North Africa Islamic Architecture:

Architecture of the Islamic West Jonathan M. Bloom, 2020-06-30 An authoritative survey situating some of the Western world's most renowned buildings within a millennium of Islamic history. Some of the most outstanding examples of world architecture such as the Mosque of Córdoba, the ceiling of the Cappella Palatina in Palermo, the Giralda tower in Seville, and the Alhambra Palace in Granada belong to the Western Islamic tradition. This architectural style flourished for over a thousand years along the southern and western shores of the Mediterranean between Tunisia and Spain from the 8th century through the 19th, blending new ideas with local building practices from across the region. Jonathan M. Bloom's *Architecture of the Islamic West* introduces readers to the full scope of this vibrant tradition, presenting both famous and little-known buildings in six countries in North Africa and southern Europe. It is richly illustrated with photographs, specially commissioned architectural plans, and historical documents. The result is a personally guided tour of Islamic architecture led by one of the finest scholars in the field and a powerful testament to Muslim cultural achievement. **Islamic Architecture**

Arts of the City Victorious

Jonathan M. Bloom, 2007 Fatimid art and architecture has always been somewhat anomalous in the history of Islamic art because of the direction it grew west to east, subject matter figural at a time when geometry and the arabesque were developing elsewhere, and unusually rich and precise documentation in royal and popular accounts. Whereas earlier studies treated the two and a half centuries of Fatimid art and architecture as a single category, this book is the first to show how they grew and evolved over time. **BOOK JACKET** **Architecture, Islam, and Identity in**

West Africa Michelle Apotsos, 2016-05-20 *Architecture, Islam, and Identity in West Africa* shows you the relationship between architecture and Islamic identity in West Africa. The book looks broadly across Muslim West Africa and takes an in-depth study of the village of Larabanga, a small Muslim community in Northern Ghana, to help you see how the built environment encodes cultural history through form, material, and space, creating an architectural narrative that outlines the contours of this distinctive Muslim identity. Apotsos explores how modern technology, heritage, and tourism have increasingly affected the contemporary architectural character of this community, revealing the village's current state of social, cultural, and spiritual flux. More than 60 black and white images illustrate how architectural components within this setting express the distinctive narratives, value systems, and realities that make up the unique composition of this Afro-Islamic community.
