Gothic Architecture in France, England, and Italy Sir Thomas Graham Jackson, 1915 **A Comparison of Norman Architecture in the Kingdoms of England and Sicily** Mikito Muroya, 2014 This study offers a comparison of the differing architectural styles and forms in the Norman Kingdoms of Sicily and England exploring what exactly differed as well as attempting to determine why such differences exist in each area In the Kingdom of England the Normans largely imported their own forms from Normandy incorporating little of the Anglo Saxon architectural heritage There are in fact examples of seemingly deliberate attempts to eliminate important Anglo Saxon buildings and replace them with structures built along Norman lines By contrast in the Kingdom of Sicily buildings erected after the arrival of the Normans feature a mix of styles incorporating features of the earlier Islamic Byzantine and local Italian Romanesque as well as the Normans own forms It is difficult to say why such variance existed but there are numerous possibilities Some result from the way each state was formed England had already existed as a kingdom when the Normans conquered the land and replaced the ruling class while the Kingdom of Sicily was a creation of the Norman conquerors furthermore the length of time taken to complete the conquest contrasted greatly Another reason is that the pre conquest cultural situation varied as England was overwhelmingly Anglo Saxon in juxtaposition to the Italian Byzantine and Arab elements in the Mezzogiorno and Sicily Additionally the cultural and trading influence of the Byzantine Empire and Islamic nations may have contributed to the eclectic architecture found in the Kingdom of Sicily Other forms of cultural and artistic expression in the Kingdom of Sicily likewise show a cultural blend absent in England Finally there will be a brief look at the political and social situation in the two realms in order to understand if these cultural expressions are representative of dissimilar societies and models of government In the Kingdom of Sicily a number of non Normans rose to prominence and some families which had held power before continued to do so In England the Norman nobility was much larger and held far more high ranking positions Architectural differences are therefore somewhat symbolic **English Gothic Architecture** Peter Hampson Ditchfield, 1904 *From Roman Britain to Norman England* P.H. Sawyer, 2002-09-11 This new and comprehensive study of the period provides both the student and specialist with an informative account of post Roman English society **The Medieval Foundations of England** G.O. Sayles, 2019-06-26 Originally published in 1948 The Medieval Foundations of England is a chronological framework of the history of ideas and action during the medieval period The book discusses the fundamental problems of medieval life in England examining the agricultural foundation of England the impact of the Anglo Saxon and Scandinavian civilizations the feudalization of society and the interpenetration of Anglo Saxon and Norman civilizations The book also examines the issues faced by the New Monarchy of Henry II and the development of Parliament it also examines how the intellectual Renaissance of the twelfth century affected medieval society The book critically examines the historical sources of information and provides a reading list for each chapter
