Noncommutative Noetherian Rings:

Noncommutative Noetherian Rings John C. McConnell, James Christopher Robson, Lance W. Small, 2001 This is a reprinted edition of a work that was considered the definitive account in the subject area upon its initial publication by J Wiley Sons in 1987 It presents within a wider context a comprehensive account of noncommutative Noetherian rings The author covers the major developments from the 1950s stemming from Goldie's theorem and onward including applications to group rings enveloping algebras of Lie algebras PI rings differential operators and localization theory The book is not restricted to Noetherian rings but discusses wider classes of rings where the methods apply more generally In the current edition some errors were corrected a number of arguments have been expanded and the references were brought up to date This reprinted edition will continue to be a valuable and stimulating work for readers interested in ring theory and its applications to other areas of mathematics

An Introduction to Noncommutative Noetherian Rings K. R. Goodearl, Robert B. Warfield, 2004-07-12 This introduction to noncommutative noetherian rings is intended to be accessible to anyone with a basic background in abstract algebra It can be used as a second year graduate text or as a self contained reference Extensive explanatory discussion is given and exercises are integrated throughout This edition incorporates substantial revisions particularly in the first third of the book where the presentation has been changed to increase accessibility and topicality New material includes the basic types of quantum groups which then serve as test cases for the theory developed

Krull Dimension Robert Gordon, James Christopher Robson, 1973 This memoir is devoted to the study of Krull dimensions of modules over not necessarily commutative rings with identity Although not all modules have a Krull dimension Noetherian modules always do There has been much interest in the Krull dimension of noncommutative Noetherian rings and their modules In this memoir as well as providing an exposition of much of what is known about Krull dimension we study those rings and modules not necessarily Noetherian which have a Krull dimension The results we obtain show that merely having a Krull dimension is a stringent condition with many Noetherian like consequences We expect these results and the methods involved to have applications to Noetherian and related rings
