Nontraditional Families Parenting And Child Development:

Parenting and Child Development in Nontraditional Families Michael E. Lamb, 1998-10-01 The goal of this volume is to discuss in depth the ways in which various deviations from traditional family styles affect childrearing practices and child development Each of the contributors illustrates the dynamic developmental processes that characterize parenting and child development in contexts that can be deemed nontraditional because they do not reflect the demographic characteristics of the traditional families on which social scientists have largely focused The contributors deal with the dynamics and possible effects of dual career families families with unusually involved fathers families characterized by the occurrence of divorce single parenthood remarriage poverty adoption reliance on nonparental childcare ethnic membership parents with lesbian or gay sexual orientations as well as violent and or neglectful parents By doing so the authors provide thoughtful literate and up to date accounts of a diverse array of nontraditional or traditionally understudied family types All the chapters offer answers to a common question How do these patterns of childcare affect children their experiences and their developmental processes The answers to these questions are of practical importance relevant to a growing proportion of the families and children in the United States but also have significant implications for the understanding of developmental processes in general As a result the book will be of value to basic social scientists as well as those professionals concerned with guiding and advising clients and public policy

Interparental Conflict and Child Development John H. Grych, Frank D. Fincham, 2001-03-19 Interparental Conflict and Child Development provides an in depth analysis of the rapidly expanding body of research on the impact of interparental conflict on children Emphasizing developmental and family systems perspectives it investigates a range of important issues including the processes by which exposure to conflict may lead to child maladjustment the role of gender and ethnicity in understanding the effects of conflict the influence of conflict on parent child sibling and peer relations family violence and interparental conflict in divorced and step families

Handbook of Father Involvement Natasha J. Cabrera, Catherine S. Tamis-LeMonda, 2012-12-06 This book brings together experts from diverse scientific disciplines who share an interest in the topic of father involvement Unlike most books in the field which tend to solely draw from a psychological perspective this Handbook merges theories and research from the unique fields of psychology economics demography sociology anthropology and social policy For the most part research on fathering is motivated by concern for children's well being Social scientists share a core set of questions including Who are fathers What is father involvement and how does it affect children and families What are the determinants of father involvement How do cultural contexts shape fathers roles in families This Handbook sheds light on how a cross disciplinary approach to the study of fathering can advance knowledge about these fundamental questions This integrative approach is fundamental to a comprehensive understanding of human development generally and to fathering more specifically At the core of this book are

the goals of describing and understanding the nature antecedents and consequences of father involvement across biological status family structure culture and stages in children s development both within and across scientific boundaries Each of the scientific disciplines represented offers unique methodological and theoretical approaches to the study of fathering and to the interpretation of behavioral patterns that characterize ecological systems that include as well as extend beyond family units Together the chapters offer provocative and challenging insight into the nature and meaning of fatherhood and father involvement by questioning longstanding assumptions about fathers roles in the lives of families and children in current history

Parenting Plan Evaluations Kathryn Kuehnle, Leslie Drozd, 2012-01-09 When conducting parenting plan evaluations mental health professionals need to be aware of a myriad of different factors More so than in any other form of forensic evaluation they must have an understanding of the most current findings in developmental research behavioral psychology attachment theory and legal issues to substantiate their opinions As such there is an essential need for a text focused on translating and implementing research associated with the most important topics within the family court This book addresses this gap in the literature by presenting an organized and in depth analysis of the current research and offering specific recommendations for applying these findings to the evaluation process Written by experts in the child custody arena chapters cover issues associated with the most important and complex issues that arise in family court such as attachment and overnight timesharing with very young children dynamics between divorced parents and children s potential for resiliency co parenting children with chronic medical conditions and developmental disorders domestic violence during separation and divorce gay and lesbian co parents and relocation among others The scientific information provided in these chapters assists forensic mental health professionals to proffer empirically based opinions conclusions and recommendations *Parenting Plan Evaluations* is a must read for legal practitioners family law judges and attorneys and other professionals seeking to understand more about the science behind child custody evaluations

Adolescents and Their Families

Richard M. Lerner, Domini R. Castellino, 2013-12-02 First published in 1999 The adolescent period is marked by changes in the biological psychological cognitive and social dimensions of the individual as well as by changes in the adolescents multilevel context i e the peers family school and other institutions in his or her ecology Adolescence is a dynamic period one which exemplifies the importance of understanding the relations between the developing individual and his or her changing context The articles included in this volume represent the current range of scholarship pertaining to adolescents and their families and exemplify the use of such an approach The articles underscore the continual importance of the family across adolescence

Fathers and Adolescents Shmuel Shulman, Inge Seiffge-Krenke, 2015-12-22 The

understanding and study of fathers has traditionally assumed that fathers compared to mothers are less involved with their children. Originally published in 1997, *Fathers and Adolescents* presents a different approach that focuses on the distinctive role of fathers in the lives of their adolescents, especially in their role in adolescents' attainment of developmental tasks. Drawing on a variety of disciplines, the authors examine the relationships of fathers to their adolescents in the context of a changing society. They find that fathers interact in ways that are different from those of mothers but that are important for both normal and disturbed adolescent development. Psychopathological aggressive and incestuous behaviour is considered as well as the role of the father in more ideal circumstances. Drawing on the authors' wealth of clinical experience, this title will still be an important resource for all professionals working with adolescents as well as those in research.

Parenting across the Life Span Jeanne Altmann, 2017-09-04 Research on parenting through the life course has developed around two separate approaches. Evolutionary biology provides fresh perspectives from life history theory using behavioral ecology and parental investment theory. At the same time, the social and behavioral sciences integrate research from long term studies of individual development and from the collection of life histories. This path breaking book advances evolutionary life history research by integrating perspectives of these two approaches into a biosocial science of the life course. It examines parenthood as a commitment extending throughout life and focuses on the impact on parental and child behavior of changes in the timing, distribution and intensity of parental investment. This perspective is particularly appropriate for research on parenting since the family is the universal human institution within which the bearing and rearing of children has been based and which transmits traditions, beliefs and values to the young.

Maternal Employment and Children's Development Adele Eskeles Gottfried, Allen W. Gottfried, 2013-11-21 In a review written in 1979 I noted that there was a paucity of research examining the effects of maternal employment on the infant and young child and also that longitudinal studies of the effects of maternal employment were needed. Hoffman 1979 In the last 10 years there has been a flurry of research activity focused on the mother's employment during the child's early years and much of this work has been longitudinal. All of the studies reported in this volume are at least short term.

longitudinal studies and most of them examine the effects of maternal employment during the early years. The increased focus on maternal employment during infancy is not a response to the mandate of that review but rather reflects the new employment patterns in the United States. In March 1985 the Bureau of Labor Statistics reported that 49.4% of married women with children less than a year old were employed outside the home. Haythya 1986. This figure is up from 39% in 1980 and more than double the rate in 1970. By now most mothers of children under 3 are in the labor force.

Retrospect and Prospect in the Psychological Study of Families James P. McHale, Wendy S. Grolnick, 2001-10. This book assembles 11 of the leading thinkers and researchers in the field of family psychology to create a compendium summarizing both what psychology researchers have learned about the family and where the field should be going next. It evolved after the volume's contributors met with other distinguished family scholars to discuss family influences on child development and to ponder how this knowledge could be used to benefit families and children. This volume includes approaches to the family that feature multiple levels and topics of focal interest to benefit anyone interested in the family. Central topics include mothering, fathering, marriages, family group processes, sibling relations, and families as systems. In addition, three senior authors offer road maps to detect and suggest challenges in research on parenting, b) marital and family dynamics, and c) family systems in the years ahead. In keeping with the theme of how research affects the lives of families outside the university lab settings, this volume includes a chapter on the interface between family research and law. This book closes with a big picture analysis and critique of what is known and not known. Psychologists, anthropologists, sociologists, and public policymakers interested in the family should especially find this volume of interest.

Handbook of Parenting Marc H. Bornstein, 2019-02-01. This highly anticipated third edition of the *Handbook of Parenting* brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects of parenting. Contributors to the *Handbook* look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially hot topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores' house shelves of how-to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The *Handbook of Parenting* is Period. Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the *Handbook* cover: Children and Parenting; the Biology and Ecology of Parenting; Being and Becoming a Parent; Social Conditions and Applied Parenting; and the Practice of Parenting. Volume 3, *Being and Becoming a Parent*, considers a large cast of characters responsible for parenting each with her or his own customs and agenda and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is. Chapters in Part I on The Parent show just how rich and multifaceted is the

constellation of children's caregivers Considered first are family systems and then successively mothers and fathers coparenting and gatekeeping between parents adolescent parenting grandparenting and single parenthood divorced and remarried parenting lesbian and gay parents and finally sibling caregivers and nonparental caregiving Parenting also draws on transient and enduring physical personality and intellectual characteristics of the individual The chapters in Part II on Becoming and Being a Parent consider the intergenerational transmission of parenting parenting and contemporary reproductive technologies the transition to parenthood and stages of parental development and then chapters turn to parents well being emotions self efficacy cognitions and attributions as well as socialization personality in parenting and psychoanalytic theory These features of parents serve many functions they generate and shape parental practices mediate the effectiveness of parenting and help to organize parenting

The Role of the Father in Child Development Michael E. Lamb, 2004-05-12 New edition of the classic The Role of the Father in Child Development The Role of the Father in Child Development Fourth Edition brings together contributions from an international group of experts on the role of fathers in child development Under the auspices of editor Michael Lamb this guide offers a single source reference for the most recent findings and beliefs related to fathers and fatherhood This new and thoroughly updated edition provides the latest material on such topics as The development of father child relationships Gay fathers The effects of divorce on fathers and children Fathers in violent and neglectful families Cross cultural issues of fatherhood Fathers in nonindustrialized cultures The Role of the Father in Child Development Fourth Edition helps mental health professionals bridge scientific theories to application and practice that teach fathers how to positively influence their children's development

Conceptualizing and Measuring Father Involvement Randal D. Day, Michael E. Lamb, 2003-10-03 After decades of focusing on the mother's role in parenting family studies researchers have turned their attention to the role of the father in parenting and family development The results shed new light on childhood development and question conventional wisdom by showing that beyond providing the more traditional economic support of the family fathers do indeed matter when it comes to raising a child Stemming from a series of workshops and publications sponsored by the Family and Child Well Being Network under the federal fatherhood initiative of the National Institute of Child Health and Development this comprehensive volume focuses on ways of measuring the efficacy of father involvement in different scenarios using different methods of assessment and different populations In the process new research strategies and new parental paradigms have been formulated to include paternal involvement Moreover this volume contains articles from a variety of influences while addressing the task of finding the missing pieces of the fatherhood construct that would work for new age as well as traditional and minority fathers The scope of this discussion offers topics of interest to basic researchers as well as public policy analysts

Fatherhood and Family Policy Michael E. Lamb, Abraham Sagi, 2014-02-25 First published in 1984 In the last two decades countries throughout the Western world have witnessed dramatic changes in social attitudes concerning sex roles The aim of this book

is to review the evidence concerning a the factors that limit or constrain male involvement in child care b the ways in which some of these factors are being or might be changed and c the effects of traditional and increased paternal involvement on men women and children **Handbook of Parenting: Being and becoming a parent** Marc H. Bornstein,2002

Completely revised and expanded from four to five volumes this new edition of the Handbook of Parenting appears at a time that is momentous in the history of parenting Parenting and the family are today in a greater state of flux question and redefinition than perhaps ever before We are witnessing the emergence of striking permutations on the theme of parenting blended families lesbian and gay parents and teen versus fifties first time moms and dads One cannot but be awed on the biological front by technology that now not only renders postmenopausal women capable of childbearing but also presents us with the possibility of designing babies Similarly on the sociological front single parenthood is a modern day fact of life adult child dependency is on the rise and parents are ever less certain of their own roles even in the face of rising environmental and institutional demands that they take increasing responsibility for their offspring The Handbook of Parenting concerns itself with different types of parents mothers and fathers single adolescent and adoptive parents basic characteristics of parenting behaviors knowledge beliefs and expectations about parenting forces that shape parenting evolution genetics biology employment social class culture environment and history problems faced by parents handicap marital difficulties drug addiction and practical concerns of parenting how to promote children s health foster social adjustment and cognitive competence and interact with school legal and public officials Contributors to the Handbook of Parenting have worked in different ways toward understanding all these diverse aspects of parenting and all look to the most recent research and thinking in the field to shed light on many topics every parent wonders about Each chapter addresses a different but central topic in parenting each is rooted in current thinking and theory as well as classical and modern research in that topic each has been written to be read and absorbed in a single sitting In addition each chapter follows a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classical and modern research forecasts of future directions of theory and research and a set of conclusions Of course contributors own convictions and research are considered but contributions to this new edition present all major points of view and central lines of inquiry and interpret them broadly The Handbook of Parenting is intended to be both comprehensive and state of the art As the expanded scope of this second edition amply shows parenting is naturally and closely allied with many other fields **Extending Families** Moncrieff Cochran,Charles R. Henderson, Jr,1993-03-26 The roles network members play in the lives of African American and Caucasian parents in the U S and parents in Sweden Wales and Germany are documented and compared in a ground breaking study of how personal networks evolve and how they affect and are affected by development **Failure to Flourish** Clare Huntington,2014-05-20 Exploring the connection between families and inequality Failure to Flourish How Law Undermines Family Relationships argues that the legal

regulation of families stands fundamentally at odds with the needs of families Strong stable positive relationships are essential for both individuals and society to flourish but from transportation policy to the criminal justice system and from divorce rules to the child welfare system the legal system makes it harder for parents to provide children with these kinds of relationships exacerbating the growing inequality in America Failure to Flourish contends that we must re orient the legal system to help families avoid crises and when conflicts arise intervene in a manner that heals relationships To understand how wrong our family law system has gone and what we need to repair it Failure to Flourish takes us from ancient Greece to cutting edge psychological research and from the chaotic corridors of local family courts to a quiet revolution under way in how services are provided to families in need Incorporating the latest insights of positive psychology and social science research the book sets forth a new more emotionally intelligent vision for a legal system that not only resolves conflict but actively encourages the healthy relationships that are at the core of a stable society Advances in Clinical Child

Psychology Benjamin Lahey, 2012-12-06 A decade ago Advances in Clinical Child Psychology was conceived to provide approximately annual updates on the forward edge of research and practice in this rapidly growing field A look back at the 56 chapters published in previous volumes provides a broad overview of the direction of advancement in clinical child psychology at least as viewed by one collection of editors consulting editors and authors The trends are clear There have been decreasing numbers of advances in modes and methods of therapy an increasing emphasis on the family a renewed interest in experimental psychopathology studies of classification etiology and prognosis a growing rapprochement between biological and psychological perspectives and continued strong interest in cognition and social relationships The current volume clearly shows these directions in the growth of the field One chapter discusses etiology four are concerned with the psychopathology of specific diagnostic categories one takes an expanded cognitive approach to social competence and two look at the family system by examining the effects of male parents and children on other members of the family A final chapter opens discussion on the important topic of the nature of excellence in the training of clinical child psychologists It is hoped that this chapter will initiate a national dialogue on this multifaceted and often neglected topic
