*The Nordic States and European Unity* Christine Ingebritsen, 2018-08-06 The idea of European unity which the Nordic states have historically resisted has recently become the foremost concern of Sweden Denmark Norway Iceland and Finland Christine Ingebritsen provides a timely analysis of Nordic economic and security policies in the wake of the vast transformation of regional politics between 1985 and 1995 The Nordic States and European Unity addresses two central questions Why did all five Nordic states trade autonomy for integration after 1985 And why do some follow the British pattern resisting supranationalism while others prefer the German strategy of embedding their policies in a common European project Through extensive interviews with representatives of trade unions government ministries parliamentary committees social movements and military and industrial organizations Ingebritsen charts adjustments to the idea of a regional system of governance She highlights crucial differences among these nations as they seek to protect their borders against new security threats In particular Ingebritsen shows how the political influence of leading sectors affects each state's capacity to pursue an integrationist policy Economic sectors are not uniformly affected by European policy coordination and the experience of the Nordic states demonstrates this difference Her work shifts the focus of political economics away from enduring domestic institutions toward an understanding of institutions as sectoral and transnational

**On Top of the World** Bruce O. Solheim, 2000-01-30 An examination of the political and social characteristics particular to Scandinavia which have made women's rise to power

more rapid than in other regions of the world this study also explores how the resulting election of women has provided valuable evidence of the impact of women leaders and their leadership style Solheim begins with a critical survey of feminist scholarship regarding the equality difference debate and the application of such research on the position of women in international politics He concludes in this respect that leadership style may have less to do with gender than one might initially suspect Archival research and interviews with women in leadership roles provide the reader with a closer look at the Scandinavian system a view that will challenge gender stereotypes around the world On Top of the World explores the Nordic political systems in great detail and analyzes systemic factors such as multi party electoral systems and consensus seeking cultural institutions which contribute to the rise of so many women leaders Solheim compares and contrasts the political rise of two Nordic women leaders to power and influence and for the purpose of cross cultural comparison one woman leader from the developing world A final chapter ties together the theoretical framework and the case studies to suggest a direction for future research

**Facing Global Environmental Change** Hans Günter Brauch,Navnita Chadha Behera,Patricia Kamari-Mbote,John Grin,Úrsula Oswald Spring,Béchir Chourou,Czesław Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth session Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world
