**Bulletin of the Atomic Scientists** ,1993-11 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *America, Britain and Pakistan's Nuclear Weapons Programme, 1974-1980* Malcolm M. Craig,2017-06-26 This book analyses US and UK efforts to shut down Pakistan s nuclear programme in the 1970s between the catalytic Indian nuclear test of May 1974 and the decline of sustained non proliferation activity from mid 1979 onwards It is a tale of cooperation between Washington and London but also a story of divisions and disputes The brutal economic realities of the decade globalisation and wider geopolitical challenges all complicated this relationship Policy and action were also affected by changes elsewhere in the world Iran s 1979 revolution brought a new form of political Islamic radicalism to prominence The fears engendered by the Ayatollah and his followers coupled to the blustering rhetoric of Pakistani leaders gave rise to the Islamic bomb a nuclear weapon supposedly created by Pakistan to be shared amongst the Muslim ummah This study thus combines cultural diplomatic economic and political history to offer a rigorous deeply researched account of a critical moment in nuclear history **Nonproliferation and the National**

U.S. Nuclear Nonproliferation Policy United States. Congress. Senate. Committee on Foreign Relations, 1983

*Networked Nonproliferation* Michal Onderco, 2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty was extended indefinitely and without a vote *Networked Nonproliferation* offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With *Networked Nonproliferation* Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for

understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power

**International Nuclear Export Controls and Non-Proliferation** Ian J. Stewart, 2021-09-27 This book examines the evolution of international nuclear non proliferation trade controls over time The book argues that the international nuclear export controls have developed in a sub optimal way as a result of a non proliferation collective action problem This has resulted in competition among suppliers owing to the absence of an overarching effective system of control While efforts have been undertaken to address this collective action problem and strengthen controls over time these measures have been inherently limited it is argued here because of the same structural factors and vested interests that led to the creation of the problem in the first place This study examines international controls from the beginning of the nuclear age and early efforts to control the atom up to more recent times and the challenge posed by Iranian and North Korean nuclear ambitions Drawing on a rich body of original archival research and interviews the book demonstrates that the collective action problem has restrained cooperation in preventing nuclear proliferation and that gaps persist in the international nuclear trade control regime This book will be of much interest to students of nuclear proliferation and arms control security studies and International Relations

*Selling US Wars* Achin Vanaik, 2007 The real reasons for the war In Iraq control of all pricing and policies expansion of US power establishment of US bases in the strategic Middle East defense of Israel were kept hidden from the American people Instead justifications for the illegal war were cloaked in the high sounding slogans of fighting the war on terrorism keeping nuclear weapons out of the hands of rogue states and finally bringing democracy to the Middle East
