Religion In Primitive Culture Part:

Religion in Primitive Culture Edward Burnett Tylor, 1970 The author argues that religion had been used to explain things that occurred in the world He saw that it was important for religions to have the ability to explain why and for what reason things occurred in the world For example God or the divine gave us sun to keep us warm and give us light He argues that animism is the essential foundation of all religions Animism is the belief in spirits inhabiting and animating beings or souls existing in things To the author the fact that 19th century religious practitioners continued to believe in spirits showed that they were no more advanced than primitive societies For him this implied that religious practitioners do not understand the ways of the universe and how life truly works because they have excluded science from their understanding of the world By excluding scientific explanation he asserts that contemporary religious practitioners are rudimentary He perceived the modern religious belief in God as a survival of primitive ignorance However he did not believe that atheism was the logical end of cultural and religious development but instead a highly minimalist form of monotheist deism He therefore posited an anthropological description of the gradual elimination of paganism and disenchantment but not secularization Adapted from **Primitive Culture** Edward Burnett Tylor, 2010-12-02 The highly influential classic study of cultural evolution Wikipedia as an anthropological theory first published in 1871 The Routledge Companion to the Study of Religion John Hinnells, 2005-06-21 Providing a genuinely full guide to the theory and methods related to religious studies this text written entirely by world renowned specialists is the ideal resource for those studying the discipline Communicating Christ in Animistic Contexts Gailyn Van Rheenen, 1991 Whether in New Age mysticism occultism Haitian voodooism Chinese ancestor veneration or Japanese Shintoism animistic beliefs are widespread even today Gailyn Van Rheenen presents a rigorous biblical theological and anthropological foundation for ministering in animistic contexts Deep History, Secular Theory Luther Martin, 2014-05-21 Over the course of his career Luther H Martin has primarily produced articles rather than monographs This approach to publication has given him the opportunity to experiment with different methodological approaches to an academic study of religion with updates to and different interpretations of his field of historical specialization namely Hellenistic religions the subject of his only monograph 1987 The contents of this collected volume represent Martin's shift from comparative studies to socio political studies to scientific studies of religion and especially to the cognitive science of religion He currently considers the latter to be the most viable approach for a scientific study of religion within the academic context of a modern research university The twenty five contributions collected in this volume are selected from over one hundred essays articles and book chapters published over a long and industrious career and are representative of Martin's work over the past two decades Elements of Ritual and Violence Margo Kitts, 2018-07-26 Ritualized violence is by definition not haphazard or random but seemingly intentional and often ceremonial It has a long history in religious practice as attested in texts and artifacts from the earliest civilizations It is equally evident in the

behaviors of some contemporary religious activists and within initiatory practices ongoing in many regions of the world Given its longevity and cultural expanse ritualized violence presumably exerts a pull deeply into the sociology psychology anthropology theology perhaps even ontology of its practitioners but this is not transparent This short volume will sketch the subject of ritualized violence that is it will summarize some established theories about ritual and about violence and will ponder a handful of striking instantiations of their link **Cultures of the Future** Magoroh Maruyama, Arthur M. Harkins, 2011-06-15 No detailed description available for Cultures of the Future *Natural Religion and the Nature of* Religion Peter Byrne, 2013-05-02 This study offers students of religion and philosophy introductory chapters concerning the concept of natural religion It holds that we can t engage in useful discussion about the present concept of religion without a knowledge of the philosophical history that has shaped that concept This is discussed with reference to the notion of natural religion to illustrate certain aspects of deism and its legacy Originally published in 1989 **Interpretation and Dionysos** Park McGinty, 2011-07-19 Sinceits founding by Jacques Waardenburg in 1971 Religion and Reason has been a leading forum for contributions on theories theoretical issues and agendas related to the phenomenon and the study of religion Topics include among others category formation comparison ethnophilosophy hermeneutics methodology myth phenomenology philosophy of science scientific atheism structuralism and theories of religion From time to time the series publishes volumes Anthropology and Theology Douglas Davies, 2020-05-18 that map the state of the art and the history of the discipline Anthropology and Christian Theology have traditionally interpreted religion in quite different ways and have often been thought of as hostile to one another In fact a fundamental concern for human experience lies at the heart of both disciplines This innovative book takes a new look at key anthropological and theological themes and explores the intricacies of their interplay throughout history and in the present Sacrifice embodiment ritual incarnation symbolism gift and power are all related in ways that shed new light on religious behaviour and belief Detailed analysis of fundamental Christian rites shows how they help generate emotional meaning and inspire philosophical ideas and demonstrates how the body serves as a vehicle for religious beliefs Through an examination of these issues and much more Davies reveals how religious rituals help people to become secure in their sense of identity This accessible foray into new territory is essential reading for anthropologists theologians or anyone interested in religion who is seeking new interpretations of familiar themes

Chilton, Craig A. Evans, 2018-12-10 The Proclamation of Jesus seeks to place Jesus in the context of first century Palestinian Judaism The authors hope to discern the essence of his preaching his concept of the kingdom of God and the place of purity in his teaching and activities Better methods for assessing not simply the authenticity of reported sayings and deeds but for tracing the development of tradition are considered The authors are convinced that most of the Synoptic tradition is authentic but that much of it has been reinterpreted and recontextualized Herein lies the real challenge for those investigating the historical Jesus The Proclamation of Jesus opens up new avenues of study and makes new proposals for understanding Jesus in the context of his place and time Birding and Mysticism Volume 2 George E.
