

## Chapter 1. Introduction to Nonlinear Space Plasma Physics

The goal of this course, *Nonlinear Space Plasma Physics*, is to explore the formation, evolution, propagation, and characteristics of the large amplitude quasi-stationary nonlinear waves, structures, or turbulences commonly observed in the space plasmas and in numerical simulations of space plasmas. Familiar with theoretical solutions of these nonlinear plasma waves can help us to analyze and to properly explain these observed nonlinear phenomena.

Differences between linear plasma waves and nonlinear plasma waves are discussed below:

By definition, a function  $f(x)$  is a linear function, if and only if,  $f(ax + by) = af(x) + bf(y)$ . Thus, if  $f(ax + by) \neq af(x) + bf(y)$ , then the function  $f(x)$  is a nonlinear function, and  $f(x) = 0$  is a nonlinear equation.

A linear perturbation in space plasma can be considered as a linear combination of the eigen wave modes, which can be obtained from the *linear wave dispersion relations* of the space plasma. Under linear superimposition assumption, there is no interaction between these eigen wave modes. Thus, the coefficients of the linear combinations should not vary with time. We can predict the linear evolution of a linear perturbation based on the characteristics of these linear eigen wave modes.

The superimposition assumption is not applicable to nonlinear structures. Even if it is still possible to decompose a nonlinear wave into a linear combination of all the linear eigen wave modes of the background plasma, the coefficients of the linear combinations should vary with time. Thus, it is impossible to predict the evolution of the nonlinear wave based on the characteristics of these linear eigen modes.

Several methods have been introduced in literatures for the studying of the nonlinear waves in the space plasma. We shall discuss these methods in Section 1.1. Basic nonlinear equations of space plasmas are reviewed in Section 1.2. Generations of these nonlinear waves are discussed in Section 1.3.
