

the dialectic exchange of insights. The advantage of such a selection is, of course, that the material does not easily become dated. In Part I, the editors show their respect for tradition in an introductory selection of statements which identify some significant Judeo-Christian centers: the Jewish tradition, the Roman Catholic Church, the Greek Orthodox community, and the Ecumenical Council of Churches. Special sections on community, secularity, and futurism (Moltmann and Metz) are included.

Part II deals with Social Ethics and Behavioral Science (particularly the sociological studies) and the discussion is centered about the interrelationship between religion (especially Christianity) and the scientific evaluation of man's social enterprises.

Part III is devoted to specific social issues; e.g. the development of peoples (Pope Paul) and the Third World; war and peace, violence and social change, Black Theology, urbanism and its problems, the social mission of the Church.

This book is a very valuable publication offering a wide variety of relevant readings in a theology of social responsibility.

WILLIAM P. FROST

Religious Ferment in Asia. Edited by Robert J. Miller. Lawrence, Kansas: The University Press of Kansas, 1974. vii + 194 pages. \$. .

This new book is a collection of eleven papers most of which were originally presented at the 1969 Midwestern Conference on Asian Studies, focusing on themes of the politicization of religious values and organizations, popular reactions to contemporary attempts to modify traditional living patterns and norms, and the selectivity process operative in the use of tradition by reform elements. Five of the pieces concentrate upon Indian religion—Philip H. Ashby, "Religious Ferment in Asia," Joseph W. Elder, "The Gandhian Ethic of Work in India," A. Bharati, "The Language of Modern Hinduism: Cognitive Models and Ethnoscience Analysis," Ainslee T. Embree, "The Social Role of Religion in Contemporary India," and Beatrice D. Miller, "Lamaist Laity and Sangha in West Bengal, India." Three of the remaining essays are concerned with Japan and include H. Byron Earhart's "The Interpretation of the 'New Religions' of Japan as New Religious Movements," originally read at the 1969 AAR convention, and proposing a "phenomenology of new religious movements." All in all a very worthwhile collection for college libraries and for teachers in the history of religions.

Picken, 2010-12-28 One of Japan s major religions Shinto has no doctrines and there are no sacred texts from which religious authority can be derived It does not have an identifiable historical founder and it has survived the vicissitudes of history through rituals and symbols rather than through continuity of doctrine Shinto is primarily a religion of nature centered on the cultivation of rice the basis of a culture with which the western world is not familiar in terms of either its annual cycle or the kind of lifestyle it generates The roots of the Shinto tradition probably precede this and reflect an awareness of the natural order The oldest shrines came to be located in places that inspired awe and wonder in their observers such as the great Fall of Nachi in Kumano or in mountains that conveyed a sense of power The expanded second edition of the *Historical Dictionary of Shinto* relates the history of Shinto through a chronology an introductory essay an extensive bibliography and over 800 cross referenced dictionary entries on Shinto concepts significant figures places activities and periods Scholars and students will find the overviews and sources for further research provided by this book to be enormously helpful **Cycles of Faith** Robert S. Ellwood, 2003 Can the histories of the great religious traditions help us to predict their futures Are broad common patterns discernable within the developments of Hinduism Chinese religion Buddhism Christianity and Islam In *Cycles of Faith* noted historian of religion Robert Ellwood makes the case that the five largest world religions all move through the stages of

Apostolic Imperial Devotional Reformation and Folk Religion Cycles of Faith is a completely revised edition of Ellwood's 1988 book *The History and Future of Faith*. Ellwood's readable text can provide a useful theoretical framework to many classes in religious studies. *Essentials of Shinto* Stuart Picken, 1994-11-22 Shinto is finally receiving the attention it deserves as a fundamental component of Japanese culture. Nevertheless, it remains a remarkably complex and elusive phenomenon to which Western categories of religion do not readily apply. A knowledge of Shinto can only proceed from a basic understanding of Japanese shrines and civilization for it is closely intermingled with the Japanese way of life and continues to be a vital natural religion. This book is a convenient guide to Shinto thought. As a reference work, the volume does not offer a detailed critical study of all aspects of Shinto. Instead, it overviews the essential teachings of Shinto and provides the necessary cultural and historical context for understanding Shinto as a dynamic force in Japanese civilization. The book begins with an historical overview of Shinto, followed by a discussion of Japanese myths. The volume then discusses the role of shrines, which are central to Shinto rituals. Other portions of the book discuss the various Shinto sects and the evolution of Shinto from the Heian period to the present. Because Japanese terms are central to Shinto, the work includes a glossary. **Studies on Asia** Robert K. Sakai, 1974 Vol 1 contains papers from the 8th Conference on Asian Affairs held in 1959 at the University of Illinois.

Domesticity and Consumer Culture in Iran Pamela Karimi, 2013-05-29 Examining Iran's recent history through the double lens of domesticity and consumer culture, *Domesticity and Consumer Culture in Iran* demonstrates that a significant component of the modernization process in Iran advanced beyond political and public spheres. On the cusp of Iran's entry into modernity, the rules and tenets that had traditionally defined the Iranian home began to vanish, and the influx of new household goods gradually led to the substantial physical expansion of the domestic milieu. Subsequently, architects, designers, and commercial advertisers shifted their attention from commercial and public architecture to the new home and its contents. Domesticity and consumer culture also became topics of interest among politicians, Shiite religious scholars, and the Left, who communicated their respective views via the popular media and numerous other means. In the interim, ordinary Iranian families, who were capable of selectively appropriating aspects of their immediate surroundings, demonstrated their resistance toward the officially sanctioned transformations. Through analyzing a series of case studies that elucidate such phenomena and appraising a wide range of objects and archival documents—from furnishings, appliances, architectural blueprints, and maps to photographs, films, TV series, novels, artworks, scrapbooks, work logs, personal letters, and reports—this book highlights the significance of private life in social, economic, and political contexts of modern Iran. Tackling the subject of home from a variety of perspectives, *Domesticity and Consumer Culture in Iran* thus shows the interplay between local aspirations, foreign influences, gender roles, consumer culture, and women's education as they intersect with taste, fashion, domestic architecture, and interior design. *A Comprehensive, Annotated Bibliography on Mahatma Gandhi* Ananda M.
