English Urban Life James Walvin, 2013-01-11 The years between 1776 and 1851 are of profound importance for the social and urban historian English town dwellers of the period experienced some fundamental changes in their way of life rapid population growth and an unprecedented rate of social change resulting from this These ever increasing armies of town dwellers presented the local and central authorities with a myriad of urgent problems including those of feeding housing and controlling a turbulent populace These years saw the emergence of a new essentially modern machinery of control for running an urban society Despite these dramatic changes an equally important feature of the period was the elements of continuity in work family life and leisure Part one deals with the physical changes the problems for the town dweller inherent in these and the distinctions of social class that developed Part two discusses the political response to the urbanization of England and the problems this caused poverty and law enforcement In part three the continuities are assessed in leisure rituals and family life At every opportunity Dr Walvin brings his material to life with his extensive use of contemporary commentaries In this lively and wide ranging study firmly rooted in recent scholarly research Dr Walvin provides a balanced and up to date picture of a society which although experiencing the most fundamental changes was also characterized by the continuities in its people's habits and social customs This book was first published in 1984

Religion and Respectability : Sunday Schools and Working Class Culture, 1780-1850 Thomas Walter Laqueur, 1976 *Handbook of Religious Culture in Nineteenth-Century Europe* Anthony Steinhoff, Jeffrey Zalar, 2024-12-30 This handbook offers a guide to research on religious culture during Europe's long nineteenth century 1800 1914 Grounded in the latest theoretical approaches and in line with trends that have produced a religious turn in the study of modern Europe the volume assesses the state of the field while making provocative recommendations for its enlargement Unique and ambitious in its thematic breadth it addresses the histories of all five of Europe's main religious traditions Eastern Orthodox Christianity Judaism Islam Protestantism and Roman Catholicism and brings these histories into comparative analysis This analysis extends to a wide range of subjects from popular belief and practice education and modern knowledge formation and the arts to the intersections between religion and urbanization civil society and politics and missions and imperialism It also evaluates recent developments in work on religion vis vis both gender and nationalism while calling attention to newer research that proposes secularism as a form of belief in its own right Presenting the scholarship of eighteen leaders in their respective fields the volume explains why religion as a topic of research has moved from the periphery to the center of modern European historiography

Religion and life cycles in early modern England Caroline Bowden, Emily Vine, Tessa Whitehouse, 2021-10-12 Religion and life cycles in early modern England assembles scholars working in the fields of history English literature and art history to further our understanding of the intersection between religion and the life course in the period c 1550 1800 Featuring chapters on Catholic Protestant and Jewish communities it encourages cross confessional comparison between life stages and

rites of passage that were of religious significance to all faiths in early modern England The book considers biological processes such as birth and death aspects of the social life cycle including schooling coming of age and marriage and understandings of religious transition points such as spiritual awakenings and conversion Through this inclusive and interdisciplinary approach it seeks to show that the life cycle was not something fixed or predetermined and that early modern individuals experienced multiple overlapping life cycles

Victorian Labour History John Host, 2002-11-01 First Published in 2004 In Victorian Labour History Experience Identity and the Politics of Representation John Host addresses liberal Marxist and postmodernist historiography on Victorian working people to question the special status of historical knowledge The central focus of this study is a debate about mid Victorian social stability a condition conventionally equated with popular acceptance of the social order Host does not join the debate but takes it as his object of analysis deconstructing the notion of stability and the analyses that purport to explain it In particular he takes issue with historical evidence noting the different possibilities for meaning that it allows and the speculative character of the narratives to which it is adduced Host examines an extensive range of archival material to illustrate the ambiguity of the historical field the rhetorical strategies through which the illusion of its unity is created and the ultimately fictive quality of historical narrative He then explores the political contingency of the works he addresses and the political consequences of representing them as true

Periodizing Secularization Clive D. Field, 2019-10-31 Moving beyond the now somewhat tired debates about secularization as paradigm theory or master narrative Periodizing Secularization focuses upon the empirical evidence for secularization viewed in its descriptive sense as the waning social influence of religion in Britain Particular emphasis is attached to the two key performance indicators of religious allegiance and churchgoing each subsuming several sub indicators between 1880 and 1945 including the first substantive account of secularization during the fin de siècle A wide range of primary sources is deployed many of them relatively or entirely unknown and with due regard to their methodological and interpretative challenges On the back of them a cross cutting statistical measure of active church adherence is devised which clearly shows how secularization has been a reality and a gradual not revolutionary process The most likely causes of secularization were an incremental demise of a Sabbatarian culture coupled with the associated emergence of new leisure opportunities and transport links and of religious socialization in the church at home and in the school The analysis is also extended backwards to include a summary of developments during the eighteenth and early nineteenth centuries and laterally to incorporate a preliminary evaluation of a six dimensional model of diffusive religion demonstrating that these alternative performance indicators have hitherto failed to prove that secularization has not occurred The book is designed as a prequel to the author's

previous volumes on the chronology of British secularization Britain's Last Religious Revival 2015 and Secularization in the Long 1960s 2017 Together they offer a holistic picture of religious transformation in Britain during the key secularizing century of 1880-1980
