informative pedagogical tone so that it can serve as the basis for a modern course on the subject. Major sections include fundamentals of particle physics with results from accelerator experiments, the particle cosmology interface, neutrino physics, large scale searches for proton decay and for exotic matter in the universe, neutrino astronomy, the physics of cosmic rays and gamma ray astronomy. A portion of the volume deals with facilities and instrumentation for particle astrophysics and on data acquisition

**Astroparticle Physics** Claus Grupen, 2005-12-06 Describes the branch of astronomy in which processes in the universe are investigated with experimental methods employed in particle physics experiments. After a historical introduction the basics of elementary particles. Explains particle interactions and the relevant detection techniques while modern aspects of astroparticle physics are described in a chapter on cosmology. Provides an orientation in the field of astroparticle physics that many beginners might seek and appreciate because the underlying physics fundamentals are presented with little mathematics and the results are illustrated.
