Non Renewable Resources And Disequilibrium Macrodynamics:

Non-Renewable Resources and Disequilibrium Macrodynamics Robert Marks, 2017-10-17 This study first published in 1979 continues by examining the question of whether a competitive economy can efficiently allocate a stock of non renewable natural resources through time Long run analyses of competitive economies with such resources have concluded that without perfect foresight or a complete set of future markets extending infinitely far into the future there is no economic mechanism to guarantee that the initial price is set so that the economy converges to the socially desirable path of balanced growth This title will be of interest to students of environmental and natural resource economics Handbook of Natural Resource and Energy , 1993-04-08 The Handbook of Natural Resource and Energy Economics examines the current theory and sample current application methods for natural resource and energy economics This third volume deals primarily with non renewable resources It analyzes the economics of energy and minerals and includes chapters on the economics of environmental policy The Handbook provides a source reference and teaching supplement for use by professional researchers and advanced graduate students The surveys summarize not only received results but also newer developments from recent journal articles and discussion papers Artificial Intelligence, Learning and Computation in Economics and Finance Ragupathy Venkatachalam, 2023-02-15 This book presents frontier research on the use of computational methods to model complex interactions in economics and finance Artificial Intelligence Machine Learning and simulations offer effective means of analyzing and learning from large as well as new types of data These computational tools have permeated various subfields of economics finance and also across different schools of economic thought Through 16 chapters written by pioneers in economics finance computer science psychology complexity and statistics econometrics the book introduces their original research and presents the findings they have yielded Theoretical and empirical studies featured in this book draw on a variety of approaches such as agent based modeling numerical simulations computable economics as well as employing tools from artificial intelligence and machine learning algorithms The use of computational approaches to perform counterfactual thought experiments are also introduced which help transcend the limits posed by traditional mathematical and statistical tools The book also includes discussions on methodology epistemology history and issues concerning prediction validation and inference all of which have become pertinent with the increasing use of computational approaches in economic analysis **Competitive Pricing of Non-renewable Natural Resources** Stanford University. Energy Modeling Forum, 1980 Macrodynamics: Fluctuations and Growth Pierre-Yves Hénin, 2013-04-15 Building from the micro foundations of economic behaviour to a full survey of macroeconomics the book examines growth theory and equilibrium and disequilibrium approaches to provide a comprehensive survey of all the rival theoretical approaches that underlie central policy debates A survey of pre Keynesian theories of growth fluctuations and the various short and long cycles and crises is followed by an exposition of Keynesian theory and its subsequent development and of the neo classical revival Topics covered
