Nonmarine Ostracodes Of Early Cretaceous

F.M. Swain Jr.

Nonmarine Ostracodes Of Early Cretaceous:

Nonmarine Ostracodes in the Lakota Formation (Lower Cretaceous) from South Dakota and Wyoming Israel Gregory Sohn,1979 Revision of nonmarine Lower Cretaceous ostracode genera from the Black Hills and description of two new genera and four new species On the basis of this revision the Lakota Formation is considered to be pre Aptian in age

Fossil Nonmarine Ostracoda of the United States F.M. Swain Jr.,1999-04-06 The geographic and stratigraphic distribution of fossil nonmarine Ostracoda in the United States are summarized in this book followed by diagnoses of the subject species references to literature and 34 plates of illustrations This work shows the great diversity and usefulness of this interesting class of organisms which are small bivalved aquatic crustaceans that occupy both marine and nonmarine environments Many are characteristic of estuarine and other tidal habitats but only a few occupy hypersaline waters One or two kinds are found in wet soils or in leaf or flower cups in tropical rain forests A few live in caves and others are commensal in gills of fish and other aquatic animals Micropaleontologists have found their shells in many types of sedimentary rocks and have used them for stratigraphic and paleoenvironmental interpretations Their relatively rapid rates of evolution have made them useful in subsurface stratigraphy and their sensitivity to environmental changes has provided a means of recognizing variations in rock facies In nonmarine aquatic rocks they are commonly the most easily recoverable microfossils and have been widely used in petroleum exploration notably in China Russia Brazil and the western United States **U.S. Geological Survey Professional Paper** ,1969 **Geological Survey Professional Paper** ,1979 Lower Cretaceous, Jurassic(?), and Triassic Ostracoda from the Atlantic Coastal Region Frederick Morrill Swain,Philip Monroe Brown,1972

Evolutionary Biology and Ecology of Ostracoda David J. Horne,Koen Martens,2013-11-11 Ostracoda Crustacea are potentially excellent model organisms for evolutionary studies because they combine an extensive fossil record with a wide recent distribution and therefore allow studies on both patterns and processes leading to extant diversity The main scientific domains contributing theories concepts and data to evolutionary biology are morphology including ontogeny palaeontology genetics and ecology and to all of these aspects ostracods can contribute This is clearly illustrated by the fifteen papers presented under Theme 3 of the 13th International Symposium on Ostracoda Chatham UK in 1997 which are grouped in the present proceedings one of three volumes resulting from this meeting The contributions deal with the evolution of both extant and fossil forms including most of the Phanerozoic ecology of both marine and freshwater taxa and developmental morphology of both soft parts and valves Although the canvas is wide each paper clearly shows how studies on Ostracoda can be relevant to general theory on evolutionary biology and ecology **Evolutionary Biology of Ostracoda** N. Ikeya,K. Ishizaki,T. Hanai,2011-10-10 There are many competitive works on the market concerning evolutionary biology but this volume is quite distinctive in its idiographic aspect focusing on Ostracoda viewed from a wide range of disciplines ages and environments The book deals with various lines of idiographic biology and palaeontology of Ostracoda and nomothetic trials

focusing strongly on evolutionary biology Particular themes are morphology biology evolution speciation ecology palaeoecology deep sea fauna biogeography palaeobiogeography biostratigraphy and exploration all concerning Ostracoda The last decade has witnessed a spectacular renewal of interest in the study of Ostracoda particularly in the evolutionary biology of Ostracoda including speciation Ostracoda are unique ranging in age from the Cambrian period to modern times with carapaces ready to be preserved as fossils providing various lines of invaluable evidence regarding evolutionary processes More than 120 participants from 20 countries assembled at the Ninth International Symposium on Ostracoda and this book is a collection of all the papers presented at the Symposium plus selected papers submitted by non attending members It presents an outstanding record of much pioneering research and will be of interest to specialists in Ostracoda as well as all earth and life scientists concerned with evolution Its value is further enhanced by easy to use indexes of authors localities and taxa
