Non Darwinian Revolution Reinterpreting A Historical Myth:

The Non-Darwinian Revolution Peter J. Bowler, 1988 Timely and cogent in its aims and arguments it should prompt debate and discussion leading to fresh critical and historiographical insights concerning all those topics that historians of science of society and of culture associate with Darwinism and evolutionism *British Journal of the History of Science*

Darwinian Myths Edward Caudill, 2005-05-30 In *Darwinian Myths* Edward Caudill examines the ability of Darwin's theory to inspire legends focusing particularly on the impact of social Darwinism on popular culture This compelling testimony to the power of myth shows the ways in which over the years Darwin's ideas twisted truncated and misapplied have been appropriated by individuals governments and cultural elites to lend credibility to xenophobic racist and imperialist political movements and policies Caudill uses newspaper and magazine accounts and correspondence to trace the myth making and promotional efforts of Darwin himself as well as the transformation of his empirically based theory into the philosophy of social Darwinism

Retrieving Darwin's Revolutionary Idea Samuel Grove, 2021-07-12 Darwin's discovery of evolution is as celebrated as Galileo's laws of motion or Newton's discovery of gravity But this was only half the story Not content to prove that evolution had happened Darwin sought to convey its full humbling implications Thus he formulated the theory of natural selection Contrary to popular belief this theory ran exactly counter to scientific reason and was consequently rejected by the scientific community of the time This wasn't the only reason Darwin's critics recoiled His theory robbed the ruling orders of any easy recourse to consolatory tales of nature's harmony and design The fate of his ideas for the time being at least would be left to the heretics he inspired in other domains Darwin's radical thought anticipated Nietzsche's Godless philosophy Marx's class based economics and Freud's psychological theories of the unconscious It would take a further 80 years for Darwinism to become accepted as mainstream science but it came at the expense of its counter scientific core For the remainder of the twentieth century a popularized Darwinism would become the touchstone for backlash movements in philosophy economics and psychology disciplines he once so radicalized This is the story of how the most revolutionary idea of the nineteenth century became the most reactionary idea of the twentieth

Beyond Primitivism Jacob K. Olupona, 2004-02-24 At a time when local traditions across the world are forcibly colliding with global culture *Beyond Primitivism* explores the future of indigenous religions as they encounter modernity and globalisation

Metchnikoff and the Origins of Immunology Alfred I. Tauber, Leon Chernyak, 1991-07-25 This fascinating intellectual history is the first critical study of the work of Elie Metchnikoff the founding father of modern immunology Metchnikoff authored and championed the theory that phagocytic cells actively defend the host body against pathogens and diseased cells His program developed from comparative embryological studies that sought to establish genealogical relations between species at the dawn of the Darwinian revolution In this scientific biography Tauber and Chernyak explore more Metchnikoff's development as an embryologist showing how it prepared him to propose his theory of host pathogen interaction They

discuss the profound impact of Darwin's theory of evolution on Metchnikoff's progress and the influence of 19th century debates on vitalism teleology and mechanism As a case study of scientific discovery this work offers lucid insight into the process of creative science and its dependence on cultural and philosophic sources Immunologists and historians of science and medicine will find it an absorbing and accessible account of a remarkable individual *Thorstein Veblen and the Enrichment of Evolutionary Naturalism* Rick Tilman, 2007 Tilman argues that evolutionary naturalism provides the philosophical foundations of Veblen's thought He links evolutionary naturalism to Veblen's aesthetics secular humanism sociology of control sociobiology and sociology of knowledge thereby initiating observations regarding the relationship of Veblen's own life to his thinking and his place as a cultural lag theorist Provided by publisher *Making Modern Science, Second Edition* Peter J. Bowler, Iwan Rhys Morus, 2020-08-17 In this new edition of the top selling coursebook seasoned historians Peter J Bowler and Iwan Rhys Morus expand on their authoritative survey of how the development of science has shaped our world Exploring both the history of science and its influence on modern thought the authors chronicle the major developments in scientific thinking from the revolutionary ideas of the seventeenth century to contemporary issues in genetics physics and more Thoroughly revised and expanded the second edition draws on the latest research and scholarship It also contains two entirely new chapters one that explores the impact of computing on the development of science and another that shows how the West used science and technology as tools for geopolitical expansion Designed for entry level college courses and as a single volume introduction for the general reader Making Modern Science presents the history of science not as a series of names and dates but as an interconnected and complex web of relationships joining science and society **Robert Frost and the Challenge of Darwin** Robert Faggen, 1997 A revealing look at Darwin's influence on the American poet Robert Frost *America's Darwin* Tina Gianquitto, Lydia Fisher, 2014-06-26 While much has been written about the impact of Darwin's theories on U S culture and countless scholarly collections have been devoted to the science of evolution few have addressed the specific details of Darwin's theories as a cultural force affecting U S writers America's Darwin fills this gap and features a range of critical approaches that examine U S textual responses to Darwin's works The scholars in this collection represent a range of disciplines literature history of science women's studies geology biology entomology and anthropology All pay close attention to the specific forms that Darwinian evolution took in the United States engaging not only with Darwin's most famous works such as *On the Origin of Species* but also with less familiar works such as *The Expression of the Emotions in Man and Animals* Each contributor considers distinctive social cultural and intellectual conditions that affected the reception and dissemination of evolutionary thought from before the publication of *On the Origin of Species* to the early years of the twenty first century These essays engage with the specific details and language of a wide selection of Darwin's texts treating his writings as primary sources essential to comprehending the impact of Darwinian language on American writers and thinkers This careful engagement with the texts of evolution enables us to see the broad

points of its acceptance and adoption in the American scene this approach also highlights the ways in which writers reformers and others reconfigured Darwinian language to suit their individual purposes America's Darwin demonstrates the many ways in which writers and others fit themselves to a narrative of evolution whose dominant motifs are contingency and uncertainty Collectively the authors make the compelling case that the interpretation of evolutionary theory in the U S has always shifted in relation to prevailing cultural anxieties The Evolution of Racism Pat Shipman,2002 In an intellectually engaging narrative that mixes science and history theories and personalities Pat Shipman asks the question Can we have legitimate scientific investigations of differences among humans without sounding racist Through the original controversy over evolutionary theory in Darwin's time the corruption of evolutionary theory into eugenics the conflict between laboratory research in genetics and fieldwork in physical anthropology and biology and the continuing controversies over the heritability of intelligence criminal behavior and other traits the book explains both prewar eugenics and postwar taboos on letting the insights of genetics and evolution into the study of humanity *Performance and Evolution in the Age of Darwin* Jane Goodall,2002 Jane Goodall reveals the ways in which the major themes of evolution were taken up in the performing arts during Darwin's adult lifetime and in the generation after his death *Darwinian Heresies* Abigail Lustig,Robert J. Richards,Michael Ruse,2004-08-30 In *Darwinian Heresies* which was originally published in 2004 prominent historians and philosophers of science trace the history of evolutionary thought and challenge many of the assumptions that have built up over the years Covering a wide range of issues starting in the eighteenth century *Darwinian Heresies* brings us through the time of Charles Darwin and the Origin and then through the twentieth century to the present It is suggested that Darwin's true roots lie in Germany not his native England that Russian evolutionism is more significant than many are prepared to allow and that the true influence on twentieth century evolution biology was not Charles Darwin at all but his often despised contemporary Herbert Spencer The collection was intended to interest to excite to infuriate and to stimulate further work

Describing the Hand of God Robert Brennan,2016-04-28 The question of divine agency in the world remains one important unresolved underlying obstacle in the dialogue between theology and science Modern notions of divine agency are shown to have developed out of the interaction of three factors in early modernity Two are well known late medieval perfect being theology and the early modern application of the notion of the two books of God's revelation to the understanding of the natural order It is argued the third is the early modern appropriation of the Augustinian doctrine of inspiration This assumes the soul's existence and a particular description of divine agency in humans which became more generally applied to divine agency in nature Whereas Newton explicitly draws the parallel between divine agency in humans and that in nature Darwin rejects its supposed perfection and Huxley raises serious questions regarding the traditional understanding of the soul This book offers an alternative incarnational description of divine agency freeing consideration of divine agency from being dependent on resolving the complex issues of perfect being theology and the existence of the soul In conversation with

Barth's pneumatology this proposal is shown to remain theologically coherent and plausible while resolving or avoiding a range of known difficulties in the science theology dialogue

The Reception of Charles Darwin in Europe Eve-Marie Engels, Thomas F. Glick, 2008-12-03 Charles Darwin is a crucial figure in nineteenth century science with an extensive and varied reception in different countries and disciplines His theory had a revolutionary impact not only on biology but also on other natural sciences and the new social sciences The term Darwinism already popular in Darwin's lifetime ranged across many different areas and ideological aspects and his own ideas about the implications of evolution for human cognitive emotional social and ethical capacities were often interpreted in a way that did not mirror his own intentions The implications for religious philosophical and political issues and institutions remain as momentous today as in his own time This volume conveys the many sidedness of Darwin's reception and exhibit his far reaching impact on our self understanding as human beings

Karl Marx Allan Megill, 2002 Why did Karl Marx want to exclude politics and the market from his vision of a future socialism In *Karl Marx The Burden of Reason* Allan Megill begins with this question Megill's examination of Marx's formative writings casts new light on Marx's relation to philosophy and reveals a hitherto largely unknown rationalist Marx In demonstrating how Marx's rationalism permeated his attempts to understand politics economics and history generally Megill forces the reader to rethink Marx's entire intellectual project While Megill writes as an intellectual historian and historian of philosophy his highly original redescription of the Marxian enterprise has important implications for how we think about the usability of Marx's work today *Karl Marx The Burden of Reason* will be of interest to those who wish to reflect on the fate of Marxism during the era of Soviet Communism It will also be of interest to those who wish to discern what is living and what is dead what is adequate and what requires replacement or supplementation in the work of a figure who in spite of everything remains one of the greatest philosophers and social scientists of the modern world

The British Jesus, 1850-1970 Meredith Veldman, 2022-04-05 *The British Jesus* focuses on the Jesus of the religious culture dominant in Britain from the 1850s through the 1950s the popular Christian culture shared by not only church kirk and chapel goers but also the growing numbers of Britons who rarely or only episodically entered a house of worship An essay in intellectual as well as cultural history this book illumines the interplay between and among British New Testament scholarship institutional Christianity and the wider Protestant culture The scholars who mapped and led the uniquely British quest for the historical Jesus in the first half of the twentieth century were active participants in efforts to replace the popular image of Jesus in a white nightie with a stronger figure and so they hoped to preserve Britain's Christian identity They failed By exploring that failure and more broadly by examining the relations and exchanges between popular artistic and scholarly portrayals of Jesus this book highlights the continuity and the conservatism of Britain's popular Christianity through a century of religious and cultural transformation Exploring depictions of Jesus from over more than one hundred years this book is a crucial resource for scholars of British Christianity in the nineteenth and twentieth centuries

Global Dawn Frank Ninkovich, 2009-10-15 Why did the United States become a global power Frank Ninkovich shows that a cultural predisposition for thinking in global terms blossomed in the late nineteenth century making possible the rise to world power as American liberals of the time took a wide ranging interest in the world At the center of their attention was the historical process they called civilization whose most prominent features a global economy political democracy and a global culture anticipated what would later come to be known as globalization The continued spread of civilization they believed provided the answer to worrisome contemporary problems such as the faltering progress of democracy a burgeoning arms race in Europe and a dangerous imperialist competition In addition to transforming international politics a global civilization quickened by commercial and cultural exchanges would advance human equality and introduce the modern industrial way of life to traditional societies Consistent with their universalist outlook liberal internationalists also took issue with scientific racism by refusing to acknowledge racial hierarchy as a permanent feature of relations with nonwhite peoples Of little practical significance during a period when isolationism reigned supreme in U S foreign policy this rich body of thought would become the cultural foundation of twentieth century American internationalism

Lamarckism and the Emergence of 'Scientific' Social Sciences in Nineteenth-Century Britain and France Snait B. Gissis, 2024-04-09 The book presents an original synthesizing framework on the relations between the biological and the social Within these relations the late nineteenth century emergence of social sciences aspiring to be constituted as autonomous as scientific disciplines is described analyzed and explained Through this framework the author points to conceptual and constructive commonalities conjoining significant founding figures Lamarck Spencer Hughlings Jackson Ribot Durkheim Freud who were not grouped nor analyzed in this manner before Thus the book offers a rather unique synthesis of the interactions of the social the mental and the evolutionary biological Spencerian Lamarckism and or Neo Lamarckism crystallizing into novel fields It adds substantially to the understanding of the complexities of evolutionary debates during the last quarter of the nineteenth century It will attract the attention of a wide spectrum of specialists academics and postgraduates in European history of the nineteenth century history and philosophy of science and history of biology and of the social sciences including psychology
