Affairs. Subcommittee on Energy and  
the Environment**

## **Non Nuclear Futures The Case For An Ethical Energy Strategy:**

Non-nuclear Futures Amory B. Lovins, John H. Price, 1975 *Alternative Long-range Energy Strategies* United States. Congress. Senate. Select Committee on Small Business, 1977 **Energy Abstracts for Policy Analysis**, 1987

**Decentralized Energy Studies** James M. Ohi, 1980 **The Politics of Energy Research and Development** John Byrne, Daniel Rich, 1986-01-01 The Politics of Energy Research and Development examines and evaluates U S research and development policies to promote nuclear solar conservation and other technology options This volume is the third in the series Energy Policy Studies which explores fundamental long term social political and economic dimensions of energy technology resources and use Contributions represent a wide range of theoretical and policy perspectives including sociology economics political science urban and regional studies environmental analysis and history and philosophy of technology Contents Richard L Ottinger Introduction The Tragedy of U S Energy R Amor DEGREES B Lovins The Origins of the Nuclear Power Fiasco Richard T Sylves Nuclear Exotica Peaceful Use of Nuclear Explosives Eugene Frankel Technology Politics and Ideology The Vicissitudes of Federal Solar Energy Policy 1974 1983 Maxine Savitz The Federal Role in Conservation Research and Development J David Roessner Commercialization Issues in Energy Technology Policy John Byrne and Daniel Rich In Search of the Abundant Energy Machine and Grant P Thompson Energy Policy in the Interim Waiting for the Next Shoe to Drop Oversight Hearings Before a Task Force of the Subcommittee on Energy and the Environment of the Committee on Interior and Insular Affairs, House of Representatives, Ninety-sixth Congress, First Session ....: Nuclear economics United States. Congress. House. Committee on Interior and Insular Affairs. Subcommittee on Energy and the Environment, 1979 *1978 ERDA Authorization: Nuclear energy; February 23-March 31, 1977* United States. Congress. House. Committee on Science and Technology, United States. Congress. House. Committee on Science and Technology. Subcommittee on Fossil and Nuclear Energy Research, Development, and Demonstration, 1977 Leave It in the Ground John C. Berg, 2019-09-03 Employing scientific explanations and hard data this book shows why coal is such a problem how the pro coal forces got to be so powerful and how those forces might be defeated through political activism Coal provided the energy to build modern civilization This energy source raised standards of living multiplied the earth s population and enabled people in developed countries to enjoy leisure time Today we know that if we burn all the coal available climate change will continue to increase But the use of coal isn t purely an environmental issue political and economic forces are also at play This book examines the politics and environmental impact of coal production and distribution presenting a clear point of view that we must shift away from coal use backed by hard data and supplying specific prescriptions for opposing and regulating the coal industry John C Berg explains how ending the burning of coal and of oil and natural gas is a political problem rather than a technical one explodes the clean coal myth providing scientific documentation of how burning coal emits more greenhouse gases per unit of energy than any other fuel and describes how controlling coal use in the United

States will also restore the possibility of a meaningful international climate agreement. Additionally, readers will understand the critical importance of activism from local to international in spurring government regulation to control the coal industry which can only be defeated politically.

*Inspectors for Peace* Elisabeth Roehrlich, 2022-04-05

The first comprehensive empirically grounded and independent study of the history of the IAEA. The International Atomic Energy Agency, which sends inspectors around the world to prevent states from secretly developing nuclear bombs, has one of the most important jobs in international security. At the same time, the IAEA is a global hub for the exchange of nuclear science and technology for peaceful purposes. Yet spreading nuclear materials and know-how around the world bears the unwanted risk of helping what the agency aims to halt: the emergence of new nuclear weapon states. In *Inspectors for Peace*, Elisabeth Roehrlich unravels the IAEA's paradoxical mission of sharing nuclear knowledge and technology while seeking to deter nuclear weapon programs. Founded in 1957 in an act of unprecedented cooperation between the Cold War superpowers, the agency developed from a small technical bureaucracy in war-torn Vienna to a key organization in the global nuclear order. Roehrlich argues that the IAEA's dual mandate, though apparently contradictory, was pivotal in ensuring the organization's legitimacy, acceptance, and success. For its first decade of existence, the IAEA was primarily a scientific and technical organization; it was not until the Treaty on the Non-Proliferation of Nuclear Weapons entered into force in 1970 that the agency took on the far-reaching verification and inspection role for which it is now most widely known. While the Fukushima nuclear disaster and the Iran negotiations made the IAEA's name famous, the organization's remarkable history remains strikingly absent from public knowledge. Drawing on extensive archival research, including firsthand access to newly opened records at the IAEA Archives in Vienna, *Inspectors for Peace* provides the first comprehensive empirically grounded and independent study on the history of the IAEA. Roehrlich also interviewed leading policymakers and officials, including Hans Blix and Nobel Peace laureate Mohamed ElBaradei, the agency's former heads. This book offers insight not only for students, scholars, and policy experts but for anyone interested in the history of the nuclear age, the Cold War, and the role of international organizations in shaping our world.

*World Energy Crisis* David E. Newton, 2012-11-05

This book provides a historical background for the world's current energy problems, describing how the Industrial Revolution has led us to the impending end of the Age of Fossil Fuels and describes possible solutions for averting a global crisis. *World Energy Crisis: A Reference Handbook* provides a thorough investigation of a controversial topic: our current global energy situation and what actions should be taken to prevent a crippling fuel supply catastrophe in the future. The book presents a historical background for current energy problems that discusses the supply and consumption of various forms of energy at different

periods of history covering the evolution of energy use in civilization beginning with human muscle power the successive eras of mechanized industry and transportation and our current dependence on fossil fuels The author explains geopolitical factors regarding energy details controversial new ways of extending the fossil fuel supply including the exploitation of tar sands and oil shale as well as new technologies like hydraulic fracturing and examines the various environmental concerns that are integral to extracting energy from natural resources and the results of consuming them **1978 ERDA**
