**Salvation in the World** Stephan van Erp, Christiane Alpers, Christopher Cimorelli, 2017-09-07 What happens when Edward Schillebeeckx s theology crosses paths with contemporary public theology This volume examines the theological heritage that Schillebeeckx has left behind as well as it critically assesses its relevance for temporary theological scene In tracing the way s in which Schillebeeckx observed and examined his own context s increasing secularization and concomitant development toward atheism the contributors to this volume indicate the potential directions for a contemporary

public theology that pursues the path which Schillebeeckx has trodden The essays in the first part of this volume indicate a different theological self critique undertaken in response to developments in the public sphere This is followed by a thorough examination of the degree to which Schillebeeckx succeeded in leading Christian theology ahead without merely accommodating the Christian tradition to current societal trends The third part of the volume discusses the issues of climate change social conceptions of progress as well as the evolutionary understandings of the origins and purpose of religions The final part examines Schillebeeckx's soteriology to contemporary discussions about wholeness

**Irreverence and the Sacred** Hugh B. Urban, Greg Johnson, 2019 Irreverence and the Sacred brings together some of the most cutting edge interdisciplinary and international scholars working today in order to debate key issues in the critical and comparative study of religion The project is inspired in large part by the work of Bruce Lincoln whose influential and wide ranging scholarship has consistently posed challenging provocative and often irreverent questions that have really pushed the boundaries of the field of religious studies in important sometimes controversial ways Retracing the history of the discipline of religious studies Lincoln argues that the field has tended to champion a validating feel good approach to religion rather than posing more critical questions about religious claims to authority and their role in history politics and social change A critical approach to the history of religions he suggests would focus on the human temporal and material aspects of phenomena that are claimed to have a superhuman eternal or transcendent status This volume takes up Lincoln's challenge to do better by engaging in critical analyses of four key themes in the study of religion myth ritual gender and politics The book also interrogates the politics of scholarship itself critically examining the relations of power and material interests at work in the study as well as the practice of religion The scholars involved in this project include not only some of the most important figures in the American study of religion such as Wendy Doniger Russell McCutcheon Ivan Strenski and Lincoln himself but also European scholars whose work is hugely influential overseas but not as well known in the U S such as Stefan Arvidsson Claude Calame Nicolas Meylan and others

Human Characteristics Preben Bertelsen, Henrik Høgh-Olesen, Jan Tønnesvang, 2009-01-23 Every once in a while we have to reconsider the perennial questions concerning human nature What are the special human behaviours social practices and psychological structures that make us particularly human The field of evolution psychology and cognitive science is the most expanding interdisciplinary area of this field for the time being uniting different sciences under the same evolutionary paradigm and keeping

them occupied by the same eternal questions stated above Relevant data and theoretical considerations are piling up but an overview is needed To facilitate this a large inter disciplinary conference entitled Human Mind Human Kind was held at Aarhus University Denmark The studies fall into three well defined sections 1 Evolution and Cognition Comparative and Developmental Perspectives 2 Human Sociality Morality and Religiosity 3 Human Sexuality and Mating Strategies Specifying the differences between our own species and the rest of the animal world always provokes debate But these demarcations simply have to be drawn once and again They focus attention and stimulate research exactly because they provoke and challenge other researchers to take up the glove and prove us wrong

**The Case for God** Karen Armstrong,2009-09-22 NATIONAL BESTSELLER A nuanced exploration of the role of religion in our lives drawing on insights of the past to build a faith for our dangerously polarized age from the New York Times bestselling author of The History of God Moving from the Paleolithic age to the present Karen Armstrong details the great lengths to which humankind has gone in order to experience a sacred reality that it called by many names such as God Brahman Nirvana Allah or Dao Focusing especially on Christianity but including Judaism Islam Buddhism Hinduism and Chinese spiritualities Armstrong examines the diminished impulse toward religion in our own time when a significant number of people either want nothing to do with God or question the efficacy of faith Why has God become unbelievable Why is it that atheists and theists alike now think and speak about God in a way that veers so profoundly from the thinking of our ancestors Answering these questions with the same depth of knowledge and profound insight that have marked all her acclaimed books Armstrong makes clear how the changing face of the world has necessarily changed the importance of religion at both the societal and the individual level Yet she cautions us that religion was never supposed to provide answers that lie within the competence of human reason that she says is the role of logos The task of religion is to help us live creatively peacefully and even joyously with realities for which there are no easy explanations She emphasizes too that religion will not work automatically It is she says a practical discipline its insights are derived not from abstract speculation but from dedicated intellectual endeavor and a compassionate lifestyle that enables us to break out of the prism of selfhood

**Deleuze and the Schizoanalysis of Religion** F. LeRon Shults,Lindsay Powell-Jones,2016-09-22 This volume brings together some of the leading voices in the field of Deleuze studies to explore and practice a variety of approaches to the schizoanalysis of religion The authors share an

enthusiasm for applying Deleuze and Guattari's schizoanalytic project to religion but they display significantly different ways of carrying out its creative and destructive tasks. As a whole, the book addresses the relevance of Deleuze for contemporary developments in political theology, liberation theology, Christian doctrine, and the recent growth of interest in spirituality and atheism. Opening up new lines of flight for Deleuze studies, *Deleuze and the Schizoanalysis of Religion* makes rhizomic connections that will be of interest to scholars in other fields including theology, psychology of religion, philosophy of religion, and the history and practice of Western esotericism.

**National Narcissism** Eric Beckett Weaver, 2006. *National Narcissism* offers a groundbreaking anthropological and sociological approach to nationalism through an exposé of the belief systems and psychology of extreme nationalists for whom nationalism is a form of religion. This theoretical approach is illustrated with examples primarily taken from Hungary, with a special focus in two chapters on the role of gender in nationalism. The state of politics and society in Hungary is also examined in a way that steps beyond the usual simplistic flat narratives of what Hungarians are like by stressing the broad variety of viewpoints current in Hungarian society, the milieu in which a small minority of extreme nationalists are able to make their voice heard out of proportion to their numbers or political support. The theory offered by *National Narcissism* has wide-ranging implications for the future study of extremist nationalism in nation-states throughout the world. Sociologists, anthropologists, nationalism studies specialists, social psychologists, and historians of the recent past in Hungary will find that this theoretical book, richly illustrated with examples from Hungarian society, challenges positive and negative stereotypes about nationalism, extremism, post-communism, central and eastern Europe, the European Union, and not least about Hungarians themselves.

*Reinventing Religion* Peter Moore, 2020-10-07. Many of us, proponents and critics alike, commonly make assumptions about religion. We may presume that religion is mainly about having beliefs or being good, or that it is concerned with spiritual rather than material issues, or that religious ideas and practices are meant to be somehow timeless. Such views, Peter Moore argues, work only to obscure the truth that religion is essentially humanity's quest to become fully human. This enlightening exposition questions our very understanding of faith and contends that religions should remain open to reinventing themselves both practically and intellectually, rediscovering neglected traditions and finding new ways forward. Written with subtlety and passion, this book gets to the heart of ongoing debates about the validity and purpose of religion.

Past Minds Luther H. Martin, Jesper Sørensen, 2016-06-16. How do historians understand the minds, motivations, intentions of historical agents? What might evolutionary and cognitive theorizing contribute to this work? What is the relation between natural and cultural history? Historians have been intrigued by such questions ever since publication in 1859 of Darwin's *The Origin of Species*, itself the historicization of biology. This interest reemerged in the latter part of the twentieth century among a number of biologists, philosophers, and historians, reinforced by the new interdisciplinary findings of cognitive scientists about the universal capacities of and constraints upon human minds. The studies in this volume, primarily by historians of religion, continue this

discussion by focusing on historical examples of ancient religions as well as on the theoretical promises and problems relevant to that study      **Christianity, Islam, and Orisa-Religion** J.D.Y.
