Religion Media And The Public Sphere:

Religion, Media, and the Public Sphere Birgit Meyer, Annelies Moors, 2005-12-01 one of those rare edited volumes that advances social thought as it provides substantive religious and media ethnography that is good to think with Dale Eickelman Dartmouth College Increasingly Pentecostal Buddhist Muslim Jewish Hindu and indigenous movements all over the world make use of a great variety of modern mass media both print and electronic Through religious booklets radio broadcasts cassette tapes television talk shows soap operas and documentary film these movements address multiple publics and offer alternative forms of belonging often in competition with the postcolonial nation state How have new practices of religious mediation transformed the public sphere How has the adoption of new media impinged on religious experiences and notions of religious authority Has neo liberalism engendered a blurring of the boundaries between religion and entertainment The vivid essays in this interdisciplinary volume combine rich empirical detail with theoretical reflection offering new perspectives on a variety of media genres and religions Religion, Media and Public Sphere Nilesh Kumar Singh, 2009-01-01 Religion Media And Public Sphere are all interrelated Religion is a belief that each and every person follows in one way or other according to their faith or ideal Whereas media have a strong social and cultural impact upon society It plays a crucial role in forming and reproducing the self image of society It possess ability to reach a wide audience with a strong and influential message Television Radio Print Media and now a days Internet these all are playing major role in formulating public opinion Both of them are in close relationship with public sphere The public sphere is the organized and concretized common space of a given population Public sphere connect people who are not in the same families communities and clubs people who are not the same as each other Therefore this book deals with these subjects interrelationships in a wider context and will be helpful for all knowledge seeking admirers of this topic **Religion, Media, and Marginality in Modern Africa** Felicitas Becker, Joel Cabrita, Marie Rodet, 2018-02-02 In recent years anthropologists historians and others have been drawn to study the profuse and creative usages of digital media by religious movements At the same time scholars of Christian Africa have long been concerned with the history of textual culture the politics of Bible translation and the status of the vernacular in Christianity Students of Islam in Africa have similarly examined politics of knowledge the transmission of learning in written form and the influence of new media Until now however these arenas Christianity and Islam digital media and old media have been studied separately Religion Media and Marginality in Modern Africa is one of the first volumes to put new media and old media into significant conversation with one another and also offers a rare comparison between Christianity and Islam in Africa The contributors find many previously unacknowledged correspondences among different media and between the two faiths In the process they challenge the technological determinism the notion that certain types of media generate particular forms of religious expression that haunts many studies In evaluating how media usage and religious commitment intersect in the social cultural and political landscapes of modern Africa this collection will contribute

to the development of new paradigms for media and religious studies Contributors Heike Behrend Andre Chappatte Maria Frahm Arp David Gordon Liz Gunner Bruce S Hall Sean Hanretta Jorg Haustein Katrien Pype and Asonzeh Ukah *Religion, Media and Culture: A Reader* Gordon Lynch, Jolyon Mitchell, Anna Strhan, 2012-02-13 This major new reader introduces students to the new and growing field of religion and everyday culture

Institutional Change in the Public Sphere Fredrik Engelstad, Håkon Larsen, Jon Rogstad, Kari Steen-Johnsen, 2017-04-24 The main focus of the book is institutional change in the Scandinavian model with special emphasis on Norway There are many reasons to pay closer attention to the Norwegian case when it comes to analyses of changes in the public sphere In the country's political history the arts and the media played a particular role in the processes towards sovereignty at the beginning of the 20th century On a par with the other Scandinavian countries Norway is in the forefront in the world in the distribution and uses of Internet technology As an extreme case the most corporatist society within the family of the Nordic Model it offers an opportunity both for intriguing case studies and for challenging and refining existing theory on processes of institutional change in media policy and cultural policy It supplements two recent important books on political economy in Scandinavia *Varieties of Liberalization* and *The New Politics of Social Solidarity* Kathleen Thelen 2014 and *The Political Construction of Business Interests* Cathie Jo Martin and Duane Swank 2013 There are further reasons to pay particular attention to the Scandinavian and more specifically the Norwegian cases i They are to varying degrees neo corporatist societies characterized by ongoing bargaining over social and political reform processes From a theoretical perspective this invites reflections which to some extent are at odds with the dominant conceptions of institutional change Neither models of path dependency nor models of aggregate incremental change focus on the continuous social bargaining over institutional change ii Despite recent processes of liberalization common to the Western world as a whole corporatism implies a close connection between state public sphere cultural life and religion This also means that institutions are closely bundled in an even stronger way than assumed for example in the *Varieties of Capitalism* literature Furthermore we only have scarce insight in the way the different spheres of corporatism are connected and interact In the proposed edited volume we have collected historical institutional case studies from a broad set of social fields a detailed outline of contents and contributors is attached Critical assessments of Jürgen Habermas theory of the public sphere Can the public sphere be considered an institution The central position of the public sphere in social and political change in Norway Digital transformations and effects of the growing PR industry on the public sphere Institutionalization of social media in local politics and voluntary organizations Legitimation work in the public sphere freedom of expression and warning in the workplace Return of religion to the public sphere and its effects

Religious Complexity in the Public Sphere Inger Furseth, 2017-08-20 This book is an empirical comparative study of the complexity of religion in the public spheres of the five Nordic countries The result of a five year collaborative research project the work examines how increasingly religiously diverse Nordic societies regulate debate and negotiate religion in the state the polity

the media and civil society The project finds that there are seemingly contradictory religious trends at different social levels a growing secularization at the individual level and a deprivatization of religion in politics the media and civil society It offers a critique of the current theories of secularization and the return of religion introducing religious complexity as an alternative concept to understand these paradoxes This book is for scholars students and readers with an interest in understanding the public role of religion in the West *New Media and the Mediatization of Religion* Gabriel

Faimau, William O. Lesitaokana, 2018-10-01 New media including digital and social media play a central role in producing and reproducing socio cultural and religious practices Its presence has not only resulted in changes to the ways in which religious beliefs are practiced but has also altered the way religious meanings are expressed How has new media technology informed and influenced religious engagement and participation In what ways has new media technology enabled religious groups to practice and preach their religious beliefs to a broader audience To what extent has the emergence of social media and social networking sites shaped religious discourses and religious practices This volume offers a unique Africa centred perspective in response to these questions While presenting new scholarly developments in the fields of media religion and culture in Africa this book also provides empirical and theoretical insights into the intersection between new media and religion

New Media and Religious

Transformations in Africa casts a critical look at Africa's rapidly evolving religious media scene. Following political liberalization, media deregulation, and the proliferation of new media technologies, many African religious leaders and activists have appropriated such media to strengthen and expand their communities and gain public recognition. Media have also been used to marginalize and restrict the activities of other groups, which has sometimes led to tension, conflict, and even violence. Showing how media are rarely neutral vehicles of expression, the contributors to this multidisciplinary volume analyze the mutual imbrications of media and religion during times of rapid technological and social change in various places throughout Africa.

Media, Society, World Nick Couldry, 2012-11-13. Written by an internationally respected scholar, this contribution to media theory considers the relationship between media and social theory. *The Routledge Handbook of Religion and Journalism* Kerstin Radde-Antweiler, Xenia Zeiler, 2020-10-29. The Routledge Handbook of Religion and Journalism is an outstanding reference source to the key topics, challenges, past and present, global issues and debates in this exciting subject. The first collection of its kind, this volume comprises over 25 chapters by a team of international contributors. This Handbook is divided into five parts, each taking global developments in the field into account: Theoretical Reflections, Power and Authority, Conflict, Radicalization and Populism, Dialogue and Peacebuilding, Trends Within. These sections central issues, debates, and developments are examined, including religious and secular press ethics, globalization, gender, datafication, differentiation, journalistic religious literacy, race, and religious extremism. This volume is essential reading for students and researchers in journalism and religious studies. Media, War, and Terrorism Peter van der Veer, Shoma Munshi, 2004. Media War and Terrorism analyses for the first time responses to the events of 9/11 and its repercussions from the point of view of Asian and Middle Eastern countries. Perhaps controversially, the contributors argue that while the US and to an extent European media seems largely unified in their coverage and silence in public debate of the events surrounding the attacks on the World Trade Centre, there exists open critical debate in other parts of the world. By examining the use of media as an instrument of warfare and analyzing the construction of public opinion in mediated electronic warfare, this book clearly shows the difference in perspectives between public opinion in the US and the rest of the world. Moving away from popular assumptions that societies in the West are democratic and progressive and those in the Middle East and Asia are either authoritarian or underdeveloped, this examination of the media in those countries suggests the exact opposite. In combining an examination of the general theoretical issues concerning the use of the media as an instrument of warfare with rich geographically diverse case studies, the editors are able to provide a diverse and intriguing analysis of the impact and interconnectedness of national and global medias. Bringing together contributions from academics, journalists, and media practitioners from all over the world, Media War and Terrorism is an essential read for all of those seeking an informed non-Western perspective on the events following 9/11.

Prophecy and Politics in South African Pentecostalism Mookgo Solomon Kgatle, 2023-12-28 This book is an interdisciplinary study of the relationship between prophecy and politics in South African Pentecostalism The role and the power of prophecy in enhancing the presence of politicians in the church square are unpacked through historical examples as well as case studies of contemporary prophets Solomon Kgatle argues that the influence of prophecy in politics has the potential to weaken the prophetic voice of the church in general and the Pentecostal movement in particular He proposes a Pentecostal political theology of prophecy This theology is developed by taking into cognizance the theoretical and theological frameworks of prophetic imagination and pneumatological imagination In addition this theology seeks a balance between prophecy and power and prophecy and sovereignty
