and should not be considered a different product. Ninety percent of Americans own a copy of the Bible and while it is the most widely read book it is also the least understood. John Woodhouse, 2018-11-30. The book of 1 Kings outlines the rise and fall of ancient Israel through the stories of fourteen kings. It is a book of great victories and devastating failures. In its pages are violence, betrayal, power, and politics. But no matter how great the accomplishments or evil the deeds, none of these kingdoms built by human kings could last. John Woodhouse walks us through this book passage by passage as it reveals how God's purpose for the kings reaches far beyond what they could accomplish in their lifetimes. Their lives are part of a greater story bearing witness about the King of kings, Jesus Christ, the Savior of the world, building and strengthening our faith as we set our eyes on the kingdom that will last forever.

**Richard Dawkins: The Pope of Unreason** Mike Hockney, 2014-12-19. A book attacking the ideology of Richard Dawkins is invariably assumed to be a defence of religious faith. Nothing could be further from the truth in this case. This book equates faith with insanity. Instead, it argues that we live in the hyper-rational reality of ontological mathematics. We attack the scientific dogma of Dawkins and his fellow travellers for being incompatible with ontological mathematics and, in fact, constituting a quasi-religious, hence mad, faith in empiricism, materialism, randomness, and meaninglessness, nihilism, all of which are refuted by ontological mathematics, which reflects the principle of sufficient reason. Are you rational enough for the truth? Are you intelligent enough to be an ontological mathematician? Many are called, few are chosen. **Spirituality for Dummies**

**Theological Incorrectness** Jason Slone, 2007-12-03 Why do religious people believe what they shouldn't not what others think they shouldn't believe but things that don't accord with their own avowed religious beliefs D Jason Slone terms this phenomenon theological incorrectness He argues that it exists because the mind is built in such a way that it's natural for us to think divergent thoughts simultaneously Human minds are great at coming up with innovative ideas that help them make sense of the world he says but those ideas do not always jibe with official religious beliefs From this fact we derive the important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn't
