*Effective Teaching Strategies for Dyscalculia and*

*Learning Difficulties in Mathematics* Marie-Pascale Noël, Giannis Karagiannakis, 2022-03-28 *Effective Teaching Strategies for Dyscalculia and Learning Difficulties in Mathematics* provides an essential bridge between scientific research and practical interventions with children. It unpacks what we know about the possible cognitive causation of mathematical difficulties in order to improve teaching and therefore learning. Each chapter considers a specific domain of children's numerical development: counting and the understanding of numbers; understanding of the base 10 system; arithmetic word problem solving; and understanding rational numbers. The accessible guidance includes a literature review on each topic, surveying how each process develops in children, the difficulties encountered at that level by some pupils, and the intervention studies that have been published. It guides the reader step by step through practical guidelines of how to assess these processes and how to build an intervention to help children master them. Illustrated throughout with examples of materials used in the effective interventions described, this essential guide offers deep understanding and effective strategies for developmental and educational psychologists, special educational needs and/or disabilities coordinators, and teachers working with children experiencing mathematical difficulties.

**Educating Children with Velo-Cardio-Facial Syndrome, 22q11.2 Deletion Syndrome, and DiGeorge Syndrome, Third Edition** Donna Cutler-Landsman, 2020-01-01 The 22q11.2 deletion syndrome, also known as velo-cardio-facial syndrome and DiGeorge syndrome, is relatively new. The genetic test to determine if a child has it has only been available since 1994. *Educating Children with Velo-Cardio-Facial Syndrome, 22q11.2 Deletion Syndrome, and DiGeorge Syndrome, Third Edition* effectively blends the thoughtful research that has transpired within the past 25 years with practical and current educational strategies to better meet the needs of children with the 22q11.2 deletion syndrome and other developmental disabilities. With its expanded content as well as new contributions from some of the most highly regarded experts in the field, *Educating Children with Velo-Cardio-Facial Syndrome, 22q11.2 Deletion Syndrome, and DiGeorge Syndrome, Third Edition* is an essential resource for teachers, parents, physicians, and therapists of children with this complicated learning profile. To first address the scientific information that is needed to understand the syndrome and the implications of current research, expert contributors present the results of current studies involving brain abnormalities, language learning profiles, medical needs, and psychiatric and behavioral difficulties. These valuable chapters are written in a reader-friendly manner to help parents, professionals, and teachers gain useful and necessary comprehension of the unique characteristics of the 22q11.2 DS population. The second part of the book is a practical guide to educating a child with 22q11.2 DS from birth through adulthood. Divided into the various stages of development from preschool to adulthood, it includes information regarding the necessary tests special education teams should run, typical difficulties associated with learning changes that occur with ability as the child matures, and behavioral problems in the school setting. New to the Third Edition: Addition of recent research studies since 2012; Current research and treatment options for mental health issues; Expanded and enhanced coverage of bullying and the social/emotional aspects of the syndrome; Discussion on the possibility of cognitive
