Religion Philosophy And Psychical Research Selected Essays:

Religion, Philosophy and Psychical Research C.D. Broad, 2014-06-23 This is Volume I of seven in a series on the Philosophy of Religion and General Philosophy Originally published in 1953 this is a collection of selected essays looking at Psychical Research to philosophy arguments around the validity of a personal God and also looking at afterthoughts at the time of the Cold War *Religion, Philosophy and Psychical Research* Charlie Dunbar Broad, 1953 **Religion, Philosophy, and Physical Research** Charlie Dunbar Broad, 1969 **The Idea of the Miraculous** T C Williams, 1990-07-19 *The New Cambridge Bibliography of English Literature: Volume 4, 1900-1950* George Watson, I. R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries **Parapsychology, Philosophy, and Spirituality** David Ray Griffin, 1997-01-09 In this book David Ray Griffin best known for his work on the problem of evil turns his attention to the even more controversial topic of parapsychology Griffin examines why scientists philosophers and theologians have held parapsychology in disdain and argues that neither a priori philosophical attacks nor wholesale rejection of the evidence can withstand scrutiny After articulating a constructive postmodern philosophy that allows the parapsychological evidence to be taken seriously Griffin examines this evidence extensively He identifies four types of repeatable phenomena that suggest the reality of extrasensory perception and psychokinesis Then on the basis of a nondualistic distinction between mind and brain which makes the idea of life after death conceivable he examines five types of evidence for the reality of life after death messages from mediums apparitions cases of the possession type cases of the reincarnation type and out of body experiences His philosophical and empirical examinations of these phenomena suggest that they provide support for a postmodern spirituality that overcomes the thinness of modern religion without returning to supernaturalism *The Nineteenth Century* C.L. Ten, 2016-07-10 This volume covers many of the most important philosophers and movements of the nineteenth century including utilitarianism positivism and pragmatism *Binary Bullets* Fritz Allhoff, Adam Henschke, Bradley Jay Strawser, 2016-01-04 Philosophical and ethical discussions of warfare are often tied to emerging technologies and techniques Today we are presented with what many believe is a radical shift in the nature of war the realization of conflict in the cyber realm the so called fifth domain of warfare Does an aggressive act in the cyber realm constitute an act of war If so what rules should govern such warfare Are the standard theories of just war capable of analyzing and assessing this mode of conflict These changing circumstances present us with a series of questions demanding serious attention Is there such a thing as

cyberwarfare How do the existing rules of engagement and theories from the just war tradition apply to cyberwarfare How should we assess a cyber attack conducted by a state agency against private enterprise and vice versa Furthermore how should actors behave in the cyber realm Are there ethical norms that can be applied to the cyber realm Are the classic just war constraints of non combatant immunity and proportionality possible in this realm Especially given the idea that events that are constrained within the cyber realm do not directly physically harm anyone what do traditional ethics of war conventions say about this new space These questions strike at the very center of contemporary intellectual discussion over the ethics of war In twelve original essays plus a foreword from John Arquilla and an introduction Binary Bullets The Ethics of Cyberwarfare engages these questions head on with contributions from the top scholars working in this field today

Notes from the Crawl Room A.M. Moskovitz, 2021-12-02 Notes from the Crawl Room employs the lens and methods of horror writing to critique the excesses and absurdities of philosophy Each story reveals disastrous and de humanising effects of philosophies that are separated from real lived experience e g the absurdity of arguing over a sentence in Kant while the world burns around us From a Kafkaesque exploration of administrative absurdities to the horrors of discursive violence white supremacy and the living spectres of patriarchy A M Moskovitz doesn't shy away from addressing the complex aspects of our lives In addition to offering often humorous critiques of philosophy these works are also somewhat ironically pieces of philosophy themselves Each story seeks to move a subject area forward offering the reader the capacity to think through ideas in a weirder and more open way than traditional philosophy usually allows An antidote to philosophy that seeks to close down and shut off the imaginative potential of human thought Notes from the Crawl Room revels in the unsettling and creative potential of stories for revealing what thinking philosophically might really mean *The Resurrection of Jesus* Dale

C. Allison, Jr., 2021-03-11 The earliest traditions around the narrative of Jesus resurrection are considered in this landmark work by Dale C Allison Jr drawing together the fruits of his decades of research into this issue at the very core of Christian identity Allison returns to the ancient sources and earliest traditions charting them alongside the development of faith in the resurrection in the early church and throughout Christian history Beginning with historical critical methodology that examines the empty tomb narratives and early confessions Allison moves on to consider the resurrection in parallel with other traditions and stories including Tibetan accounts of saintly figures being assumed into the light in the chapter Rainbow Body Finally Allison considers what might be said by way of results or conclusions on the topic of resurrection offering perspectives from both apologetic and sceptical viewpoints In his final section of modest results he considers scholarly approaches to the resurrection in light of human experience adding fresh nuance to a debate that has often been characterised in overly simplistic terms of it happened or it didn't *Essays in Psychological Research* William James, 1886 The more than 50 articles essays and reviews collected here for the first time were published by James over a span of some 25 years The record of a sustained interest in phenomena of a highly controversial nature they make it amply clear that James s

work in psychical research was not an eccentric hobby but a serious and sympathetic concern [Journal of the American Society for Psychical Research](#) American Society for Psychical Research,1960 [The Journal of the American Society for Psychical Research](#) American Society for Psychical Research,1960 List of members in v 1 6 12 **Sidgwick's Ethics and Victorian Moral Philosophy** Jerome B. Schneewind,1977 Henry Sidgwick s The Methods of Ethics challenges comparison as no other work in moral philosophy with Aristotle s Ethics in the depth of its understanding of practical rationality and in its architectural coherence it rivals the work of Kant In this historical rather than critical study Professor Schneewind shows how Sidgwick s arguments and conclusions represent rational developments of the work of Sidgwick s predecessors and brings out the nature and structure of the reasoning underlying his position [University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Subjects](#) University of California (System). Maximal God Yujin Nagasawa,2017-10-13 Yujin Nagasawa presents a new stronger version of perfect being theism the conception of God as the greatest possible being Although perfect being theism is the most common form of monotheism in the Judeo Christian Islamic tradition its truth has been disputed by philosophers and theologians for centuries Nagasawa proposes a new game changing defence of perfect being theism by developing what he calls the maximal concept of God Perfect being theists typically maintain that God is an omniscient omnipotent and omnibenevolent being according to Nagasawa God should be understood rather as a being that has the maximal consistent set of knowledge power and benevolence Nagasawa argues that once we accept the maximal concept we can establish perfect being theism on two grounds First we can refute nearly all existing arguments against perfect being theism simultaneously Second we can construct a novel strengthened version of the modal ontological argument for perfect being theism Nagasawa concludes that the maximal concept grants us a unified defence of perfect being theism that is highly effective and economical **Jesus' Resurrection and Apparitions** Jake O'Connell,2016-11-03 Did Jesus rise physically from the dead or did he rise as a real non bodily apparition like those reported in the parapsychological literature In this book which is the first book length examination of the question in over fifty years Jake O Connell argues in favor of the physical resurrection hypothesis In order

to do so he employs Bayes Theorem a mathematical theorem which encapsulates the way humans think when they analyze the probability of a hypothesis In addition he provides a thorough overview of the evidence for the reality of apparitions of the dead Pseudoscience and Extraordinary Claims of the Paranormal Jonathan C. William James and the Metaphysics of Experience David C. Lamberth,1999-05-20 William James is frequently considered one of America s most important philosophers as well as a foundational thinker for the study of religion Despite his reputation as the founder of pragmatism he is rarely considered a serious philosopher or religious thinker In this new interpretation David Lamberth argues that James s major contribution was to develop a systematic metaphysics of experience integrally related to his developing pluralistic and social religious ideas Lamberth systematically interprets James s radically empiricist world view and argues for an early dating 1895 for his commitment to the metaphysics of radical empiricism He offers a close reading of *Varieties of Religious Experience* and concludes by connecting James s ideas about experience pluralism and truth to current debates in philosophy the philosophy of religion and theology suggesting James s functional experiential metaphysics as a conceptual aid in bridging the social and interpretive with the immediate and concrete while avoiding naive realism
