Non Offensive Defence For The Twenty First Century:

Non-Offensive Defence for the Twenty-First Century Bjorn Moller,2019-03-11 This anthology constitutes an attempt to take stock of the debate on non offensive defence after the Cold War providing information on a research project that was initiated in 1985 at the Centre for Peace and Conflict Research in Copenhagen *Concepts of Non-Provocative Defence* G. Wiseman,2001-12-18 This book examines the viability of non provocative defence the controversial idea that defensive military policies and practices reduce the risk of wars and provide a viable basis for defending a society should war break out Drawing on case studies from Europe the 1991 Persian Gulf War and Asia Pacific the author concludes that non provocative defence concepts remain relevant and that they can help in deterring conducting and settling wars **US National Defense for the Twenty-first Century** Edward A. Olsen,2014-07-10 This provocative critique of Washington s current security policies draws on the arguments made by an array of non interventionist and conservative nationalist scholars It provides a blueprint for a more restrained and unilateral US role in global affairs Common Security and Strategic Reform Andrew Butfoy,2016-07-27 This is the first study of the strategic dimensions of common security which is set in a post Cold War context The book explores both common security and more recent additions to the debate such as the related idea of cooperative security Separate chapters deal with conceptual issues and pivotal aspects of the contemporary security agenda the amelioration of the security dilemma cooperative defence planning arms control and peace enforcement The book will interest anyone concerned with the reshaping of the international landscape *Security in the Twenty First Century* Mufleh R. Osmany,Muzaffer Ahmad,2003 Contributed articles *The National Security of Small States in a Changing World* Efraim Inbar,Gabriel Sheffer,2013-09-13 The first part of this book is primarily devoted to analysing the impact of the system of international relations on the fortunes of small states The second part discusses the question what changes in the national strategy of small states are necessary in view of the new international system The authors of this volume come from various parts of the world and espouse differing outlooks Nevertheless they were able to coalesce around a similar theme in an effort to contribute to the international understanding of the special challenges that confront the world s small states

Defensive Restructuring of the Armed Forces in Southern Africa Bjørn Møller,Gavin Cawthra,2019-01-15 Published in 1997 the work explores the reorientation of security policies and the accompanying restructuring of the armed forces going on in Southern Africa under entirely new circumstances Democracy has come to South Africa the civil wars in Angola and Mozambique have ended and the region is establishing a regional framework for cooperation While covering the entire region a special focus is placed on South Africa which is predestined to play a leading role but which is struggling with the legacy of the apartheid regime and its repeated aggressions against neighbouring states A defensive restructuring of the South African of the South African military is an element in the building of mutual trust The implications of such defensive restructuring to a non offensive defence are described in detail In addition to the analytical contribution the work also

contains central documents and a bibliography **Stable Nuclear Zero** Sverre Lodgaard, 2016-08-12 This volume examines the conditions necessary for a stable nuclear weapons free world and the implications for nuclear disarmament policy The Nuclear Non Proliferation Treaty NPT is a road map to nuclear zero but it is a rudimentary one and it says nothing about the kind of zero to aim for Preferably this would be a world where the inhibitions against reversal are strong enough to make it stably non nuclear What then are the requirements of stable zero The literature on nuclear disarmament has paid little attention to this question By and large the focus has been on the next steps and discussions tend to stop where the NPT stops with the elimination of the weapons This book seeks to fill a lacuna by examining the requirements of stable zero and their implications for the road map to that goal starting from the vision to the present day The volume highlights that a clear conception of the goal not only is important in itself but can shed light on what kind of disarmament process to promote This book will be of much interest to students of nuclear proliferation global governance security studies and IR Righteous Violence Michael P. O'Keefe, C. A. J. Coady, 2005 Asks whether it is ethical to intervene in humanitarian crises particularly when they occur in nation states alienated from the international community Experts consider the moral and practical aspects of diplomatic military and armed humanitarian intervention in places such as Rwanda East Timor Bosnia and Kosovo

The Arms Dynamic in World Politics Barry Buzan, Eric Herring, 1998 Presented as a successor to the Cold War era book *An Introduction to Strategic Studies* this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR

Co-operative Security and Non-offensive Defence in the Zone of War Yannis A. Stivachtis, 2001 The decades of the 1980s and 1990s represented the golden era of alternative security reflected politically in the idea of co operative security and militarily in proposals concerning the adoption by states of non offensive defence strategies Alternative security aimed at addressing the political and military problems in Europe created by the East West confrontation When the Cold War ended efforts were undertaken to apply the principles of co operative security and non offensive defence in world regions other than Europe However political realities have prevented many states from adopting such policies and strategies This volume seeks to provide an empirical contribution to the existing literature on co operative security and non offensive defence by focusing on the Greek Turkish and the Arab Israeli conflicts It argues that for states living in what has been called the zone of war the adoption of policies of co operative security and non offensive defence is highly unlikely and to a considerable degree

dangerous A set of conditions is put forward as a prerequisite for the acceptance and implementation of the above mentioned policies by the states concerned It has been written in such a way that it can be used as a textbook by students or anyone else interested in security analysis strategic studies and international relations It has been based on the idea that the three fields are so interconnected that any effort to examine an issue in the light of only one of these fields may seriously distort reality The book can also be useful to those interested in the Greek Turkish and the Arab Israeli conflicts It examines not only the issues in dispute but most importantly it points to the strategic logic which underlines the policies and attitudes of the actors involved in these conflicts

The Militarisation of Peacekeeping in the Twenty-First Century James Sloan, 2011-11-01

Since the end of the last century UN peacekeeping has undergone a fundamental and largely unexamined change Peacekeeping operations long expected to use force only in self defence and to act impartially are now increasingly relied upon by the Security Council as a means to maintain and restore security within a country The operations are established under Chapter VII of the UN Charter and some are empowered to use all necessary measures language traditionally reserved for enforcement operations Through a close examination of these twenty first century peacekeeping operations including operations in Sierra Leone the Democratic Republic of the Congo Liberia Cote d'Ivoire Haiti and the Darfur region of the Sudan the book shows that they are for the most part fundamentally ill suited to the enforcement type tasks being asked of them The operations which are under funded under equipped and whose troops are under trained frequently lurch from crisis to crisis There is scant evidence some 10 years on that matters are likely to improve The book argues that bestowing enforcement type functions on a peacekeeping operation is misconceived Such operations are likely to be unsuccessful in their enforcement type tasks thereby causing serious damage to the excellent reputation of UN peacekeeping and the UN more broadly In addition because such operations are more likely to be perceived as partial their ability to carry out traditional non forceful peacekeeping tasks may be impeded Finally the Security Council's practice of charging peacekeeping operations with enforcement functions lessens the pressure on the Council to work to establish genuine enforcement operations ie operations that are considerably better suited to restoring peace and security Dr Sloan is able to show in knowledgeable detail not only what has changed over the years but also what has brought these changes about His analysis leads him to offer not only well informed insights but critical observations too This book is a pleasing combination of detailed scrutiny of topics already familiar provisional measures consent so called Chapter VII 2 action implied powers and a rigorous questioning as to their place in or indeed relevance at all to militarised peacekeeping The reader will find much new terrain traversed and plenty of out of the box thinking From the foreword by Dame Rosalyn Higgins

Nuclear Disarmament in the Twenty-first Century Wade L. Huntley, Mitsuru Kurosawa, Kazumi Mizumoto, 2005-03-06 This work provides a comprehensive examination of the current state and future prospects for nuclear disarmament at the turn of the century The work juxtaposes a sober review of progress made during the last decade with a proactive agenda of proposals for new

disarmament initiatives in the next decade Taken together the contributions to this volume suggest that contrary to current conventional wisdom the increasing global cache of nuclear weapons and the waning progress on nuclear disarmament of recent years need not become the defining features of the post Cold War era Rather by examining the new conditions that have emerged at the dawn of the 21st century through both national and issue based perspectives this work reveals how the likelihood of continuing uncertainty and change in world affairs creates opportunities as well as the need for renewed progress toward significant nuclear disarmament *ASEAN-U.S. Relations* Pavin Chachavalpongpun, 2011-12-16 This book is the result of a workshop of the ASEAN Studies Centre ASC held in July 2010 P ix **On Small War** Sibylle Scheipers, 2018 The book introduces a fresh perspective on Carl von Clausewitz's thoughts on small war Rethinking the Just War Tradition Michael W. Brough, John W. Lango, Harry van der Linden, 2012-02-01 The just war tradition is an evolving body of tenets for determining when resorting to war is just and how war may be justly executed Rethinking the Just War Tradition provides a timely exploration in light of new security threats that have emerged since the end of the Cold War including ongoing conflicts in the Middle East threats of terror attacks and genocidal conflicts within states The contributors are philosophers political scientists a U S Army officer and a senior analyst at the Center for Defense Information They scrutinize some familiar themes in just war theory from fresh and original angles and also explore altogether new territory The diverse topics considered include war and the environment justice in the ending of war U S military hegemony a general theory of just armed conflict principles supreme emergencies the distinction between combatants and noncombatants child soldiers the moral equality of all soldiers targeted assassination preventive war right authority and armed humanitarian intervention Clearly written and free of jargon this book illustrates how the just war tradition can be rethought and applied today **The Evolution of Operational Art** John Andreas Olsen, Martin van Creveld, 2011 Broadly defined as the grey area between strategy and tactics operational art spans the theory and practice of planning and conducting campaigns and major operations aimed at accomplishing strategic and operational objectives in a given theatre of operations An intermediate link between strategy and tactics has always existed but a distinct concept that encompasses a systematic and deliberate plan of campaign for major operations is a mere two hundred years old Based on country specific case studies this book describes how the concepts that underpin operational art originated how they received practical expression in various campaigns and how they developed over time The point of departure is the campaigns of the God of War Napoleon Bonaparte The book then proceeds with chapters on the evolution of operational art in Prussia Germany the Soviet Union Russia the United Kingdom United States Israel and China The final chapter deals with the future of operational art in irregular warfare Theory is critical to refining and improving existing methods of applying operational warfare and its importance cannot be overstated however to be useful theory and its accompanying vocabulary must be combined with a proper examination of historical trends and practical experience The present volume attempts to achieve that combination This book is a project of the Oxford

The Top Books of the Year Non Offensive Defence For The Twenty First Century The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have enthralled audiences this year. Non Offensive Defence For The Twenty First Century : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Non Offensive Defence For The Twenty First Century : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
